

MURDER AND SUICIDE

Young Man Killed His Sweetheart and Himself.

WAS TOO POOR TO GET MARRIED

Attempt to Blow up a Prison With Dynamite--Exciting Scene in a Paris Theater.

ATHENS, O., May 9.—William Crawford shot and killed Jesse Lorey and himself, in Jacksonville, this county, last night. They were lovers and had left a dance in the village to take a walk. Crawford fired three shots into the body of the girl and then shot a hole through his own head. They were both dead when found a few moments afterward. The young man had been despondent for several days. He wanted to marry the girl, but was out of employment and feared he would never be able to make her his wife. Both belonged to good families.

Dynamite in a Prison.

JACKSON, Mich., May 9.—An attempt was made last evening to blow up the prison with dynamite. As the convicts were marching to their cells, Edward Huntley, John Demant and Arthur Lawrence broke from the ranks. One seized a guard and another sprang up into a window and attempted to light a fuse in connection with a dynamite bomb. Deputy Northcup and Captain Stone arrived in time to quell the disturbance, and the convicts were soon locked in their cells. The warden says there have been rumors of dynamite in the prison for over a year, but no trace of it could be found.

Scene not on the Bills.

PARIS, May 9.—A young French woman named Coyot attempted to commit suicide in the Empire theater last night. The woman occupied a seat in the grand circle and was in evening dress. At a certain part in the performance she arose, and a moment later a pistol shot startled the audience. The woman had shot herself. She was carried from the theater and doctors summoned. The ball had lodged in the stomach and the doctors pronounced the wound serious, and probably fatal. In the meantime the people in the theater were in a state of partial panic, and were with difficulty quieted. Nothing could be learned of the woman's motive.

TWO DEPUTIES SHOT.

A Fight With the Fugest 4000 Coxeyites at North Yakima.

TACOMA, May 9.—A fight took place at North Yakima at 7:30 this evening between marshals and industrialists. Deputy Marshals Chidester and Jolly, of Tacoma, were shot, the first named in the leg and the latter through the bowels. He is bleeding internally. Twelve shots were fired in the melee. Savage, Weaver and McAphee, all Seattle Coxeyites, received flesh wounds from revolvers. "Buck," a Seattle Coxeyite, who was the leader of the crowd, had two fingers broken with a club. Intense excitement reigns at Yakima. The fight was the result of the determination on the part of the Coxeyites not to leave a train which has been held since 10 o'clock this morning. It seems difficult to determine just who began the shooting at Yakima, but from particulars now at hand it appears that the marshals shot first to protect their comrade, whom the industrialists were clubbing because he had pulled a Coxeyite from the brake. They shot only to wound and cause the Coxeyites to desert. The infuriated industrialists who had guns then, apparently, pulled them and shot into the force of marshals, hitting Jolly and Chidester.

They Stole The Train.

PUEBLO, Colo., May 9.—The Cripple Creek Coxeyites, who seized a train here and started east last night, got around an obstruction near Olney, caused by ditching the engine, by laying a new track, and resumed their journey. Superintendent Derby ordered the water drawn from all the tanks along the road

and obstructions placed in the way of the train wherever possible by wrecking engines. Not a regular train is moving on the road in Colorado today.

The Coxeyites stolen train encountered another obstacle near Arlington, 80 miles west of this city, where four engines were ditched by order of Superintendent Derby. The industrialists are now laying a track around the obstruction. Sheriff Mosses has been all morning trying to raise a posse to capture Saunders and his army, but so far is unable to secure more than 40 men.

The Sacramento Gang Stranded.

SACRAMENTO, Cal., May 9.—Members of the Sutter Fort army and the police scoured the city all last night looking for Logan, the treasurer of the army, and Savage, who decamped with a portion of the army funds. They were not to be found, and it is believed that they have crossed the mountains.

NEWS NOTES.

The story of the Breckinridge case will be allowed to pass through the mails. First Assistant Postmaster-General Jones has notified the postmaster at Chicago that the department has no authority to exclude the book.

Advices have been received from interior points in California that the prune crop, which last month gave indications of being a heavy one, will not mature, the prunes on the trees in many places turning yellow and falling.

The divorced wife of Coxey, who is ill at Massillon, instructed her attorney to begin suit against Coxey and Carl Browne for abducting her daughter Mamie, who appeared as the "goddess of peace" in the Washington parade of the commonweal.

Horatio Nelson Clark, the veteran who discovered the spring of water in Andersonville prison, and which was named "Providential Spring," was killed Monday on the Shore railroad at Aureville, N. Y. He was driving across the track, when he and his horse were run down. Clark was 63 years old and leaves a family.

CAST-IRON BRICKS.

An Ingenious Invention in the Line of Building Material.

