Weather Forecast.

PORTLAND, March 10.—The following weather forecast is for the time ending tomorrow (Sunday) midnight, March 11th: Saturday, fair; Sunday, rain or snow.

MARS' MONTH.

A Record of Lesser Events for the Thirty-one Days.

School Superintendent Troy Shelley is quite busy with his various school reports.

Dr. Candiana has been in Portland nearly all week in consultation with his lawyer, the Cascade people believe in relation to his proposed damage suit for \$10,000.

Constable John Trans. brought up from Cascade Locks today Geo. Farrell, sentenced to thirty days in the county jail for using obscene language, breaking windows and contempt of court.

The Masonic fraternity of Hood River have extended an invitation to their Dalles brethren and wives to be present at an entertainment tonight at the former place. About twenty-five Masons and their wives availed themselves of the kind invitation by leaving on the local, and will return on the passenger train tonight.

The dance by The Dalles String Band last evening was the last of the series, and though it was not the best attended of the four, the music was none the less entrancing, and the floor was in splendid condition. Previous to dancing the club favored those present with some choice orchestral music, led by that thorough musician, Prof. Birgfeld.

When Baby was sick, we gave her Castoria.
When she was a Child, she cried for Castoria.
When she became Miss, she clung to Castoria.
When she had Children, she gave them Castoria.

Mrs. Phillips has just built a new green-house, much larger than her old one, and has bought all of the pots and plants of Mr. Varney, and is now well prepared to furnish both cut flowers and plants.

Sure Shot Squirrel Poison at Snipes & Kinerly's.

Eagle Creek Mines.

From a private letter from Sparta we learn that the last clean up of the East Eagle Co. was not very satisfactory, and the reason given is that they have been working on an inferior ledge. They will start up again as soon as the snow is off. There is now six feet of it on the ground. The Tacoma company seemed to be a fake or at any rate something was wrong. They did little work and did not pay the men. A portion of them got due bills. Some of these were honored in Union for supplies, but soon the merchants shut down on them. The Tacoma is on East Eagle just where the old Indian trail crosses. They have a fine property, one of the best on Eagle creek. A mill will be put in as soon as possible.

The Detroit company have a ten stamp mill and lumber all on the ground ready to put up in the spring.

Several fair placer mines are to be opened up soon. Some have been shipping all winter.

Two men working on the Mary Ainsworth mine are taking out some fine rock.

Trade Pointers.

Sugar took a jump of $\frac{1}{4}$ c a pound yesterday at Portland, Or.

Australian wools sold in London on the 1st of March, greasy, $4\frac{1}{2}$ to 10d; New Zealand wools, greasy, $6\frac{1}{2}$ to 11d. Reports from Boston of the 2d inst. state that Oregon wools are held steady on the basis of best territory grades. New England hides nominal at $8\frac{1}{2}$ to 4; Texas branded $5\frac{1}{2}$ to 6; slaughter hides $2\frac{1}{2}$ to 3. Pelts are flat at 75 to 85 for winter and 40 to 60 for late spring.

Populist Meeting.

There will be a mass meeting of the populists of Wasco county at the court house on Saturday, March 17th. All lovers of justice and reform are cordially invited to be present. A People's Party Club will be organized and other measures pertaining to the welfare of the people will be discussed.

By order of the committee for The Dalles.

A Monkey's Death-Bed Scene.

Prof. Garner's chimpanzee, Elishaba, recently fell a victim at Liverpool to the severe weather. The scene at the death-bed was very distressing. Poor Aaron, the male chimpanzee, had been most assiduous in his attentions to his comess. Prof. Garner was present during the last moments, and when he put his hand to her heart to find if it had ceased to beat, Aaron also put his hand there, looking up in the professor's eyes as if inquiring if that was all they could do for her. Aaron would not suffer Elishaba to be taken from him, and clung to her body with such tenacity that the professor was compelled to lay it down on its bed of straw. The sadness depicted on Aaron's countenance could not have been more clearly portrayed on the face of any human being. Poor Aaron was not consoled until he had placed his hand in that of the professor, and by signs and sounds had told him of his distress. Both of the animals had become greatly attached to Prof. Garner, and, apart from her value in support of his theory, the loss of Elishaba is keenly felt by him.

