THE MORMON TEMPLE. The site for the great Mormon temple, dedicated yesterday, was selected July 16th, 1847, the fifth day after the Mormons entered the great Salt Lake valley. Brigham Young, viewing the then barren site, struck his cane in the ground in the presence of the apostles and said: "Here will be the temple of our God." Four years later, in 1851, at the conference it was decided to build the temple "of the best materials that can be obtained in North America." The material for the foundation was firestone from a canyon four miles distant. The granite for the walls was cut from Little Cottonwood canyon, and prior to the advent of a railway, in 1870, was hauled by ox teams. February 6th, 1853, ground was broken, and April 6th the corner-stone was laid, 16 feet below the surface. In 1858, when Johnston's army came through, the foundations were covered with earth. Four years seriously wounded or suffered the hardlater work was resumed, and with the ships and horrors of prison life will exception of 1868 and 1869, when the have passed away." workmen of the territory were mostly employed constructing the Union Pacific road, continued without serious interruption. The capstone was laid April 6th, 1892, and the date of dedication yesterday, the 63d anniversary of the organization of the Mormon church and the 40th anniversary of the laying of the temple's corner-stone. The building is 1861/4x99 feet in dimensions, and the walls taper from 16 feet thick at the foundation to 6 feet at the top. There are six towers, three on each side, ranging from 194 to 222 feet |high. The east part of the temple is for the Melchisedec priesthood, representing spiritual affairs; the west for the Aaronic priesthood, dealing with temporal affairs. There are in the building many stones symbolic of the different conditions of mankind. At the base are earthstones, above these moonstones, then sunstones, starstones, cloudstones, etc. The architecture is without a known parallel in aucient or modern times. There are four doors, two on the east and two on the west corners. The cost of the structure was about \$5,000,000. The building is provided with all the modern appliances for lighting, heating, ventilating and sanitation. It is looked upon as the one described in the first two verses of the fourth chapter of Micah. The ser-

Secretaries Gresham and Carlisle are looking into the reason for so great an expense in connection with the Behring sea arbitration commission, and we hope if there has been any leakage they will find it. It is beginning to look, says the Register, as though the expense of settling this long drawn out question will in the end amount to more than the value of all the seals that will be left in the sea after the dispute shall have been settled.

The reason given by Mr. Cleveland for not appointing the office holders who served under his first administration is, that he does not wish to establish or per petuate an office-holding dynasty in the United States. His reason for keeping republican office-holders in until their term expires is, that it stays the mad rush for office at the beginning of each administration and allows the places to be filled decently and in order.

The Khan of Khelat, suspecting five of his wives of infidelity, has put them to death. The British agent of India at Bombay has knocked off part of his 100,-000 rupees a year salary as a punishment, charging him 8,000 rupees a head M.A. GUNST & CO for the ones killed. He can kill six more and then have 12,000 rupees left. Great is a protectorate.

According to the Washington state historian, Chehalis county has the greatest number of feet of standing timber of any county in the state, it being estimated at not less than 30,000,000,000 feet.

## France is Friendly.

Paris, April 6 .- The bill to raise the French legation in Washington to an embassay was issued today. The preamble says:

"From the nature of our institutions and the tie of mutual friendship, France is in a peculiarly fortunate position to respond to the proposals of the government of the people of the United States. We, therefore, shall not hesitate to give the Great Amercan people proof of our sympathy so soon as they raise the rank of their diplomatic representative in

VETERANS PASSING AWAY.

"Our annual death rate equals 2.75 per cent, of the whole number in the Grand Army Republic in this department. This is equivalent to death rate of twenty-seven in a thousand, a larger death rate than usually pertains to any given number of people. Our band of nearly 4,000 is being rapidly mustered out, and if we apply the simple rules of arithmetic, and provided that we re-cruit no more, in the year 1930 not one of our 4,000 would be alive to tell the story of the past.

class of our population, because out of the . 000 in our organization more than one-half are daily suffering from loss of limbs, from wounds, injuries and disabilities contracted during the war. Rea limb shortens the life, but the rheumatism and scurvy contracted in prison also yearly call for their premature victims. Premature aging of all the organs, diminished vital resistance to all disturbing causes, and more especially diseases of the heart, now so alarmingly present with many surviving comrades, are mainly due to the rheumatism and scurvy of prison life.

"I have never seen a survivor from the prison at Andersonville, Ga., that did not have disease of heart in some form or other. So, taking our little band of 4,000 to-day, in about forty years all who have lost limbs or been
