Professor (to scholar)—What are you laughing at? Not at me? "Oh, no, sir." "Then what else is there in the room to laugh at?"—Das Buch für Alle.

Clergyman—Do you take this woman to be your wife? Politician (absently)—I authorize the use of my name.—Puck.

A FULL STOMACH ought to cause you no discomfort whatever. If it does, though—if there's any trouble after eating—take Dr. Pierce's Pleasant Pellets. They're a perfect and convenient vest-pocket remedy. One of these tiny, sugar-coated, anti-bilious granules at a dose regulates and corrects the entire system. Sick or Bilious Headaches, Constipation, Indigestion, Bilious Attacks, and all derangements of the liver, stomach, and bowels are prevented, relieved and cured. They're the smallest, easiest to take, cheapest and best. They're guaranteed to give satisfaction, or money is returned.

Which is the best to try, if you have Catarrh—a medicine that claims to have cured others, or a medicine that is backed by money to cure you? The proprietors of Dr. Sage's Catarrh Remedy agree to cure your Catarrh, perfectly and permanently, or they'll pay you \$500 in cash.

Bessie—The idea of your saying that you are only 21! Gussie—You forget mamma told us that it is always better to understate than to exaggerate.—Truth.

There is no medicine so often needed in every home and so admirably adapted to the purposes for which it is intended, as Chamberlain's Pain Balm. Hardly a week passes but some member of the family has need of it. A toothache or headache may be cured by it. A touch of rheumatism, or neuralgia quieted. The severe pain of a burn or scald promptly relieved and the sore healed in much less time than when medicine has to be sent for. A sprain may be promptly treated before inflammation sets in, which insures a cure in about one-third of the time otherwise required. Cuts and bruises should receive immediate treatment before the parts become swollen, which can only be done when Pain Balm is kept at hand. A sore throat may be cured before it becomes serious. A troublesome corn may be removed by applying it twice a day for a week or two. A lame back may be cured and several days of valuable time saved or a pain in the side or chest relieved without paying a doctor bill. Procure a 50 cent bottle at once and you will never regret it. For sale by Blakeley & Houghton Druggists.

Mr. Greathead, the landlord, says he prefers as tenants experienced chess-players, because it is so seldom they move.—Boston Transcript.

It Should Be in Every House
J. B. Wilson, 371 Clay St., Sharpshurg, Pa., says he will not be without Dr. King's New Discovery for consumption, coughs and colds, that it cured his wife who was threatened with pneumonia after an attack of "la grippe," when various other remedies and several physicians had done her no good. Robert Barber, of Cookeport, Pa., claims Dr. King's New Discovery has done him more good than anything he ever used for lung trouble. Nothing like it. Try it. Free trial bottles at Snipes & Kinler's.

HE REFUSED TO DIE.

The Miraculous Resurrection of an Old Man from the Grave.

Jules Carle, of Juneau, is seventy-eight years old, but vigorous and well preserved. Twenty-two years ago he was living in New Westminster, B. C. One morning as he sat in a restaurant awaiting his ordered breakfast he suddenly died—at least there was every physical evidence of death. A competent physician examined him and pronounced him dead—a victim of heart disease. He was laid out for burial and his friends kept the usual vigil over his body.

All the time he was keenly conscious of what went on about him and could realize the fate in store for him, and yet he was as helpless as if he had been really dead. In the afternoon of the next day his friends bore him in sadness to the graveyard. He suffered untold agonies lying in the coffin, with the lid fastened down. He tried in vain to move or make a noise to indicate that he was alive. The trane held him a deathlike prisoner. Finally he could feel himself being lowered into the grave. As the first clod of earth struck the lid of his coffin he began feeling warm blood pulsing from his heart. All at once he could move his hands. He struck the coffin lid and called out for help. The alarmed pallbearers stopped shoveling dirt into the grave. He called again. The majority of those present beat a hasty retreat, alarmed over the fact that the dead had come to life.

