THE DALLES, OREGON, MONDAY, NOVEMBER 12, 1894.

NO. 274

## MORE OF THE ELECTION

### A Gain of Two Democratic Representatives.

### WHOLESALE FRAUDS IN LOUISIANA

There is Still a Chance for Estee in California, and Evans is Elected in Tennessee.

NEW YORK, Nov. 10.—The election of Hall, democrat, in the second Missouri congressional district, and of Downing, in the sixteenth Illinois district, give the democrats two more congressmen than they apparently had yesterday. These changes make the status of the parties in the fifty-fourth congress:

Republican, 243; democratic, 102; populist, 11.

### Fraud in Louisiana.

WASHINGTON, Nov. 10.—Chairman Babcock, of the republican congressional campaign committee, today received the following letter from D. E. Ferris, secretary of the republican state committee of Louisiana:

"As I wired you in regard to the election, I desire to say that we have taken such steps as are necessary, and are actively engaged in taking depositions before notaries public on all cases of intimidation, fraud and violence, which occurred election day, and are prepared to present an impregnable case to the fifty-fourth congress as to the seating of our congressmen. Never in the history of the worst days of fraud in Louisiana have they gone so far. The democrats are admitting openly that they overdid the thing, and also openly admit that Meyer, Buck and Pierce will not be seated, but that our congressmen will be.

### Budd Leads, But Delayed Returns May Change the Totals.

SAN FRANCISCO, Nov. 10.—Complete returns from 2,084 precincts in a total of 2,274 precincts in California give: Estee, 106,000; Budd, 106,766; Budd's plurality, 757.

The San Francisco vote, as collected by the local newspapers bureau, which gave Budd a plurality of 11,229, is included in these figures. Counting Budd's plurality in this city 11,703, as claimed by the democratic state central committee, his net plurality in the state at large is 1,234, with 190 precincts to hear from. When asked about the talk of possibility of a contested election, with the decision left to a committee of the legislature, Chairman Gould, of the democratic committee, said he had not heard of any such proposal, adding:

"I do not think that the republican managers would dare to attempt to defeat the popular will by any such scheme."

Dispatches received at democratic headquarters today gave Estee's plurality in Humboldt county as 600, instead of 600, previously reported, and Sonoma county as 383, instead of 483.

### Downing Defeated Rinaker.

CHICAGO, Nov. 10.—Contrary to his own expectations the congressman-elect of the 16th Illinois district is Finis E. Downing, dem. The election of General Rinaker, rep., was claimed Thursday by his friends on the strength of Downing's concession that he had lost Calhoun by 26 plurality. The official count shows Rinaker failed of election by 51 votes.

### Kem Has Been Re-Elected.

OMAHA, Nov. 10.—O. M. Kem, fusion, is elected to congress in the sixth district over Daugherty, republican, by 1000 plurality, which has just been developed. Daugherty will contest. This is the only break in the republican congressional delegation.

### Kentucky's Delegation.

LEXINGTON, Ky., Nov. 10.—The official count in the tenth district shows that Joseph M. Kendall, democrat, is elected congress by 104 plurality over N. T. Hopkins, republican. This makes Kentucky's delegation 6 democrats and 5 republicans.

### Republican From New Mexico.

SANTA FE, N. M., Nov. 10.—At democratic headquarters the election of Calderon, rep., as delegate to congress was conceded. His majority will be about 2000.

### Another Bond Issue.

WASHINGTON, Nov. 10.—There are strong indications that another issue of bonds will be made during the coming week. For some time past the conviction has been growing upon the president that an issue of another \$50,000,000 would seem to be necessary, and on his return from Buzzard's Bay he expressed to the members of his cabinet his belief that the issue could not long be delayed, and that the sooner it was made the better. He saw the treasury receipts constantly growing less, with no immediate prospect of any favorable change. Secretary Carlisle, it is understood, took a more cheerful view. He argued that the receipts from internal revenue and customs must of a necessity soon show a marked increase; that the supply of whisky, which was withdrawn from bond just previous to the passage of the new tariff act, to avoid the payment of the additional 20 cents per gallon, would very soon be exhausted, and that the demands of trade would result in largely-increased revenues from this source. He held that what was true of the internal revenue was equally true of the customs. Just before the tariff act went into operation the withdrawal from bond of goods of every description was abnormally large. This supply, he said, had been exhausted, or nearly so, and it was the confident expectation of the secretary that the present revival of trade would soon remove any necessity for further issue of bonds. Up to this time there had been no signs of any important withdrawals of gold for export, and it was his opinion that the emergency might be passed successfully without increasing the public debt. He argued, too, that his experience in placing the last issue had taught him that the issue of another \$50,000,000 might fall far short of recouping the gold reserve by that amount. The secretary maintained that it was an easy matter to deposit legal tenders at the subtreasuries and demand gold with which to pay for the bonds. This evasion of the spirit of law authorizing the issue of the bonds was several times detected during the settlements of the last issue, and he feared it might be practiced again. The president, however, thought that all things considered, he preferred not to wait until congress assembled in December, when measures might be taken to obstruct the issue. In his opinion the situation demanded the issue, and there should be no unnecessary delay in the matter.

