

It covers a good deal of ground—Dr. Pierce's Golden Medical Discovery. And when you hear that it cures so many diseases, perhaps you think "it's too good to be true." But it's only reasonable. As a blood-cleanser, flesh-builder, and strength-restorer, nothing like the "Discovery" is known to medical science. The diseases that it cures come from a torpid liver, or from impure blood. For everything of this nature, it is the only guaranteed remedy. In Dyspepsia, Biliousness; all Bronchial, Throat and Lung affections; every form of Scrofula, even Consumption (or Lung-scorfula) in its earlier stages, and in the most stubborn, Skin and Scalp Diseases—if it ever fails to benefit or cure, you have your money back.

The worst cases of Chronic Catarrh in the Head, yield to Dr. Sage's Catarrh Remedy. So certain is it that its makers offer \$500 reward for an incurable case.

Kenneth Bazemore had the good fortune to receive a small bottle of Chamberlain's Colic, Cholera, and Diarrhoea Remedy when three members of his family were sick with dysentery. This small bottle cured them all and he had some left which he gave to Geo. W. Baker, a prominent merchant of the place, Lewiston, N. C., and it cured him of the same complaint. When troubled with dysentery, diarrhoea, colic or cholera morbus, give this remedy a trial and you will be more than pleased with the result. The praise that naturally follows its introduction and use has made it very popular. 25 and 50 cent bottles for sale by Blakely & Houghton, druggists.

Blind stealing or abduction is punishable by heavy penalties in all the states.

During the last twenty years in England there were 4,872,000 marriages and 6,587 divorces.

Deafness Cannot be Cured

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & Co., Toledo, O.
Sold by Druggists, 75c.

Is this world truth can wait. She is used to it.—Douglas Jerrold.

ADDRESS makes opportunities; the want of it gives them.—Bovee.

"I know an old soldier who had chronic diarrhoea of long standing to have been permanently cured by taking Chamberlain's Colic, Cholera and Diarrhoea Remedy," says Edward Shumpik, a prominent druggist of Minneapolis, Minn. "I have sold the remedy in this city for seven years and consider it superior to any other medicine now on the market for bowel complaints." 25 and 50 cent bottles of this remedy for sale by Blakely & Houghton druggists.

Who doubts it? Underground watering will soon win the day.

SOME of our best edible fungi are found among the Boletus family.

My boy was taken with a disease resembling bloody flux. The first thing I thought of was Chamberlain's Colic, Cholera and Diarrhoea Remedy. Two doses of it settled the matter and cured him sound and well. I heartily recommend this remedy to all persons suffering from a like complaint. I will answer any inquiries regarding it when stamp is inclosed. I refer to any county official as to my reliability. Wm. Roach, J. P., Primroy, Campbell Co., Tenn. For sale by Blakely & Houghton druggist.

Lost! Five Dollars Reward.

Strayed from my west pasture, one iron-grey horse, branded (half circle) on left shoulder and two S's crossed on right shoulder; rather thin cinch sore on left ribs; foretop roached back to the place for halter. Probably went towards Tygh Ridge. Will give \$5 reward for his return to me at my ranch, or a liberal reward for any information leading to his recovery.

A. S. ROBERTS, Prospect Ranch.

Get Your Money.

All county warrants registered prior to August 1, 1890, will be paid on presentation at my office. Interest ceases after July 12th. Wm. MICHELL, County Treasurer.

DANGEROUS DUST.

That Which Is Created in Factories by Modern Machinery.

Terrible Explosions Sometimes Result from the Accumulation of Flying Fibers of Wood and Cotton-Head in Powdered Metals.

Each development of manufacturing processes appears to augment the fire hazard, not merely by reason of the dangers incident to the increased speed of operation, says the New York Journal of Commerce, and also to the concentration due to the greater units of larger buildings, but more especially to the greater amount of dust thrown off by the more rapid manipulation of the stock in the new methods of manufacture. The comparison of the readiness of ignition of the shavings to that of the log holds good in all combustible material, namely, the finer the subdivision the greater the facility of ignition and the greater the rapidity of combustion. The severe accidents occurring in those lines of special manufacturing using powdered wood and pulverized cork, so that these substances can be classed as explosives under such conditions, illustrate the occurrences resulting from such changed conditions. It would be trite to make any references to the explosives of grain dust in flouring mills or of hop dust in connection with the manufacture of malt, but there are continually occurring instances of the explosion of materials not ordinarily included in the list of explosives and which are made so solely on account of rapid combustibility entirely due to subdivision.

