The young ladies who are to give the dime lawn social at Mrs. H. Glenn's tomorrow evening are anticipating a fine time, if it does not rain. They say strawberries and cream, iced, will be the equivalent for a dime, and they will be able to supply the inhabitants of the city, if they have a chance, and that none need stay away because they have no invitation. Lent's circus and menagerie will not be in it at all.

#### Discharged the Section Hands.

It is currently reported today that the Union Pacific road has just made another sweeping reduction in their help. The section foreman here, Bailey by name, Maloney on the division above, and at Mosier and Viento on the divisions below, have been instructed to discharge all their hands and do the best they can without them. A little over a week ago these gangs were reduced to two men each, and now that all of them have been laid off the state of the track a few weeks hence will be frightful to contemplate. In warm weather the rails expand, breaking the fish plates, and occasionally a rail will get out of place and project past another one. In many places the roadbed will get covered with sand on a windy day, and no regular force is provided to remove it. The present managing of the road may be designated as economy gone mad, unless it is proposed to soon discontinue all train service, for a roadbed unwatched and unattended will soon go to wreck and ruin.

#### Inland Telephone Co.

The Portland & Spokane Telephone & Telegraph company have their line nearly completed up to Mosier and are distributing poles on the east side of the mountain, west of this city. The members of a church at Fostoria, Ohio, 400 in number, are hereafter to have individual wine glasses out of which to receive the wine at communion, it being considered that in these days of microbes and germinal disease, it would be dangerous to the health of the congregation to use glasses in common. It may be presumed that the initial of the communicant will be ground on the glass as a matter of further precaution against contaminating influence. The Fostoria 400 are certainly fastidious about what touches their pious lips.

Dr. M. J. Davis is a prominent physician of Lewis, Cass county, Iowa, and has been actively engaged in the practice of medicine at that place for the past thirty-five years. On the 26th of May, while in Des Moines en route to Chicago, he was suddenly taken with an attack of diarrhoea. Having sold Chamberlain's Colic, Cholera and Diarrhoea Remedy for the past seventeen years, and knowing its reliability, he procured a 25-cent bottle, two doses of which completely cured him. The excitement and change of water and diet incident to traveling often produce a diarrhoea. Every one should procure a bottle of this Remedy before leaving home. For sale by Drakeley & Houghton, druggists.

#### WORKING FAMILY PRIDE.

A Sleek Stranger Asks Several of Our Citizens for Small Amounts.

About 4 o'clock yesterday afternoon a man came into the CHRONICLE office and stating that his name was Harlan asked for \$6.50 to enable him to get to his brother's stock ranch, 123 miles from Portland. He particularly pressed his relationship for the loan. He claimed to be recently from Scotland, and stranded in The Dalles, just short of his goal. His brogue was the only evidence of the truth of any of his statements, and his request was unsuccessful. It was later learned that he claimed for his name Glenn, McInerney and Lochhead, and recited the same tale to these gentlemen with like result. Later in the evening he procured a buggy at one of the livery stables and drove around the streets. He is probably the same man reported by the East Oregonian as follows:

Tuesday evening, about 6 o'clock, a young, round-faced man, wearing a gray suit and derby hat and possessed of a tongue that wagged glibly, his talk being marked by a pronounced Irish brogue, drove in front of F. F. Wamsley's residence with a gray horse and top buggy, and asked permission to tie his horse there until he had time to see the Catholic priest, Father DeRoo. The stranger failed to get any financial aid from Father DeRoo and also Mr. Wamsley, but it is said 'worked' the priest at La Grande for a ticket to Pendleton. He is supposed to be the same fellow that obtained \$8 from Landlord Cook of the Hotel Warshawer, Baker City, by representing himself as "Mr. Cook, from Nebraska." This forenoon the sharper tried to work the name racket on Mayor Alexander, S. P. Gould, J. V. Tallman, Sam P. Sturgis, C. H. Carter and I. T. Barr, without success in either case."

#### A TOTAL LOSS.

The Oregon Lumber Co.'s Plant Destroyed by Fire.

HOOD RIVER, Or., June 22, 1893. Special to THE DALLES CHRONICLE.

The planing mill and lumber yard of the Oregon Lumber company, situated three miles below Hood River, burned this morning about 3 o'clock. Loss between \$8,000 and \$10,000. No insurance. The origin of the fire is unknown, but it is supposed it caught from a spark from the engine, as the mill had been running all night last night. This leaves some twelve or fifteen men out of employment.

The flames also spread to the flume and at this writing it is still burning. The roadbed of the Union Pacific a short distance away is unharmed.

#### This Fish Goes Hunting.

The jaculator fish, the piscatorial runner of the Javan lakes, uses his mouth as a squirtgun, and is a marksman of no mean ability. Go to a small lake or pond filled with specimens of jaculators; place a stake or pole in the water with the end projecting from 1 to 3 feet above the surface, place a beetle or fly on top of the pole and then await developments. Soon the water will be swarming with finny gunners each anxious for a shot at the tender morsel which the experimenter has placed in full view. Presently one comes to the surface, steadily observes his prey and measures the distance. Instantly he screws his mouth into the funniest shape imaginable, discharges a stream of water with precision equal to any sharpshooter, knocks the fly or beetle into the water, where he is instantly devoured by the successful nimrod or some of his hungry horde. This sport may be kept up as long as the supply of beetles and flies holds out.

#### Sense of Smell in Dogs.

It has often been proven that dogs are able to track their masters through crowded streets, where it would be impossible to attribute their accuracy to anything except the sense of smell alone. Mr. Romanes, the naturalist, once made some interesting experiments as to this wonderful power, as exhibited in his own dog. In these tests, the naturalist found that his dumb friend could easily follow in the tracks of his master, though he was far out of sight, and that too, after no less than eleven persons had followed, stepping exactly in the tracks made by Mr. Romanes, it being the deliberate intention to confuse the senses of the poor dog if possible. Further experiments proved that the animal tracked the boots instead of the man, for when Mr. Romanes put on new footgear the dog failed entirely.

DIFFERENT points upon the surface of the earth revolve with different velocities. At the poles the speed of rotation is nothing, but at the equator it is greatest, or over 1,000,000 miles per hour.