### At the request of the president, Secretary Carlisle joined him at Woodley this afternoon, and at a late hour had not returned to the city. Persons in a position to know believe that the issue will be officially announced before the close of the coming week.

### Now Looks Like the Populist.

DENVER, Nov. 10.—The latest returns from the second congressional district today show that Bell is elected to congress without doubt. He has a plurality over Bowen of 3000.

### \$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature to do its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of Testimonials. Address: F. J. CHENEY & Co., Toledo, O. Sold by Druggists, 75c.

### One Republican From Texas.

GALVESTON, Nov. 10.—The congressional situation tonight stands 12 democrats and 1 republican.

For the many accidents that occur about the farm or household, such as burns, scalds, bruises, cuts, ragged wounds, bites of animals, mosquitoes or other insects, galls or chafed spots, frost bites, aches or pains in any part of the body, or the ailments resulting from exposure, as neuralgia, rheumatism, etc. Dr. J. H. McLean's Volcanic

THE CHRONICLE prints the news.

### THE INDISPENSABLE NAPKIN.

It Was First Used Only by Children and Scarcely by Elders.

Curiously enough that article now considered almost indispensable, the table napkin, was first used only by children, says the Youth's Companion, and was only adopted by elder members of the family about the middle of the fifteenth century. In etiquette-books of an earlier date than this, among other sage pieces of advice for children, are instructions about wiping their fingers and lips with their napkins.

It seems that the tablecloth was long enough to reach the floor and served the grown people in place of napkins. When they did begin to use napkins they placed them first on the shoulder, then on the left arm, and finally tied them about the neck. A French writer, who evidently was conservative and did not welcome the napkin kindly, records, with scorn: "The napkin is placed under the chin and fastened in the back, as if one were going to be shaved. A person told me that he wore his hat that way that he might not soil his beautiful frills."

It was a difficult matter to tie the two corners in the back, and it is said that thence originated our expression for straitened circumstances: "Hard to make both ends meet." This custom led to the habit of the table waiters of carrying a napkin on the left arm.

Napkins became popular in France sooner than in England. At one time it was customary at great French dinners to change the napkins at every course, to perfume them with rose water and to have them folded a different way for each guest.

About 1630 Pierre David published the "Maistre d'Hotel," which teaches how to wait on a table properly and how to fold all kinds of table napkins in all kinds of shapes. The shapes were: "Square, twisted, folded in bands and in the forms of a double and twisted shell, single shell, double melon, single melon, ook, hen and chickens, two chickens, pigeon in a basket, partridge, pheasant, two capons in a pie, hare, two rabbits, sucking pig, dog with a collar, pike, carp, turbot, miter, turkey, tortoise, the holy cross and the Lorraine cross."

### WONDERS OF PHOTOGRAPHY.

Soap Bubbles Photographed in the Act of Bursting.

Electricity has been doing some pretty work in the photographing of drops of water, and Prof. C. V. Boys in a recent lecture gave illustrations of what had been accomplished, says the Detroit Free Press. He first showed photographs taken by the electric spark of soap bubbles in the act of bursting, and explained the process by which it is possible to ascertain the respective speed at which different soap bubbles burst. One photograph showed an issue of liquid from a very small pipe, which to the naked eye appeared to be a perfect stream, but which, on an electric photograph being taken, was resolved into a beautiful and regular series of drops. In connection with this Prof. Boys remarked that the science of liquids and of the forces involved in the phenomena of the surface of liquids was one of the most interesting branches of physical science. The effect on a fountain of playing or singing was to change its appearance into one, two or three apparently separate, clear streams of liquid, but a photograph taken as a tuning fork was struck demonstrated that the water was disposed in drops in perfect regularity. A picture of a rifle bullet, passing through the air at the rate of two thousand feet a second, was also exhibited. Prof. Boys, however, showed that if it were wished to investigate what was really happening when a rifle bullet was being projected through the air at the maximum possible speed, it would be necessary to have recourse to a method of illumination infinitely more rapid than the electric spark. For this purpose a mirror of steel, about the size of a twenty-five cent piece, is now used. It is so mounted as to revolve with ease without getting hot at the enormous speed of one thousand times a second, and the end of the beam of light given off from this mirror passes across the screen at such a rate that it enables photographs to be taken in about one ten-millionth of a second.

### La Grippe.

During the prevalence of the grippe the past seasons it was a noticeable fact that those who depended upon Dr. King's New Discovery, not only had a speedy recovery, but escaped all of the troublesome after effects of the malady. This remedy seems to have a peculiar power in effecting rapid cures not only in cases of la grippe, but in all diseases of throat, chest and lungs, and has cured cases of asthma and hay fever of long standing. Try it and be convinced. It won't disappoint. Free trial bottles at Snipes & Kinerly's drug store.

### Notice.

All city warrants registered prior to January 2, 1892, are now due and payable at my office. Interest ceases after this date. I. I. BERGER, City Treas. Dated Dalles City, Aug. 1, 1894.

### Notice.

To Whom it May Concern: This is to certify that the undersigned has sold out his interest in the store Kwong On Tai. He is now a member of the firm Wing Hong and Dock Hing. SEID WING.
