OREGON'S SHOWING AT CHICAGO NEXT YEAR

Remains in doubt, but there is no question about the PORTLAND INDUSTRIAL EXPOSITION—which opens September 21st and closes October 22d, being the best Exposition ever held on the Pacific Coast. So far as Oregon is concerned it will be the forerunner of the Exposition at Chicago in 1893. The principal attractions are the magnificent American Band of Providence, R. I. An art collection valued at \$350,000, and embracing some of the greatest pictures owned in the United States. Immense Horticultural and Agricultural exhibits, the result of the combined efforts of almost every county in the state. A mineral exhibit exceeding all former years. A Stock Department showing tremendous progress. To these are added a larger number of exhibits than ever before; including a magnificent electrical display under the combined Thomson-Houston and Edison Companies. All manufactures in full operation. Government models of Battle Ships. The wonderful Hall of Mystery. The marvelous "Little World," the product of a mechanical genius; all interspersed by novelties incident to the popular special days. Everything new and nothing dead. Greatly reduced rates on all transportation lines.

A War Time Relief.

A relic of the war between the states is now on the dry dock, receiving such minor repairs and cleaning as may be necessary to commission her for harbor defense. This was the second monitor ever built, and the record of her usefulness and her hard service may be seen in the shot dents of the turrets. These are painted in a color different from that of the surrounding iron in order to emphasize their story, and they serve as an object lesson to show that after all, men compared with our days, how innocuous were the boasted shot and shell of the rebellion. Of course it does not make much difference whether a giant is killed by a toothpick or hoisted with a petard. He is dead all the same, and worms will eat him. But we were proud, and with good reason, of those big smooth bores and of their charges in those perilous days.

Then the theory was that for every ten pounds of shot one pound of powder was needed, a 90-pounder being fired with nine pounds of powder; today we have for each pound of powder two pounds of shot, the 10-inch guns of the Miantonomah, the Nantucket's neighbor, using 250 pounds of powder to drive the 500-pound projectile. The Nantucket has also a sentimental interest, for when the great Ericsson lay in state on her decks in the harbor of New York, she was the immediate representative of what his genius had evoked to save the country in time of peril, for the original Monitor went down one dismal day off our treacherous coast, and left as the second product of her wonderful type the little coast defender which now lies half hidden within the walls of the dry dock.—Harper's Weekly
