The handsomest bicycle in town is that owned by Fred Houghton, of this city, which he received this morning. It is a beautiful machine and weighs but forty pounds. The wheels are provided with pneumatic tires, which are calculated to make it run steadier and with much greater speed than the old models. There are other improvements and the fine finish of the bicycle make it a piece of property of which anyon might well be proud.

And what changes are wrought in this world while they are nian. lying there. There come mighty convulsions, which change the whole aspect of nature. In places mountains are thrown up where the plain once was. Great fissures are formed in the surface of the earth, through which mighty streams of lave pour out and cover the face of this once lovely land. Then all is quiet, dark and desolate. After a while small streams of water again appear, running now from new-made mountains through the parched and barren waste. For long and dreary years they murmur along; they wear away the barren rock; new soil is made; rivers are again formed. Ages pass, and the rivers wear away the rocks; new lakes are made; a different form of life appears. Then again, these same fearful tragedies of nature re-occur. The lava runs down the mountain slopes; stifling clouds of sickening vapors fill the air; volcanoes send down great showers of ashes upon the fearful scene; the lakes are filled with them. Quiet is at last restored, and then again begins nature's work of reparation. The small streams again resume their journey toward the These great upheavals have made their task an easy one.