Most of the building materials now in use have been employed with greater or less skill for thousands of years. Since primitive man discovered the adaptability of stone, wood and burned bricks composed of clay and sand for home-building, no equally useful building material has been added to the list. According to the American Furniture Gazette, a German mechanic has recently patented an invention which has certainly many advantages over the old-fashioned brick of clay, though use may not prove it to be in all respects superior.

Its practical design and ingenuity are characteristic of the modern tendency of inventions. It is in the form and of about the size of an ordinary brick, but is composed of cast-iron and is hollow. The shell is so thin that the brick weighs less than one made of clay. A wall is built of such bricks without the use of mortar, and no skilled labor is required in laying them. The upper and lower sides of the bricks are provided with grooves and projecting ribs, which fit into each other easily and perfectly and form a wall of great strength.

There are also two large circular openings in the upper side of each brick, arranged so as to receive projections on the lower side of the brick that is to be placed above it. One of these projections is hook-shaped, which insures a solid hold. A wall of the bricks is very quickly put together.

After the wall is built it is covered with paint. This closes all the cracks, renders the wall air-tight, and prevents the bricks from rusting. By the use of good paint the wall can be made highly ornamental. The bricks are very durable, and a building made of them is perhaps as nearly fire-proof as possible.

A wall thus constructed can be taken down or rebuilt as readily as it can be put up. There is no mortar to be removed, as there is when clay bricks are used. A house with such walls is cool in summer and warm in winter, for the large air spaces prevent the passage of heat.

As the supply of such bricks a man can put up his own house, and be entirely independent of brick-layers, mortar-men and hod-carriers. If he does not wish to build a house, he can take it down and sell it another with the same material, which is worth more than its cost.

No Use for Lard.

That's the happy and healthy condition of thousands of housekeepers who have been bright enough to try

Cottolene

THE NEW SHORTENING, which is a pure, perfect and popular substitute for lard for all cooking purposes.

The success of COTTOLENE has called out worthless imitations with similar color and similar names. Look out for these. "All that glitters is not gold," and all that's yellow is not COTTOLENE.

There is but one valuable new shortening, and that is COTTOLENE. It is healthful, delicate and economical as a single trial will prove.

At leading Grocers. Watch the name. REFUSE ALL SUBSTITUTES. N. K. FAIRBANK & CO., Sole Manufacturers, ST. LOUIS and CHICAGO, NEW YORK, BOSTON.

FIGHTING DUELS IN ITALY.

About the Only Exercise in Which Natives of the Sunny Land Indulge.

Duelling is the leading and almost the only athletic sport in Italy, says the Idler. It is true that there is an Alpine club, so-called because its members climb the lesser heights of the Apennines, but there is no cricket, and, except among the laboring classes, ball games of even the mildest character are hardly ever played. The young Italian gentleman finds in dueling an exercise which is beneficial to his muscles and sufficiently exciting to interest him, and the middle-aged Italian keeps up his practice with the foils and occasionally challenges and fights a friend just to show that he is not so old as to have lost a genial interest in the innocent pursuits of youth. Duelling is contrary to law in Italy, but the duelist is never punished (unless he should accidentally kill a man), except in the army, where the sport is obligatory and strictly prohibited. The same curious anomaly exists in Germany, where army officers are arrested and punished if they fight a duel and either cashiered or forced to resign if they do not. The Italian officer, when challenged to fight, is virtually told: "You'll be condemned if you do and condemned if you don't." This seems to the Anglo-Saxon decidedly idiotic, but nothing can well be more idiotic than dueling. Playing charades in a drawing-room rises to philo-sophic heights of wisdom in comparison with it. At least ninety-nine out of every hundred Italian duels are of the class technically known as "first blood" duels. That is to say, the combat ceases the moment either of the adversaries loses blood. In these duels the sword is always used, and the slightest scratch on the hand or the arm—which are the localities usually scratched—signals the end of the game and authorizes the duellists to sheathe their weapons and go somewhere to dinner together. Instances have happened in which a duelist has been accidentally run through the body and killed, but incidents of this sort are extremely infrequent compared with the fatalities of the football field. Italian dueling is probably the safest of all athletic sports, except prize fighting as practiced by modern pugilists by means of letters to the sporting papers.

Under the influence of music we are all deluded in some way. We imagine that the performers must dwell in the regions to which they lift their hearts. We are reluctant to admit that a man may blow the most soul-animating strains from his trumpet and yet be a coward; or melt an audience to tears with his violin, and yet be a heartless profligate.—Hillard.

How's This!

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHENEY & CO., Props, Toledo, O.

We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligation made by their firm. WEST & TRAU, Wholesale Druggists, Toledo, O.

WALDING, KINMAN & MARVIN, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price 75c. per bottle. Sold by all druggists. Testimonials free.

Imperial bicycle, lightest and best to date. See J. M. Huntington & Co. Ask your dealer for Mexican Silver Stove Polish.

Gentlemen's Manhattan Fine Shirts, * *

For Summer Wear.