An explosion occurred recently in that portion of a print works where the cloth was received into the establishment "in the gray" directly from the mills without any treatment, and was being wound into large rolls preparatory to the processes carried on in that establishment. The short, fine cotton fibers were shaken out of the cloth as dust by the rapid winding to such an extent that it became necessary to put a ventilating hood over the machine. An electric spark at the belt ignited some of the dust, and it produced an explosion which blew off the roof and wrecked the contents of the building with such violence as to seriously injure five men at work in the room.

With the old method of opening and picking cotton by which it was blown into a "grazeroom," there were numerous instances of explosions occurring in connection with such fires, but that class of accidents has been very much reduced by the present method of lapper pickers, which wind the cotton into a relatively compact cylinder. The explosion of cotton fibers in napping-rooms are still of frequent occurrence. Within recent years a fire starting in the cardroom of a cotton mill produced an explosion which was exceedingly violent, and spread the flames to an extent beyond the scope of the fire apparatus and compassed the destruction of the mill. The explosion from dust in the various forms of continuous driers used in textile mills have been such as to require the utmost precautions by way of construction and continuous cleanliness in order to secure conditions of safety. When the facing dust accumulating on the trusses of a foundry was being washed from the beams by a stream from fire hose, when the works were shut down during an enforced vacation, such as has occurred during recent times, the dust filled the building and was ignited by the fire at the portable forge, where repairs were under way.

But such fires are not by any means confined to the dust of ordinarily recognized combustible materials. Fires have been known to occur in the dust of iron thrown out from the tumbling barrels used for polishing tacks by their attrition on each other. One form of the well-known parlor fire-works, which produces such a bright fulguration, is merely the combustion of finely divided steel, whose temperature of ignition is so low that the hand can be held, not only with impunity, but also without any sensation of heat, directly in the scintillation of the fireworks. The finely powdered zinc, known as "zinc auxiliary," which is used in connection with the rejuvenation of the indigo dye vats in the coloring of cotton, is so rapidly oxidized by a small amount of moisture that fires produced in that manner are of frequent occurrence, and the danger is so well known that many lines of water transportation refuse to take this material under any condition whatsoever.

Insurmountable Difficulty.

It is pleasant to see men jealous for the purity of their mother tongue, but one may easily carry even so commendable a feeling as that to a laughable extreme. Frederic Hill relates in his autobiography that he and his brothers were once interested in obtaining some medical appointment for a friend. A letter, or circular, had to be drawn up, and to be perfectly sure of having it in the best form the young men sought the good offices of a certain Dr. Blair, who was their friend and neighbor, and a very exact scholar. He undertook the work with great goodnature, but day after day the boys found the document "not quite ready." Time was precious, and finally the doctor was obliged to confess that he had run against a difficulty. In one sentence he was absolutely unable to decide whether he ought to use the word "which" or the word "that." And there he stuck, till the boys in desperation took the work out of his hands.

New Uses for Porcelain.

China is more and more adopted for all sorts of new uses. One sees now china-backed combs and brushes and china-handled button-books and glove buttoners, all to accompany china puff and jewel boxes and the little trays that already adorn my lady's dressing table. Beside these there are china-framed mirrors and, of course, candlesticks as well as picture frames; one may even have a china bracket on which to set some of the bric-a-brac.

TATTOOED ROYALTY.

That Sort of Adornment Favored by Princes, and Now and Then by a Princess.

Grand Duke Alexis of Russia, brother of Alexander III., enjoys the distinction of being the most magnificently and elaborately tattooed prince of the blood in Europe. His powerful right arm is adorned with a superb dragon, which covers it almost entirely from halfway between the wrist and the elbow to the shoulder. It was done in Japan, at Nagasaki, where the grand duke spent some time serving as lieutenant on board the flagship of the Muscovite squadron in China waters. Alexis is by no means the only member of the reigning family who is thus indelibly marked. Princess Waldermar of Denmark, wife of the sailor son of King Christian, has a beautiful anchor and a crown tattooed on her arm halfway between her shoulder and her elbow, which of course is conspicuous when she wears a low dress. Her husband, likewise, has naval emblems tattooed on his arm, and so, too, has King Oscar of Sweden, who served for many years in the navy before ascending the throne. His sons followed his example.

