"They say it's electricity," said Pat, as he stopped before the incandescent street light, "but I'll be hanged if I see how it is they make the hairpin burn in the bottle."—Yale Record.

There is no medicine so often needed in every home and so admirably adapted to the purposes for which it is intended, as Chamberlain's Pain Balm. Hardly a week passes but some member of the family has need of it. A toothache or headache may be cured by it. A touch of rheumatism, or neuralgia quieted. The severe pain of a burn or scald promptly relieved and the sore healed in much less time than when medicine has to be sent for. A sprain may be promptly treated before inflammation sets in, which insures a cure in about one-third of the time otherwise required. Cuts and bruises should receive immediate treatment before the parts become swollen, which can only be done when Pain Balm is kept at hand. A sore throat may be cured before it becomes serious. A troublesome corn may be removed by applying it twice a day for a week or two. A lame back may be cured and several days of valuable time saved or a pain in the side or chest relieved without paying a doctor bill. Procure a 50 cent bottle at once and you will never regret it. For sale by Blakeley & Houghton Druggists.

THE BOER LANGUAGE.

It Differs Materially from That of Holland.

The "Afrikaansche Taal" is not the Dutch of modern Holland. In its origin it represents the old Dutch of the country districts in the Netherlands, together with a tendency toward the Flemish dialect. It has incorporated a great deal of English and a little French, says the Fortnightly Review. Above all, its pronunciation is quite different to that of the classic Dutch, and it lends itself much more readily to English tongues and palates. It is almost impossible for a Dutchman of Holland, on arriving in South Africa, to understand the native Dutch dialect.

Words are greatly clipped, and, although the abominable guttural "g" is still retained, the equally fatiguing Dutch pronunciation of "s-ch" is happily changed into a simple "sk." The vowels are pronounced almost as they would be by an Englishman. For instance, "beest" is pronounced like "beast," not like "baste," as it would be in Holland. A Cape Dutchman talks of "De Beers," he does not pronounce it "De Bares," as the real Dutchman would do. Needless to say, the "Afrikaansche Taal" has no literature behind it, and all the best things written in Holland have either made their appearance in Latin, French, or even English, or have rapidly been translated into those languages if intended to be widely read. The adoption, therefore, of the English language throughout South Africa is a necessity forced on that community by commerce, manufactures, mining enterprise, and all dealings with the outer world.

As a matter of fact, a young Boer will learn English as quickly as a raw Scotchman would exchange his harsh dialect for the incisive, clear, quick speech of southern England.

EARLY USE OF OXEN.

They Preceded the Horse in Agricultural Labor.

The help which our bovine servants render us by the power which they exert in traction, as in drawing plows, sleds or wagons, appears to have been first rendered long after their introduction to the ways of man. The first of these uses in which the drawing strength of these animals was made serviceable appears to have been in the work of plowing. In primitive days and with primitive tools, hand delving was a sore task.

The inventive genius who first contrived to overturn the earth by means of the forked limb of a tree, shaped in the semblance of a plow and drawn by oxen, began a great revolution in the art of agriculture. To this unknown genius we may award a place among the benefactors of mankind, quite as distinguished as that which is occupied by the equally unknown inventors of the arts of making fires or of smelting ores. After the experience with the strength of oxen had been won from the work of plowing it was easy to pass to the other grades of their employment where they were made to draw carriages.

Next after the contribution which the kindred of the bulls have made by their strength we must set that which has come from their milk. Although this substance can be obtained in small quantities from several other domesticated animals, the species of the genus Bos alone has yielded it in sufficient quantities greatly to affect the development of man. It is difficult to measure the importance of the addition to the diet, both of savage and civilized people, which milk affords. It is a fact well known to physiologists that in its simple form this substance is a complete food, capable when taken alone of sustaining life and insuring a full development of the body.

WHAT A FLIRT IS.

A Word Which Has a Queer English Derivation.

I remember a long time ago hearing a singular definition of a term very well understood by most of us, given by an old Scotchman, who spoke with a strong accent. "What's a flirt?" said he. "A man who proposes and is refused." How he came to be in such a state of benighted ignorance is more than I can say, but so it was, and I am reminded of the story by seeing in a book that the verb "to flirt" means "to move to and fro with a pert motion, as, to flirt a fan." The fan being used for coquetting, those who coquetted were called "fan flirts." Lady Frances Shelley introduced the word.

While on this subject, says a writer in the New York Journal, I should like to mention, as the result of observation, that flirts are born, not made, and that unless the faculty comes by nature, it is not very much use to try and acquire it, because not only does the effort recall sometimes the attempted gambols of a cow, which only draw attention to the natural heaviness and solemnity of the animal, but it is as likely as not that in putting on a manner and "ways" that are not consonant with one's temperament, one may make hideous mistakes, just as when a very shy person tries to be cool and assured in bearing it happens often that the coolness seems like rudeness, and the assurance like insolence. I don't believe we can really alter our natural selves even externally, any more than we can change our physical appearance much without its being found out. It is the "ass in the lion's skin," after all.

Very Palatable.

The Mexicans have a way of making a kind of hot bread, called tortillas, that is quite appetizing to a hungry man. The cooking utensils used in the making of it are simple in the extreme, consisting merely of a smooth, flat stone about two feet long and a thin plate of iron. On the stone is placed a mass of corn that has been thoroughly soaked in alkali. This is mashed until it becomes a smooth paste. It is then taken up in small handfuls, patted into thin cakes and seasoned with cayenne pepper, after which each cake is wrapped in a leaf of corn and placed on the hot iron plate to bake over a hot fire.

S. B. MED. MFG. CO.,
Dufur, Oregon.

Gentlemen: On arriving home last week, I found all well and anxiously awaiting. Our little girl, eight and one-half years old, who had wasted away to 38 pounds, is now well, strong and vigorous, and well fleshed up. S. B. Cough Cure has done its work well. Both of the children like it. Your S. B. Cough Cure has cured and kept away all hoarseness from me. So give it to every one, with greetings for all. Wishing you prosperity, we are
Yours, Mr. & Mrs. J. F. Ford.

If you wish to feel fresh and cheerful, and ready for the Spring's work, cleanse your system with the Headache and Liver Cure, by taking two or three doses each week.