Too much cannot be said in favor of Manhattan Shirts, not only for wear but for Style, Fit, Finish. Just received our Summer Stock. Something new and nobby

Roll Collar, Open Front, Plaited Bosom, Perfection, Plain White.

A. M. WILLIAMS & CO.

COLORS IN COAL TAR.

Startling Results Obtained From Working the Formerly Useless Substance.

The secret of the production of color is not yet revealed. The unrivaled hues of the tulip and the rose are formed from the black soil. But how? None can say. Yet one is no less startled by the endless variety of color now produced from coal tar. From that apparently useless substance perfumes, medicines and sweeteners have been formed which have startled men. But color appeals to the eye.

Only thirty-six years ago, says Longman's Magazine, Perkin "gathered up the fragments" in coal tar and produced the beautiful mauve dye. Now, from the greasy material which was considered useless is produced madder, which makes coal tar worth £100 a ton. This coloring matter alone now employs an industry of £2,000,000 per annum. One ton of good canal coal, when distilled in gas retorts, leaves twelve gallons of coal tar, from which are produced a pound of benzine, a pound of toluene, a pound and a half of phenol, six pounds of naphthalene, a small quantity of xylene and half a pound of anthracene for dyeing purposes.

According to Roscoe, there are sixteen distinct yellow colors, twelve orange, thirty red, fifteen blue, seven green and nine violet, besides a number of browns, and an infinite number of blendings of all shades. What a marvelous color-producer is coal tar.

Dr. S. F. Scott, Blue Ridge, Harrison Co., Mo., says: "For whooping cough Chamberlain's Cough Remedy is excellent." By using it freely the disease is deprived of all dangerous consequences. There is no danger in giving the Remedy to babies, as it contains nothing injurious. 50 cent bottles for sale by Blakeley & Houghton, druggists.

A Long Pursuit.

Balzac or Gaboriau never wrote a more thrilling story of long pursuit and successful revenge than comes by the China steamer in accounts of the assassination in Shanghai of Kim Ok Kim, the Korean refugee. It occurred in a foreign hotel in the European settlement, and the assassin, Hung, was arrested and held for trial. Hung camped on Kim's trail for six years in the hope of getting him outside of Japan. While in the pay of the Korean court he cultivated the acquaintance of Kim, who had lived at Tokio for several years under a Japanese name. Hung induced a Korean exile, who owed Kim a large sum of money, to write offering to pay the old account with interest if Kim would come to Shanghai. The trial will probably show that the Korean court promised the assassin a big reward for removing a dangerous conspirator whom the Japanese government had saved from their vengeance for ten years. Kim was the ablest Korean who has come to the front since the hermit kingdom was opened to foreigners. He spoke Japanese, Chinese, French and German fluently.

The world's production of olive oil for 1893 has been given at 103,000,000 gallons, of which Italy produced 70,000,000, worth \$130,000,000. Importations in the United States in 1892 were 706,486 gallons, at a cost of \$875,613. The same year California is put down as having produced 12,000,000 gallons.—Bradstreet's.

Stockholders Meeting.

Notice is hereby given that there will be a meeting of the stockholders of the Wasco Independent Academy, at the academy building, in Dalles City on Thursday, May 10th, 1894, at 2 o'clock p. m. for the purpose of electing seven directors, and transacting such other business as may properly come before said meeting. By order of the president. tm10th H. H. RIDDELL, Secy.

Castoria

For Infants and Children.

Castoria promotes Digestion, and overcomes Flatulency, Constipation, Sour Stomach, Diarrhoea, and Feverishness. Thus the child is rendered healthy and its sleep natural. Castoria contains no Morphine or other narcotic property.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ASCHER, M. D., 111 South Oxford St., Brooklyn, N. Y.

"For several years I have recommended your 'Castoria,' and shall always continue to do so, as it has invariably produced beneficial results." EDWIN F. PARDEE, M. D., 125th Street and 7th Ave., New York City.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

THE CENTAUR COMPANY, 77 Murray Street, N. Y.

PATENTS

Patents, Caveats, and Trade-Marks obtained, and all Patent business conducted for MODERATE FEES. Our Office is opposite U. S. Patent Office, and we can secure patent in less time than those remote from Washington. Send model, drawing or photo, with description. We advise, if patentable or not, free of charge. Our fees not due till patent is secured. A PAMPHLET, "How to Obtain Patents," with cost of same in the U. S. and foreign countries sent free. Address:

C. A. SNOW & CO. OFF. PATENT OFFICE, WASHINGTON, D. C.

HIGH RATES of INTEREST

Usually mean risk of Principal; but here is an exception where both are secure. Purchase your

Clothing, Boots and Shoes, Etc., at

M. HONYWILL'S CLOSING OUTSALE,

And you will effect a saving equal to two years' high rate of interest on the money you expend.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder
