MRS. THOMAS EDISON.

Bright Chat About the Great Inventor's Lovely Helpmeet.

Edison, the great inventor, has an ideal home at Orange, N. J., and a charming wife to preside over it. Mrs. Edison before her marriage was Miss Nina Miller, daughter of Lewis Miller, the millionaire inventor and leading light in the Chautauque movement. Edison met her in Boston, where she was studying music, some time in 1883. He fell desperately in love, and within six months they were engaged to be married. The wedding took place in February, 1886. Mrs. Edison is tall and stately and has brown eyes and warm, dark hair and a clear olive-com-

plexion. She is perfectly proportioned and very graceful and altogether a charming woman.

The Edison home, Glenmont, is in Llewellyn Park a suburb of Orange, and one of the prettiest places in the Orange mountains, being situated on the eastern slope of Eagle Rock, whence can be obtained one of the most beautiful and extensive views to be had in the neighborhood of New York. The observatory at Coney Island, twenty miles away, can be discerned from there on a clear day, and charming glimpses of the intervening country. Glenmont itself is luxurious and beautiful. Its furnishings and decorations are in the best of taste, and Edison has a comfortable, big library in which a bookworm might dream away his existence in contented peace and bliss.

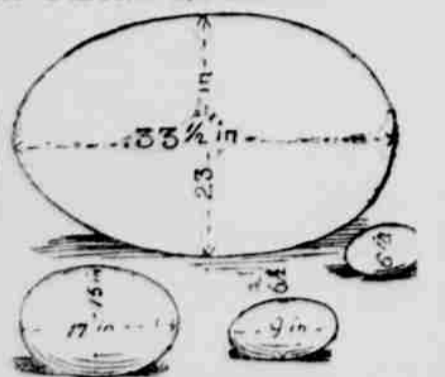

Edison has no time for that kind of dreaming, however. His province is rather to make dreams practical, and to that end he spends most of his time in his laboratory and workshop—a group of red brick buildings about five minutes' walk from the house. They say that Mrs. Edison has often to go down to the laboratory to remind her husband that it is meal time, for he gets so absorbed in his experiments that he quite forgets the necessity of eating.

FATHER OF ALL EGGS.

Sindbad's Babled Nest May Once Have Laid This Monster.

A large specimen of the egg of the fabled roc of the "Arabian Nights," or, according to the extinct gigantic bird of Madagascar, has been secured by J. Proctor, of Vancouver and Prince's Square, B. C., who has brought the curiosity to London. It was discovered by some natives about twenty miles to the southwest of St. Augustine's bay, on the southwest coast of Madagascar. It was floating on the calm sea within twenty yards of the beach, and is supposed to have been washed away with the foreshore, which consists of sand hills, after a hurricane in the early part of the year.

The childlike longshoremen of the antipodes, opining that the egg had a value, showed the unusual piece of flotsam about with a view of sale, and it thus came into the hands of Mr. Proctor. The egg, which is white, brown in color and unbroken, is a fine

specimen, 33 1/2 inches, and an even higher value is placed upon it than upon the egg of the great auk, which lived within the memory of man. The breeding proportions of the egg are better demonstrated by comparison with the eggs of the ostrich and crocodile. An ostrich's egg is about seventeen inches by fifteen inches, and the contents of six such are only equal to one egg of the upornis. The measurements of the egg of the crocodile are normally nine inches by six and one-half inches. It would require the contents of sixteen and one-half such eggs to equal the contents of this great egg, or 148 eggs of the homely fowl, or 30,000 of the humming bird. The last egg of the kind disposed of in London sold for £100, though cracked.

For a sore throat there is nothing better than a flannel bandage dampened with Chamberlain's Pain Balm. It will nearly always effect a cure in one night's time. This remedy is also a favorite for rheumatism and has cured very severe cases. 50 cent bottles for sale by Blakeley & Houghton.

WITH THE ELECTRICIANS.

The contract for the electrical display at the California midwinter fair has been awarded to the Western Electric company.

There is said to be absolutely no foundation for the rumor that the General Electric and the Westinghouse companies were about to consolidate.

The entire system of trunks in the Pennsylvania Railroad company's new station on Broad street, Philadelphia, is to be operated by an electric system of switching and signaling.

The development of gas and gasoline engines in this country has been so great and so practical that many believe it is only a question of time when they will supersede steam engines for the generation of the electric current.

An electric locomotive which generates its own electricity from a steam boiler is the latest French novelty in electric traction. The test of this locomotive on its first trial is said to have been satisfactory, but no information is given as to the cost of operating it.

Mr. J. P. Blaize, an extensive real estate dealer in Des Moines, Iowa, narrowly escaped one of the severest attacks of pneumonia while in the northern part of Iowa during a recent blizzard, says the Saturday Review. Mr. Blaize had occasion to drive several miles during the storm and was so thoroughly chilled that he was unable to get warm, and inside of an hour after his return he was threatened with a severe case of pneumonia or lung fever. Mr. Blaize sent to the nearest drug store and got a bottle of Chamberlain's Cough Remedy, of which he had often heard, and took a number of large doses. He says the effect was wonderful and in a short time he was breathing quite easily. He kept on taking the medicine and the next day he was able to come to Des Moines. Mr. Blaize regards his cure as simply wonderful. For sale by Blakeley & Houghton.

ORIGIN OF PROPER NAMES.

GOLIGHTLY, Lightfoot, Harefoot and Rooffoot were nicknames having allusion to speed.

CROOK, Crump, Cramp and Crimp are but changes rung on an old nickname for a cripple.

SANDELS, Saunders, Sanderson, are variations of Alexander, a favorite name in Scotland.

WISMAN was once a conjurer, hence the family names of Wise, Wisely, Wiseman and Wisman.

STEVEN was the original of Stevenson, Stephens, Steenson, Stinson, Stimson and Stimpson.

TOWS formerly meant a farm, hence the Towner, Towcers, Townsends, Tones, Tunes and Tuns.

ISAAC was the original of Isaacs, Isaacson, Hicks, Hekson, Higgs, Higson, Higgins and Higginson.

GEORGIA's criminal superior court has discontinued the kissing of the Bible in the administration of oaths. Judge Clark, in explaining the order to that effect, says: "Holding up the right hand is the more convenient form. Then the kissing of the book is a very nasty thing. I have heard of persons catching disease in that way."

Bucklen's Arnica Salve.

La Grippe.

During the prevalence of the grippe the past seasons it was a noticeable fact that those who depended upon Dr. King's New Discovery, not only had a speedy recovery, but escaped all of the troublesome after effects of the malady. This remedy seems to have a peculiar power in effecting rapid cures not only in cases of la grippe, but in all diseases of throat, chest and lungs, and has cured cases of asthma and hay fever of long standing. Try it and be convinced. It won't disappoint. Free trial bottles at Snipes & Kinersly's drug store.

Settlement Requested.

During my absence, all who have unsettled accounts with the undersigned are expected to call and settle with Mr. Geo. Krauss, who has my books and accounts. An early settlement will greatly oblige. Yours truly,