Notice.

I hereby announce myself as a candidate for the office of county clerk, subject to the decision of the republican county convention.

I. I. BURGET.

COLLECTING FOSSILS.

A "Dalles City Natural Science Association" Should Be Formed.

EDITOR CHRONICLE—In yesterday's issue of your paper you state that Prof. Ireland, state geologist of California, is coming to Oregon "for the purpose of enriching the collections of his state with the product of our fossil beds;" and that his trip will be a successful one there can be no doubt; for, although this region has been looked over for many years, the nature of the formations here are such that the rains, snows and frosts of each winter expose new specimens to the eye of the collector. The Princeton college expedition of '89, with which the writer was connected as collector and guide, was the last that has worked in this region, and since that time there have been several winters of heavy rains and snows, which have doubtless restored many of those leaves, thus torn from the records of ages long past, to be deciphered and again recorded by man among the archives of the present.

It is a fact to be regretted that the greater part of all the fine specimens discovered in Oregon have been carried away to swell the collections of museums in other states, most of which have museums of their own. This is all the more deplorable when we know that the things thus taken away can never be duplicated, for the reason that they are found no where else in the world.

I have been connected with this work for many years, and there is not a fossil locality in Eastern Oregon that has not been explored by me. The first work done in the John Day rivers region was by Prof. Condon in 1870, and that was the first work in the fossil fields of Eastern Oregon. As the localities were not well known then, comparatively few specimens were secured. In '71 the Yale college expedition came out and made a small collection, but in '72 work was commenced in earnest, and it was at this time that I began work for Yale college museum, under the direction of Prof. O. C. Marsh, and from then until '78, with one or two other men, I was kept constantly at work, each year sending away great quantities of beautiful specimens to grace the shelves of Peabody museum at Yale college. In the spring of '78 the Plute and Bannock Indians got up a little expedition into the John Day country, but it was not fossils they were looking for. They were after horses, cattle, and the scalps of settlers. As two expeditions into the same regions, with such divergent objects, could not well agree, we fossil-hunters gave the Indians the field and helped the settlers save their property. In the spring of '79 I again took up the work under the direction of Prof. E. D. Cope, of the Academy of Sciences, Philadelphia, and the next year for the United States Geological Survey, directed by Prof. Marsh, then U. S. paleontologist. During all these years we procured many tons of material of the very greatest interest to the world of science, all of which has been taken from the state and forever lost to it. It is true, that by careful and systematic work, many of these specimens could in time be duplicated, but it would take many years of labor to replace them all in a museum of our own and perhaps very many of them will never be found again. Each winter for all time to come these things will continue to be exposed to view, but each year will make them less plentiful. Since there is apparently no interest

manifested in this subject by the state, a city like Portland, Baker or The Dalles should take the matter in hand, form a Natural History Association and start a museum of their own. Such an institution would very soon become a pride to the state and would directly not only be self-sustaining, but a source of profit to its shareholders. Money could be made from the sale of duplicate specimens, from lectures on natural history subjects and from a small admission fee to the museum. Such an institution should contain specimens of fossil, minerals and Indian relics, also mounted specimens of birds and animals found in this country, together with the best specimens of plants, grains, grasses, fruits, etc., all of which can now be had for the taking. A vast collection could soon be made with comparatively little cost, which would be worth many thousands of dollars, besides being a source of great interest and pleasure. Can we not organize "The Dalles City Natural Science Association" and secure some of these benefits before it is too late? It is true as you say, our state is being plundered of all its best specimens, but if our people will not reap the benefit to be derived from them, let us remember that since "science recognizes no state lines" it is better to let others have what we cannot have ourselves, than that all these fine things should remain where they are and be of no use to the scientific world, but in a short time be destroyed by the action of the elements, or carried away and broken up by people who do not realize their value.

L. S. DAVIS.

La Grippe.