One courageous friend unscrewed the lid of the coffin and helped him out. He never felt better in his life, and ran about exercising his benumbed limbs. The people believed they had witnessed a miracle. He returned to town and entered the restaurant, hungry for supper, and when the cook and servants saw him come in wrapped in his shroud they rushed out through windows and doors shaking with fright.

FEARED THE CAMERA.

Naval Students Who Were Disciplined by the Snap-Shot Process.

The "snap-shot" camera has been jeered at and sneered at in many places and at many times, and the "camera fiend" has been execrated for his crimes, but the camera sometimes performs the functions of a disciplinarian with success. A naval officer once found it more efficacious than any article of war and more persuasive than court martials. It was while he had under his tender care Annapolis cadets.

There was one thing that this officer could not teach the youngest men in the naval academy, says the New York Tribune, and this was not to squirm and start and jump and plug their ears with their fingers when the heavy cannon were fired. It was of no use to argue with them; when the guns began to roar they forgot the arguments. Pleadings were in vain and reproofs were useless. It was highly ridiculous and anything but martial to have a lot of young men whose profession it is to make war when war is needed not like schoolgirls when the sea artillery was in noisy operation.

Finally the officer hit upon a plan. He had a camera "trained" upon his gallant cadets without their knowing it, and then he ordered broadside after broadside to be fired. The noise was thunderous, and the actions of the cadets were as usual most undignified and most unwelcome. A few days later some excellent photographs of the "young-men-afraid-of-a-noise" were hung in prominent positions to be a perpetual reproach to those who plugged their ears. Those photographs did their work well. The next time the cannon roared the cadets stood like statues carved from stone, petrified with their fear of the "deadly camera" and its brutal frankness.

HE TALKED TO THE MAID.

The Offense for Which the Mistress Cuttingly Snubbed a Caller.

A man of the world was wont to call, not infrequently, upon a young widow, says the Illustrated American. One day the pretty maid at the door announced that her mistress was out of town. On some pretext, however, the man entered. He also talked to the maid. Some days later, knowing that the lady had returned, he called again. He was a bit surprised when a strange maid met him at the door and showed him to the little reception-room. When she carried his card up the stairs he reflected that she was not so dainty as her predecessor, and she was not so pretty, though her uniform was similar and her cap was as stiff and her apron as spotless. He was realizing how much more the woman is to the dress than the dress is to the woman, when the maid returned and announced promptly: "Mrs. — is not receiving." The man of the world bit his lip—it was the first time he had ever been denied admittance—and moved toward the door. The maid held it open for him, and as he passed through it she blurted out: "And she says, if you please sir, the maids receive in the kitchen, sir."

Charitable Birds.

There is a strong feeling of pity among birds, and sometimes they are as charitable as men. A pair of robins had their nest in a fence near a house, while a pair of catbirds had built theirs in a bush close by. The two pairs hatched out their young at the same time, and for awhile everything went along smoothly. Then it was noticed that the robins disappeared entirely, and the conclusion was that they had been killed. The young robins, dependent on their parents for food, appeared to be starving, and when the catbirds came with a worm or bit of food for their young the robins would thrust up their heads and make a great noise. Presently it was observed that the catbirds were feeding the hungry orphans, and every night, while one of the catbirds covered its own young, its mate performed the same service for the little robins. In this way both broods were reared, the robins growing up as strong and lively as though they had been cared for by their own parents.

MARINE CURRENTS.

New Instruments Showing How They Regulate and Are Maintained.

The marine globe, an "apparatus to produce currents similar to sea currents," consists of a glass globe, under the interior wall of which are constructed the massive outline of continents and the hollows of sea basins. The bottom of the sea consists of an interior sphere, concentric with the one of glass, moving on a vertical axis and worked by a gearing. The sea basins are filled with water, containing particles of stearine in suspension, which render all its movements visible. The exterior of the apparatus does not differ much from that of a geographical globe.

