The Duke Veragua is reported to be giving expensive entertainments in his chateau in San Sebastian, in Spain. He is a pretty nice bankrupt.

Hon. W. H. Corbett scores the Telegram in yesterday's Oregonian quite artistically. He shows up the contemptibleness of the paper in abusing Mr. Dekum some months ago, and then upholding Mr. Markle, a man in every way his inferior.

A French physician who has found that the majority of deaths upon the battlefield arise from the bleeding to death of the wounded while waiting for the surgeon, proposes that each soldier in the French army shall be taught where the arteries of his body are, and how to arrest hemorrhages from them.

Representatives Hermann and Ellis are receiving petitions, memorials and letters from their state asking that something be done to prevent the destruction of the lumber, wool, iron and hop interests of the state.

Economy is one of the greatest virtues in times like these. American housewives very often waste much food from carelessness. The slop barrel receives much meat and bread and vegetable scraps which should not be allowed to thus go to waste.

The president withholds his report on the Hawaiian matter, ostensibly to gain time. It is probable that when all the facts are finally learned it will show an unparalleled assumption of authority, if not an absolute betrayal of American interests.

"A Talented Editor." During the coming months, or the heated period, those who are traveling or contemplating a trip away from home should read the following letter from a brilliant and well known editor and provide themselves against attacks of headache and dizziness.

Good Job Printing. If you have your job printing done at THE CHRONICLE you will have the advantage of having it done with the most modern and approved type, with which we keep continually supplied.

WITH THE ELECTRICIANS.

It is said that there is little question but that the Edison incandescent lamp United States patent will expire with the Canadian one on November 19, 1894.

It is found by actual work that electricity for lighting and power purposes can be produced by gas engines at much lower cost than by the medium of steam.

The Pennsylvania legislature, at its recent session, passed a new corporation act, which, it now appears, prevents the incorporation of electric light companies.

The Bell Telephone company of Montreal, Can., supplies telephone service for \$25 a year to residents and \$40 per year to business houses.

Success attended the first trial of electric trolley propulsion for boats on the Erie canal a few days ago, and Gov. Flower favors the application of the system to the entire canal by the state.

The London Electrical Review of October 27, in an article on thunderstorms, states that the electric charge is due to the friction between two currents of air which differ in temperature, or in hygrometric condition.

"That's what I call a 'straight flush,'" said the conductor of a red street car to the tourist.

We were standing on the platform. My eyes followed the direction indicated by the jerk of his thumb and I looked inside to see that the car contained only women. Then I understood that in the technical language of street car conductors "a straight flush" is a car full of women.—Hartford Post.

Mr. J. P. Blaize, an extensive real estate dealer in Des Moines, Iowa, narrowly escaped one of the severest attacks of pneumonia while in the northern part of Iowa during a recent blizzard, says the Saturday Review.