Queen Victoria's second son, the new duke of Saxe-Coburg-Gotha, is tattooed much in the same way as his brother-in-law, the Grand Duke Alexis, while his nephew, the duke of York and future king of England, has a couple of crossed flags upon his forearm. The tattooing was done during his cruise as a midshipman and led to no end of rumpus, for some busybody either wrote or scribbled home from Australia that Prince George and his elder brother, the late duke of Clarence, had had the "straight arrow"—the mark used to denote government property—worked with the needles upon their royal noses. The idea of a sovereign having his most conspicuous feature adorned with an emblem which figures upon the garments of every convict and penitentiary inmate was one that struck terror into the hearts of the worthy people of England. Questions were addressed to the government in the house of commons by members who were forced to take the step by their constituents, and so widespread and serious was the popular indignation over the affair that the London newspapers received an official communication, which each published in large type on the editorial page, assuring the people that, after due investigation, it had been ascertained that the noses of both the prince of Wales' sons were absolutely free from any such disfigurement as that which had been reported.

King George, of Greece, his second son, and his nephew, the czarowitz, are each of them tattooed, it having been done in both the latter cases in Japan. Besides these there are among the tattooed princes Queen Marguerite of Italy's brother, the duke of Genoa; Archduke Stephen, of Austria, and Prince Henry of Prussia, brother of Emperor William.

FISHING WITH A SUNKEN FLY.

The Only Way Black Bass Can Be Taken in the Saginaw River.

"You might not think it worthy of your skill as a fly fisherman," recently said one who is an expert in the art himself, "and ordinarily it wouldn't be, as it seems a trifle vulgar in style, but if you ever come to fishing for black bass in a certain kind of water you will find that you must sink your fly or go without any fish. For instance, there isn't a better black bass fishing water on the continent than Saginaw river, Michigan, or anywhere the bass are bigger or more gamey. But the water is deep and very much discolored by the bark on the logs of the endless processions of pine rafts that go up and down that stream. Whitefish in the Saginaw river would be whitefish only in name, for they would take on the hue of the hemlock-bordered creeks of Pennsylvania, are so dark in color that, compared with their brothers of the open-woods streams, they are like a mulatto compared with a white man.

"There is only one way of fly fishing that black bass can be taken in Saginaw river, and that is the seemingly unorthodox way I am speaking of. You must have large and rather gaudy flies. Three inches above the dropper put a No. 2 split shot on your leader to sink your flies. They must be sunk almost as deep in the water as if you were fishing with bait. Trail them toward the surface smartly, and when one of these big bass strikes a fly, which will be so often that you will be astonished, if you don't say that you never had sport before fly fishing for bass, then you are a dilettante sort of a fisherman, and no mistake.

"A person who thinks he isn't doing right by himself if he fishes for black bass any other way than with the fly ought to know there is fly fishing. I never knew of but two kinds before I tried the Michigan method, and I have used this third one with great pleasure and profit in many eastern waters where the conditions were similar to those in the Saginaw, and where no one had ever succeeded in taking any bass to speak of by the regulation methods. I had rather make a nice catch by sinking my flies, even at the expense of being looked upon as a coarse fisherman, than to dawdle all day on the surface and never get a rise."

Testing the Hearing.

The ordinary tests employed by aurists for determining the power of hearing of their patients are in most cases sufficient for all practical purposes; but in some instances indications of great delicacy are absolutely necessary. For this purpose a "sonometer" has been invented by T. P. Hawksley. The instrument consists of two primary coils of unequal winding, a secondary coil, two dry cells, or a thermopile supply current, and an adjustable rheotome. The secondary coil is connected to a telephone, and the relative and comparative perception of hearing of the patient can be determined with the greatest accuracy.

"The Regulator Line"

The Dalles, Portland and Astoria Navigation Co.

