Mr. J. R. Love and party returned from the Mount Adams mining region via steamer Regulator last evening. He located three wonderfully rich lodes of silver for the Silgol mining company, and predicts that that region will be come as famous as Virginia City within the next year. His locations are both above and below the locations of Mr. Golden, assays of which are reported so rich that it seems incredible. Mr. Love was 55 miles in the wilderness beyond Trout lake. There is not a thing in there for a horse to eat, and his animals took French leave one night and were never found again He says a road can ers will enter into active competition be put into the mines from Trout lake very readily.
