nres now Existing.

Personnel of the Party now on the Ground for Further Definite Prospecting.

A Boise City dispatch says that Chas. Vandorn, who is interested in the diamond discovery on Snake river, tells the following story in regard to the discovery and his connection with it: In the 60s be was at Kimberly, South Africa, and become acquainted with dismond mining. About six years ago, after coming to Boise, a prospector showed him a stone, which he pronounced to be a Kimberly dismond. When the man told him that he picked it up on Snake river be ridiculed the idea. Subsequently he made -an investigation, and found that there was a formation there similar to that at Kimberly. He had H. Bratnoben, the widely-known mining man, look into it, and that gentleman advised him to have the ground prospected.

He then took Mr. Waters, who was running a ferry in the vicinity, into his confidence, and the latter has been quietly prospecting the country, having recently found the gems. One or more of those stones was sent to Tiffany & Co., who made a favorable report. Vandorn states that he will soon have one of the stones that is being cut. The party who has gone to the fields is composed of Engineer Wellington and an assistant, three employes of Vandorn, who are to take up additional ground, L. W. Weilan an expert from New York and a Mr. Casscerouft and Mr. Bullfinch, . xperts from Baltimore. What it will amount to only time can tell. It should be permanently crippled from a fall one of volcanic action, being on the border of the famous lava flow which stretches in a cheerless desert for hundreds of miles across the country.

Progress in Mexico.

For the fourth time Portiro Diaz has been inaugurated as President of Mexico. His first term was from 1876 to 1880. Since 1884 he has been continually in ofself to be and enlightened an progressive ruler. In the matter of railroads, The Dalles, Oregon telegraphs and telephones, banking facilities and other modern improvements, there has been a remarkable develop-The separation of state and church continues to be enforced. Popular education makes headway, but slowly. The population of Mexico is about eleven millions. Of late somewhat more has been attempted in order to rescue the laboring people from their degraded condition. The Indians constitute about one-third of the population, and lend a life of their own, mingling but not mixing with the other races. Mexican Romanism, not having the enlightenment and stimulus that would come to them from powerful Evangelical churches in contact with their own, is mostly what it is in the other Spanish-Republican countries, largely a miserable parody on what a christian church should be. A more needy, if a more hopeful field, for the mission of a pure Christianity hardly exists.

Alluminum Alloy Composite.

Has given entire satisfaction to iron, steel and brass founders, 21/2 per cent. added to mixture of cheap low grade metals gives 30 per cent. increased and non-crystalizing, prevents blow bowels. holes and sponginess. Alluminum alloy unites copper with iron, and lead with iron and copper, heretofore considered an impossibility. It is not as expensive a metal as has been supposed. It can be produced at the small cost of five cents a pound in small quantities and four cents by the ton. The government tests made at the Rock Island arsenal has given such perfect satisfaction that it is being used in the manufacture of armor plates and ordunnee. Experiments have proven that the resisting power is superior to anything hereto-

Farmers Institute at Dufur.

There is to be a Farmers Institute held at Dufur on the close of the present month, which bids fair to be of unusual interest. The subjects that are to be discussed are those that are of vital importance to the farmers especially so, is that of the sowing of spring and fall wheat. The programme as arranged will be read with interest.

A Remarkable Chapter.

Thistles, J. H. Trout. Adjournment for dinner.

The fate of nearly all the prominent actors in the Cronin murder, to which the latest addition is the death of Martin Burke at Joliet last week forms a remarkable chapter. Pat O'Sullivan, one of Burke's fellow-prisoners, died in prison last May. About a month before John Beggs died. As senior guardian of camp 20, of the Clan-na-Gael, he was prominently identified with the case. Dr. Lewis, the dentist, who was working on Dr. Cronin's teeth at the time of the murder, has recently died of consumption. Edward Spelman, a wealthy brewer of Peoria, who testified in the case as a prominent member of the Clanna-Gael, was killed about a year ago by a fall from a ladder.