THROUGH Freight and Passenger Line

Through Daily Trips (Sundays excepted) between The Dalles and Portland. Steamer Regulator leaves The Dalles at 7 a. m., connecting at the Cascade Locks with Steamer Dalles City. Steamer Dalles City leaves Portland (Yamhill st. dock) at 6 a. m., connecting with Steamer Regulator for The Dalles.

PASSENGER RATES.
One way \$2.00
Round trip 3.00

Freight Rates Greatly Reduced.

All freight, except car lots, will be brought through, without delay at Cascades.

Shipments for Portland received at any time day or night. Shipments for way landings must be delivered before 5 p. m. Live stock shipments solicited. Call on or address,

W. C. ALLAWAY, General Agent.

THE-DALLES, OREGON

J. F. FORD, Evangelist.

Of Des Moines, Iowa, writes under date of March 23, 1893:

S. B. Mkn. Mfg. Co., Dufur, Oreg.

Gentlemen:

On arriving home last week, I found all well and anxiously awaiting. Our little girl, eight and one-half years old, who had wasted away to 35 pounds, is now well, strong and vigorous, and well fleshed up. S. B. Cough Cure has done its work well. Both of the children like it. Your S. B. Cough Cure has cured and kept away all hoarseness from me. So give it to every one, with greetings for all. Wishing you prosperity, we are yours, Mr. & Mrs. J. F. Ford.

If you wish to feel fresh and cheerful, and ready for the Spring's work, cleanse your system with the Headache and Liver Cure, by taking two or three doses each week.
Sold under a positive guarantee.
50 cents per bottle by all druggists.

SHERIFF'S SALE.

Notice is hereby given that under and by virtue of an execution, issued out of the Circuit Court of the State of Oregon for Wasco County, on the 21st day of July, 1894, upon a decree given and rendered in said court on the 7th day of July, 1894, in a cause wherein W. E. Bolton was plaintiff and Emily B. Rinehart and Phillip Rinehart, minors, by their guardian ad litem, W. H. Hobson, were defendants, and to me directed and delivered, and commanding me to satisfy the sum of \$2180.00, with interest thereon at the rate of 8 per cent per annum from said 7th day of July, 1894, and \$20.00 attorney's fees and \$26.15 costs of suit and accruing costs, by selling, in the manner provided by law for the sale of real property, all of the right, title and interest of said defendants, Emily B. Rinehart, Sayre Rinehart, Earle Rinehart, Carl Rinehart and Phillip Rinehart in and to lots "G," "H" and "I" in Dufur's Grand View Addition to Dalles City, in Wasco County, State of Oregon, according to the official plat thereof as the same appears of record within and for said County and State; I will on Thursday, August 23d, 1894, at the hour of 10 o'clock a. m., at the court house door in Dalles City, in said County and State, sell at public auction to the highest bidder for cash in hand, all the right, title and interest of the said defendants in and to the above named and described premises or so much thereof as may be necessary to satisfy the sums above named.

Dalles City, Oregon, July 23d, 1894.

J. J. DRIVER, Sheriff of Wasco County, Oregon.

SHERIFF'S SALE.

Pursuant to the command of a writ of execution issued out of the Circuit Court of the State of Oregon for Wasco County in a suit therein pending wherein L. L. McCartney is plaintiff and John Adams and G. E. Haight are defendants, dated August 2d, 1894, commanding me to sell all the right, title and interest of said defendants and each of them in and to the southeast quarter of section nine, township two south, of range fourteen east, W. M., to satisfy the sum of \$221.70 and interest thereon from June 25th, 1894, at the rate of ten per cent per annum and the further sum of \$90.00 attorney's fees and the sum of \$26.25 costs and disbursements, due to said plaintiff from said defendant John Adams, and to apply the surplus if any in payment of the sum of \$313.55 and interest thereon at the rate of ten per cent per annum, from said June 25th, 1894, and \$40.00 attorney's fee, due from the defendant John Adams to the defendant G. E. Haight; I will, on Saturday, the 8th day of September, 1894, at the hour of 2 o'clock in the afternoon, at the courthouse door in Dalles City, Oregon, sell all of said above described real property at public sale to the highest bidder for cash in hand.

J. J. DRIVER, Sheriff of Wasco County, Or.
