The senate are paving the way for the initiative and referendum, which this lid and a gold tap in the barrel lets country will surely see before many out the favorite five o'clock beverage. country will surely see before many years. The people would have passed upon the Sherman repeal bill long ago. and it would not bring with it the condemnation of any one. In confirming up from their heads. The average Van Alen the senate has again overstepped the bounds of decency, the action being totally unexpected.

A balloon ascension was scheduled in The Dalles for this afternoon. These sort of events invariably draw the larg- a "Mother Hubbard." est crowds of people. And yet there is no scientific principle involved other than the simple law discovered by Newton, now so plentifully apparent in the falling leaf. There is still less of amuse- a sure cure for sick headache, bilious ment about it. The magic lantern and complaints, dyspepsia, indigestion, cospanorama of childhood is far its superior. What, then, constitutes its interest, in that gaping crowds will follow the seronaut in his wild flight into space, bending their necks until it would seem the cord would see t space, bending their necks until it strengthen the entire system by their found it just the thing and under its would seem the cord would snap from tonic action. The sight of a human being falling

The sight of a human being falling the through space with ever increasing velocity until it reaches the earth a shapeless, bleeding mass, would indeed be a sight most rare, and this it must be, attracts. There is much of barbarity in us yet, and civilization is not yet perfect. Take away the crowds and there would be fewer balloon ascensions and the misfortune that sooner or later overtakes all balloonists obviated.

Honesty is not so rare as may be supposed by the following, from the Tele-gram, which shows that, notwithstand-those that favor him. ing the distress and hard times in Portland, a chance to take other people's money is despised. "On Third and Alder streets, at 3 o'clock yesterday afternoon, a bank messenger alighted from a car, carrying with him a canvas sack containing about \$6,000. Half way down Alder, between Second and Third streets, the sack burst, and its golden contents of double eagles, eagles and half eagles rolled along the wooden sidewalk. A look of despair was depicted on the messenger's face as he saw a dozen or more Chinese and a few idle white men scramble for the coin. For fully five seconds he was unable to articulate a sound, but at last he implored the crowd to act honestly with him and his earnest pleading request met with the desired response. He removed his sack coat, laid it upon the sidewalk. and Chinese and whites alike dropped what money they picked up on the coat. When the messenger eventually balanced cash, he found himself \$5 short only, and that coin most probably rolled into a crevice."

We have a vivid recollection of that part of the national campaign that was engineered last fall by the Dalles democracy, says the Sentinel. In the big, howling procession, there marched through mud and slush a little, old short-legged Dutchwan bearing aloft. short-legged Dutchman, bearing aloft a

The banner waved victorious over Wasco county's democracy and all suckerdom Grover was elected and democracy seated in uncontrolled authority. Seven months have passed and today wool, instead of being worth 20 cents a pound, is practically worth nothing and hard to sell at that price, while the condition of the wool growers of Wasco county is thus described by an Oregon contemporary: "Sheep buyers who have traveled through Wasco county report that nearly every flock of sheep owned in that county is mortgaged for about all it is The owners can't sell their worth.

THEY CAN HANDLE WHIPS.

Remarkable Precision and Skill of the

The skill of the Esquimau dog drivers with the whips, by this a they control their unruly te...ns. is said to be something rvelous. The whip consists of a rawhide lash about forty feet long, fastened to a handle not over six inches in length. A contest was arranged among them in the presence of an explorer.

A nickel was the prize. It was buried in the ground, with just enough of the edge showing to allow it to be seen. The contestant stood in a line the length of their whips away from it and about eight feet apart. The most expert whip was a little man not more than four fe t hig... with slant-ing eyes and a spiky ...ttle beard that made him look very Japan . A movement of his wris sent the forty feet of lash curving back in a straight line like a long snake.

Another movement and it came forward noiselessly, shooting through the air just above the surface of the ground, until, with a loud report, the tip end of the lash struck the exact spot where the coin lay buried, dug it from the ground, and brought it spinning back to the Esquimau artist.

Such precision and such force are certainly unknown to any other whips in the world. One of these fellows could cut a man to pieces with his whip, if he had occasion to.

The park policemen of San Francisco use the lariat to stop runaway horses. and all are experts with the rope.
