Monday Wednesday and Friday. TRUY SCAY POD:

In Paraguay, a gentleman must kiss every lady he is introduced to. If this rule was introduced into this country introductions would be quite numerous.

The Pendleton Tribune announces five eclipses this year-three of the moon, one of the sun, and one of the Wilson bill. The latter will be total, and visible in North America and England.

The McKinley law may be open to remains, as Mr. Burrows says, that it "never closed a mill in the United States. shut up a mine, stopped a wheel, blew out a furnace fire, or drove a single workman into the streets."

The Omaha Stockman is more hopeful than any newspaper we have recently seen. It says: The financial future is clear. Prosperity is ahead, and all that is necessary to one who desires to "realize" on the future is to "strike while the iron is hot." Buy wheat; buy stocks; buy wildcats or dogs-no matter what you buy, someone will want it at a higher price during the coming year.

It seems to be the opinion of Mr. Wilson and his associates that the success of their party was achieved upon a promise of free wool, and they are consequently showing every indication of a determination to sacrifice all other features of the present bill, if it becomes necessary, to the single issue of free wool. It has developed, moreover, that the clause providing for 40 per cent. ad valorem duty on goods is decidedly unpopular among many democratic congressmen, and that if the bill is defeated in the senate they will seek to reduce the duty still further.

Of the 11,272 immigrants who arrived at the port of New York in December, 4,477 are put down as having "no occupation," and 2,455, or nearly 22 per cent., could neither read nor write. The average sum of money brought by these was less than \$15 per head. Onethird of them are Italians, with an average of \$12. There were nearly 1,500 Russians, with an average capital of \$12. The average in the case of Bohemians was \$7.35, and 112 Portugues had only \$934 in all. These are very small sums to stand between newly arrived immigrants and utter destitution in a country where so many persons are out of work and the resources of charitable organizations are overtaxed.

A lecturer at a meeting of an English Agricultural Workers' Union gave the figures in detail which shows how an agricultural laborer supported his family of self, wife and five children on his wages of 11 shillings (\$2.75) per week. The weekly purchases consisted of six gallons of bread, half a gallon of flour, half a pound of tea, a pound and a half of bacon, one pound of butter and cheese, three pounds of sugar, with oil, coal, soda and six cents' worth of tobacco. Nothing was allowed in the estimate for shoes or clothing, and except at Whitsuntide they never had any fresh meat. The position of this family was that of thousands of other workmen throughout England.

A hopeful editor advances the theory that the hot winds which sometimes prove so disastrous to the ripening wheat crop in the Dakotas will, in a few years, be a thing of the past. Not that they are legislated out of existence by some future Kansas legislature, but they are expected to cease from natural causes. These hot air currents start from the arid regions of New Mexico and Western Kansas and move north, becoming cooler as they move along, but still hot enough to do a great deal of damage when they reach Dakota. As the intermediate area is converted from prairie sod into cultivated fields, these winds will cool more rapidly and be harmless by the time they have crossed Nebraska. The cultivated soil and the growing green crops will give off more moisture than the dry grass of the prairie, and the cooling process will be rapid. Irrigation of the arid plains and the cultivation of even small areas will have a favorable effect on the climate and the next generation of Northwest-

help mortgages now overdue.

ern farmers will be able to live in peace

and comfort with wheat at \$1 per bushel and forty bushels to the acre. The

theory is plausible and the experience of the past favors it; but it will not

Slavery in Slam Slavery has been abolished in name in Siam, but it can never be abolished in fact, for the slaves have no means of supporting themselves outside their masters' houses. Every member of the Siamese upper classes can fetter his servants or throw them into prison without any kind of trial or permission being necessary. One morning 1 went to call upon one of the ablest and most enlightened of the ministers, a man who has been to Europe, and who once actually got into serious trouble for trying to inaugurate a sort of woman's rights movement in Siam, says a writer in the Contemporary Review. I made my way by mistake into a part of his grounds where visitors were not expected, and I found a slave fastened down to the ground in an ingenious kind of pillory, in which he could not move hand or foot, while another slave tortured him with severe strokes of a bamboo rod at the word of a member of the family in order to force him to confess to some misdeed.

A New Cereal. A traveler in the Himalayan mountain region has discovered that the natives of that country cultivate a grain hitherto unknown in civilized agricultural operations, which has something the look of wheat but has very much longer ears, and which has a peculiar inward curve. The shiny, brown grain, unlike wheat, is, on the other hand, much smaller than wheat grains should be for so large an ear. But the interest is that a cereal of this character should yield such heavy crops in so high an altitude, where the seasons are criticism in some respects, but the fact necessarily short and the temperature low. The natives call the grain kow-

Krause's Headache Capsules.

Krause's Headache Capsules.

A remedy used with unvarying success as a cure for Headaches of al' kinds. The results have been so universally good that it is no longer an experiment. It has been used for Headache resulting from Dissipation, in Teriodical Sick Headache, in Headaches caused by severe labor mental or physical, or by exposure to the sun, and in all cases with the most gratifying results. We have, after a horough investigation, had no hesitancy in taking the agency for this effective remedy, and conscientiously recommend it to our patrous.

Respectfully,

A FOOT-HOLD for Consumption is what you are offer-ing, if your blood is impure. Con-sumption is simply Lung Scrofula. A scrofulous condition, with a slight cough or cold, is all that it needs

to develop it. But just as it depends upon the blood for its origin, so it depends upon the blood for its cure. The surest remedy for Scrofula in every form, the most effective blood-cleanser,

flesh-ouilder, and strength - restorer that's known to medical science, is Dr. Pierce's Golden Medical Discovery. For Consumption in all its earlier stages, and for Weak Lungs, Asthma, Severe Coughs, and all Bronchial, Throat and Lung affections, that is the only remedy so unfailing that it can be guaranteed. If it doesn't benefit or cure, you have your money back.

Oregon,

The Gate City of the Inland Empire is situated at the head of navigation on the Middle Columbia, and is a thriving, pros-

ITS TERRITORY.

It is the supply city for an extensive and rich agricultural and grazing country, its trade reaching as far south as Summer Lake, a distance of over two hundred miles.

The Largest Wool Market.

The rich grazing country along the eastern slope of the Cascades furnishes pasture for thousands of sheep, the wool from which finds market here.

The Dalles is the largest original wool shipping point in America, about 5,000,000 pounds being shipped last year.

ITS PRODUCTS.

The salmon fisheries are the finest on the Columbia, yielding this year a revenue of thousands of dollars, which will be more than doubled in the near future.

The products of the beautiful Klickitat valley find market here, and the country south and east has this year filled the warehouses, and all available storage places to overflowing with

ITS WEALTH.

It is the richest city of its size on the coast and its money is scattered over and is being used to develop more farming country than is tributary to any other city in Eastern Oregon.

Its situation is unsurpassed. Its climate delightful. Its possibilities incalculable. Its resources unlimited. And on these