During the prevalence of the grippe the past seasons it was a noticeable fact that those who depended upon Dr. King's New Discovery, not only had a speedy recovery, but escaped all of the troublesome after effects of the malady. This remedy seems to have a peculiar power in effecting rapid cures not only in cases of la grippe, but in all diseases of throat, chest and lungs, and has cured cases of asthma and hay fever of long standing. Try it and be convinced. It won't disappoint. Free trial bottles at Snipes & Kinerly's drug store.

PERSONAL MENTION.

Mr. W. S. Cram is in the city.

Mr. C. G. Roberts of Pendleton is in the city.

Mr. George Prather of Hood River is in the city today.

Mayor Paul Krefl left for Warm Springs this morning, to be absent several weeks.

Mr. J. P. McInerney is en route to the Midwinter fair. He will be absent about two weeks.

Mr. Leslie Butler returned home from Kansas this morning after an absence of several months.

Mr. C. A. Stuart, a prominent citizen of Cascade Locks, is in the city on business, and favored THE CHRONICLE office with a call.

We had the pleasure of a call from Mr. P. B. Sinnot today. In conversation with that gentleman he expressed himself as very sanguine of telling republican victory in the June elections.

High Living.

If you keep at it, is apt to tell upon the liver. The things to prevent this are Dr. Pierce's Pleasant Pellets. Take one of these little pellets for a corrective or gentle laxative—three for a cathartic. They are the smallest, easiest to take, pleasantest and most natural in the way they act. They do permanent good. Constipation, indigestion, Bilious Attacks, Sick or Bilious Headache, and all derangements of the liver, stomach and bowels are prevented, relieved and cured. They're guaranteed to give satisfaction in every case or your money is returned.

The worst cases of Chronic Catarrh in the Head yield to Dr. Sage's Catarrh Remedy. So certain is it that its makers offer \$500 reward for an incurable case.

Stockholders' Meeting.

Notice is hereby given that there will be an annual meeting of the stockholders of the Dalles, Portland & Astoria Navigation Company held in the Chronicle hall on Saturday, the 7th day of April, 1894, at the hour of 2 o'clock p. m., for the purpose of electing seven directors and transacting any other business that may properly come before said meeting. By order of the president.

ALL THE NEWS TWICE A WEEK.....

YOU THINK YOU WILL CONCLUDE THAT WE ARE AT PRESENT OFFERING A BARE GAIN IN READING MATTER. \$1.50 A YEAR FOR YOUR HOME PAPER.

ALL THE NEWS TWICE A WEEK.....

— THE —
Oldest Agricultural Paper in America.

(ESTABLISHED 1816.)

To all cash subscribers of THE CHRONICLE paying one year in advance.

Hugh Glenn, The American Farmer,
1729 New York Avenue,
WASHINGTON, D. C.

THE AMERICAN FARMER, which is now entering upon its 75th year, is the pioneer farmer's paper in the country. It is a large eight-page paper, and contains 56 columns of the choicest agricultural and literary matter, plentifully embellished with fine illustrations. It is

NATIONAL IN CHARACTER,

and deals with farming and farmer's interests on broad, practical lines. It

EMPLOYS THE BEST WRITERS IN THE COUNTRY,

and everything that appears in its columns is of the highest character. Every department of the farmer's business is discussed in an earnest, practical way, looking to "the greatest profit and benefit to the farmer and his family. It appears on the 1st and 15th of each month, and is furnished at the low price of

50 CENTS A YEAR

in advance. This makes it the cheapest agricultural paper in the country.

FARMER LEGISLATION.

During the coming year there will be an immense number of matters of the most vital interest to farmers dealt with by Congress and the Executive Departments at Washington. It is highly important that the farmers be kept promptly and fully informed as to what is being planned and done affecting them at the National Capital. They should all, therefore, take THE AMERICAN FARMER, which, being on the ground, has better facilities than any other papers for getting this information, and devotes itself to this duty. They will find in it constantly a great amount of valuable information that they can get in no other paper.

THE AMERICAN FARMER and THE CHRONICLE will be sent one year for \$1.75.