When the movable globe turns upon itself, says the Cosmopolitan, the water is seen to start. From both extra-tropical regions it advances, along the sea bottom, toward the equator; there the two currents, from the north and from the south, meet, and together rise to the plane of the great circle, reaching the surface in a stream that occupies the equatorial belt of the oceans, the waters pour southward and northward of their line of emergence; then, almost immediately, borne forward the west, they produce in their course all the secondary currents which are formed by the outlines of the shores and the shapes of the sea bottoms.

Through the transparent glass one can follow the movements of the liquid mass and get a better idea of sea currents than from the finest map. For the best specimens of hydrography seem only dead-letter compared with these real, moving currents, emerging, advancing on the surface, then disappearing in the depths of these miniature oceans, the capacity of which is scarcely more than a few glasses of water.

This apparatus is both a useful plaything for children and an object of serious thought for students. Every young geographer in our primary schools would delight to follow with his eyes, on this little artificial world, the marvelous evolutions of the water of the oceans; every earnest investigator into the phenomena of nature would be surprised at the facts revealed by this simple instrument, and would perhaps be disposed to question the value of certain notions on the physics of the globe, which till now he has held without questioning.

The marine globe would facilitate the teaching of geography, so far as the sea currents are concerned, and the modifications these effect in climate, regardless of latitude; it may also aid navigation, and furnish hydrography with valuable data for the coordinating and completing of the experimental study of marine currents, their origin, their mutual relations, their temperature, their fauna, etc. Finally, it seems to me, it may promote the science of physics, because it is, as concerns the liquid element, the material demonstration of this hypothesis which led to its construction: "The liquid element enveloping the solid nucleus of the terrestrial globe, being set in motion by diurnal rotation, receives from this an impulse, which, modified by the outlines of continents, produces, in nearly all their details, the currents of the sea."

ACTORS SWEAR BY HIM.

A San Francisco Angel Whose Pocket-book Is Open to the Needy Theatrical.

If you want to hear the name of any man mentioned with enthusiasm and reverence go among the actors congregated on upper Broadway, New York, some afternoon, says a writer in the Pittsburgh Dispatch. Grant? Oh, no. Cleveland? Not much. Anybody you ever heard of before? Never a bit. It's John Rademaker. And who on earth is John Rademaker? you will wonder. Just ask the first actor you meet.

"Why, of course I know John Rademaker! He lives in 'Frisco, and is the best man who ever drew breath!"

But who is he and what does he do and what has he done? That is what you naturally want to know. Then you'll find out from two or three men at the same time that John Rademaker keeps a big saloon in San Francisco and is an "angel." When an actor from the east gets stranded in San Francisco, or indeed anywhere on the Pacific coast, he goes straight to John Rademaker. It appears that John Rademaker has an elastic and sympathetic auricular appendage that is always wide open to the reputable men in the profession who get stuck on the slippery slope. Those who have never been stranded two thousand miles from home, with an idle summer ahead and no bank account, will not be able to realize what such friendship means. Imagine yourself in London without a friend and without a cent, as some Americans are always to be found there, and you'll know what the sensation is to the actor left in 'Frisco at the close of the season. Then imagine a man like John Rademaker in the strand to whom you go and pour out your tale of woe, and who pulls out his roll and says to you:

"Well, old man, I don't know you; but from what I've heard of you I think you'll make this good when you're in better luck. I'll take my chances on you, anyhow. I'll just stake you for a trip home. Oh, that's all right—I don't want any paper—if you're not square your paper's no good. Now, what'll you have to drink?"

Couldn't Fool King Milan.

King Milan of Serbia once went to the hotel of a distinguished lady who was giving a bazaar for the benefit of the poor children of Paris. As soon as the king appeared upon the scene she advanced toward him with a splendid silver salver in her hand on which was beautifully emblazoned the family arms. On it lay a pretty little bunch of violets. "How much, madame?" asked the king. "Twenty-four loise, sire," was her soft response. Milan paid her the sum she had asked, with a courteous bow, took the salver from her hands, placed the bouquet in his buttonhole and walked off with the tray under his arm.

