## BOSTON'S WEALTHY WOMEN.

Several Millionaires Among Them, Including One with an Estate of \$22,000,000. One of the wealthiest women in Boston is undoubtedly the widow of the late Augustus Hemengway, as she was the chief heir to an estate valued at \$22,000,000. Mrs. Hemengway resides in one of the grand old houses on Mount Vernon street, and from her home dispenses a wide hospitality that includes the poor as well as the rich, and the charities and philanthropic enterprises in which she has long been quietly interested can only be num-bered by her nearest friends. Her normal cooking school and her gymnasium are described by the Journal as two of her most successful undertakings.

Mrs. Quincy A. Shaw, daughter of Prof. Louis Agassiz, has a private fortune which enables her to dispense a royal bounty. Her "kindergarten" work alone is said to cost her about \$50,000 a year. Mrs. Sears, the wife of J. Mont-

gomery Sears, and daughter of Charles F. Choate, of Sonthboro, also has a worthy fortune in her own name. Mrs. Senrs' reputation as an artist has been established since her notable triumph in winning the \$500 Evans prize, awarded by the jury of the New York water color exhibition last year.

Mrs. S. D. Warren, of Mount Vernon street, is credited with at least \$3,000,-000. She owns the Androscoggin mills and a great deal of other property. ## TALK ABOUT WEATHER.

w York Man Who Tells the Tempera-ture by Tasting the Atmosphere.

There is a man in New York who is an expert weather sampler, and just as the tea expert tastes his brands to appraise them, so this man tastes the weather. He will at any time of the day, or at any place, so long as it is in the open air, taste the atmosphere and tell you what the temperature is. He never gets more than two degrees away and seldom more than one. other day, says the Tribune, a friend played a joke on him by using a thermometer which was not in working order. The sampler, after tasting the weather, said that it was thirty-one degrees above zero. The thermometer said it was thirty-seven, but the expert would not be convinced that he could be wrong. He insisted that they walk along until they found another thermometer. They found it and it

registered thirty-one degrees. "When the leaves turn early," says a Michigan man, "we have a hard winter. When they turn late we have an open winter. One would suppose that the time at which winter set in would have everything to do with the turning of the leaves, and it is known that some open winters set in early and some cold ones set in late. But I have noticed that the time of cold weather beginning does not mark the turning of the leaves. The present winter set in early in Michigan. There was unusually cold weather in October, but the leaves did not turn until a month dulge in many by the most eminent artists of the time. Mrs. Alpheus bermen arranged for an open winter on that account, and they have not been mistaken. In fact, I have never known the sign to fail."

#### Beware of Ointments for Catarrh that Contain Mercury,

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten-fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufac-tured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken in-ternally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you

## LARGE SAILING SHIPS. Some of the Mammoth Freight Vessels of

Recent Build. The largest sailing ship affoat is the French five-master La France, launched in 1890 on the Clyde, and owned by Messrs. Ant Dom Bordes et Fils, who possess a large fleet of sailing vessels. In 1891 she came from Iquique to Dunkirk in 105 days, with 6,000 tons of nitrate, yet she was stopped on the Type when proceeding to sea with 5,500 tons of coal and compelled to take out 500 tons on the ground that she was overladen.

There is not a single five-masted sailing ship under the British flag, says Chambers' Journal. The United States has two five-masters, the Louis, of 830 tons, and the Gov. Ames, of 1,778 tons, both fore-and-aft schooners, a rig peculiar to the American coast. Ships having five masts can be counted on the fingers of one hand, but, strange to say, the steamship Coptic, of the Shaw, Savill & Albion company, on her way to New Zealand, in December 1890, passed the Gov. Ames in 14 de grees south 34 degrees west, bound for California, and two days later, in 6 degrees south 31 degrees west, the French five-master La France, bound south.

Passengers and crew of the Coptic might travel over many a weary league of sea and never again see two such excellent object lessons in the growth of sailing ships in quick succession. The largest three-masted sailing ship is the Ditton, of 2,850 tons.

The experience of Geo. A. Apgar, of German Valley, N. J., is well worth remembering. He was troubled with chronic diarrhosa and doctored for five months and was treated by four different doctors without benefit. He then began using Chamberlain's Colic, Cholera and Diarrhea Remedy, of which one bottle effected a complete cure. It is for sale by Blakeley & Houghton, druggists.