Tom Desmond, of San Francisco, another member of the Clan-na-Gael, is ing up to the murder, died recently of pneumonia. Frank Shea, another important witness, went the same way. Peter McGeehan, who was accosted on the street about a week before the latal night by Cronin himself, and accused of being a party to the plot to murder him, secured work in the south side rolling mill and met a borrible death one day by alling into a pit. Robbert Gibbons, who was an alibi witness for Burke, got into a quarrel two years ago with police Captain Schuettler, who was active in running down the Cronin conspirators,

Don't read! Don't think! Don't believe! Now, are you better? You women who think that patent medicines are a humbug, and Dr. Pierce's Favorite Prescription the biggest humbug of the whole (because its best known of all)does your lack-of-faith cure come?

It is very easy to "don't" in this world. Suspicion always comes more easily than confidence. But doubt-little faith-never made a sick woman well-and the "Favorite Prescription" has cured thousands of delicate, weak women, which makes us think that our 'Prescription' is better than your "don't believe." We're both honest. Let us come together. You try Dr. can you afford to doubt.

GOING TO STAND FIRM.

What Some Members of The Next Congress Propose Doing.

DEMOCRATS OF RANDALL'S ORDER.

An Effort to Keep the Party From "Act-

ing the Fool' on Tariff.

CONFIDENT OF THEIR ABILITY

To Hold Down The Wild And Wooly Westerners And Cotton Southerners---Topics.

A Washington dispatch says: "About 40 democratic members of the next congress have entered into a more or less definite agreement. Their purpose is to act as a brake on tariff legislation. In their own language, they are going to 'stand together to keep the party from acting the fool on the tariff question." Most of the members are from the Atlantic seaboard, but several are from the Ohio valley districts. If their great prototype were alive, these forty protectionists would be classed as "Randall democrats." They are entirely confident that they will be able to hold down the wild and wooly Westerners, and the members from the cotton districts, to a very moderate revision of the tariff without a material effect upon the pro-tected industries."

Swallowed a Cork.

The Ashland Tidings of the 9th gives the account as follows of a distressing thing that happened to a little child in that city. "A little daughter of Mr. and Mrs. Anson Jacobs, three years old, had a serious time last unday with a cork that fell into its throat while the child lay upon its back playing with a perfume bottle in which the stopper belonged. The cork had a metal cap, bell shaped, surmounted by a tubular top of the same metal. When the cork fell or was drawn into the windpipe, the child coughed violently, and the cork was forced up, metal end first, into the head stated that fields are in that part of the state which shows such great evidences in the case round of sight, and a man one into the passage leading to the nose, where it was wedged tight, out of sight. in the case, popularly supposed to have It caused the child great pain, and Dr. had much knowledge of the trouble leadsisted by Dr. Songer, who etherized the patient, the doctor succeeded in dislodging and removing the obstruction, after much difficulty.

"The Greatest Farce."

"The greatest piece of detective work in the history of O egon," is likely to prove the greatest farce. The Oregonian-Thiel-Sallivan combination, who are trying to establish the fact that a lot of and as a result, of a threatening movement on Gibbons' part Schuettler shot him and was exonerated by the coroner's jury. In addition, several other deaths have occurred among the "an i-Croning ang," some of them natural and some sheep herders and cowboys of Gilliam 'sixty-four of the bravest men that ever marched out of Portland," and who surrounded one cow boy, and marched him to Roslyn, are probably upon the wrong track. Hale, who has been identified as the one wao held the pistol at Cashier Abernathy's head, was at Wm. Hendryx place in Gilliam county, on the day after the robbery, having come from Fossil that day; he was in Fossil and purchased goods of Steiwer & Co., on the day of the robbery, and it is said the alibi of the other men who have been "positively identified," can and will be clearly established by men whose word is unquestioned.

Oregonian. The Dalles, Baker City, Pierce's Favorite Prescription. If it La Grande, Pendleton and Union are doesn't do as represented, you get your the commercial centers of five counties, money again. Where proof's so easy, which represent a gross valuation of over \$22,000,000, and have a population Little but active-are Dr. Pierce's of over 75,000. This is a good showing Pensant Pellets. Best liver pills made; for a country that two weeks ago was gentle, yet thorough. They regulate described by a state official as a land strength, makes hard metal soft, sound and invigorate the liver, stomach and chiefly devoted to sagebrush and bunch-