Mexican Mustang Liniment

for
Burns,
Caked & Inflamed Udders.
Piles,
Rheumatic Pains,
Bruises and Strains,
Running Sores,
Inflammations,
Stiff joints,
Harness & Saddle Sores,
Sciatica,
Lumbago,
Scalds,
Blisters,

Membrane and Tissue
Quickly to the Very
Seat of Pain and
Ousts it in a Jiffy.
Rub in Vigorously.

Mustang Liniment conquers
Pain.
Makes Man or Beast well
again.

Strayed.

From the fair grounds, one black mare, white hind foot, small white spot in forehead, and one light sorrel horse, white hind foot, small white strip in face and saddle marked, both branded A on left stifle. Horse also branded A on the right hind leg. A liberal reward will be paid for information which will lead to their recovery, by the undersigned.
A. S. MACALLISTER.

Notice.

All city warrants registered prior to January 2, 1892, are now due and payable at my office. Interest ceases after this date.
I. I. BURGET, City Treas.
Dated Dalles City, Aug. 1, 1894.

Another Call.

All county warrants registered prior to January 1, 1891, will be paid on presentation at my office. Interest ceases after Sept. 10th.
WM. MICHELL,
County Treasurer.

He—You saw some old ruins while in England, I presume? She—Yes, indeed! And one of them wanted to marry me.—Brooklyn Life.

Pat on Your Glasses and Look at This.
From \$100 to \$2,000 to loan. Apply to
GEO. W. BLAND,
113 Third St. The Dalles, Or.

PATENTS
CAVEATS, TRADE MARKS, COPYRIGHTS.
CAN I OBTAIN A PATENT? For a prompt answer and an honest opinion, write to MUNN & CO., who have had nearly fifty years' experience in the patent business. Communications strictly confidential. A Handbook of Information concerning Patents and how to obtain them sent free. Also a catalogue of mechanical and scientific books sent free.
Patents taken through Munn & Co. receive special notice in the Scientific American, and thus are brought widely before the public without cost to the inventor. Patents are not free, issued weekly, elegantly illustrated, has by far the largest circulation of any scientific work in the world. \$2 a year. Sample copies sent free.
Building Edition, monthly, \$1.50 a year. Single copies, 25 cents. Every number contains beautiful plates, in colors, and photographs of new inventions, with plans and blueprints to show the latest designs and secure contracts.

PATENTS
Caveats, and Trade-Marks obtained, and all Patent business conducted for MODERATE FEES.
Our Office is Opposite U. S. PATENT OFFICE, and we secure patent in less time than those remote from Washington.
Send model, drawing or photo, with description. We advise, if patentable or not, free of charge. Our fee not due till patent is secured.
A PAMPHLET, "How to Obtain Patents," with cost of suits in the U. S. and foreign countries sent free. Address,
C. A. SNOW & CO.
Opp. Patent Office, WASHINGTON, D. C.

Ad. Keller is now located at W. H. Butts' old stand, and will be glad to wait upon his many friends.

PROFESSIONAL.

General Agent,
THE DALLES, OREGON

J. F. FORD, Evangelist,
Of Des Moines, Iowa, writes under date of March 23, 1893:

S. B. MED. MFG. CO.,
Dufur, Oregon.

Gentlemen:—On arriving home last week, I found all well and anxiously awaiting. Our little girl, eight and one-half years old, is now well, strong and vigorous, and well fleshed up. S. B. Cough Cure has done its work well. Both of the children like it. Your S. B. Cough Cure has cured and kept away all hoarseness from me. So give it to every one, with greetings for all. Wishing you prosperity, we are,
Yours, M. & Mrs. J. F. FORD.
If you wish to feel fresh and cheerful, and ready for the Spring's work, cleanse your system with the Headache and Liver Cure, by taking two or three doses each week.
Sold under a positive guarantee.
50 cents per bottle by all druggists.
