HOW VIC TREVITT BROKE THE DEADLOCK.

Every old-timer in The Dalles, and nearly every one in the state, knew Vic Trevitt, for he was the kind of a man to make himself known. This trait in his character was illustrated by his selection of a burying ground on Memaloose Island, twelve or fifteen miles below here, where his remains lie, and where his simple monument, placed on the sharp basaltic point, that like the prow of a steamer, fronts the channel, invariably causes the tourist to learn somewhat of him who sleeps there.

When the legislature met that finally elected Mr. Corbett to the senate, Vic was in Salem, and if we remember correctly, was a member of the legislature. Be that as it may, he was there, and when the fight came up between Corbett and Gibbs it soon reached that tiresome stage known as a deadlock. Vic was a shifty fellow, and the matter had no sooner grown wearisome to him than he began to study up some device that would relieve the monotony of the situation.

Mr. Schanno's Rats. Mr. Emil Schanno is firmly convinced that the statement that rats will leave a sinking ship is literally true. He is responsible for the following story: When the high water was reaching after the second story of the buildings on the bluff last summer, his barn was about to float away. He took a turn or two around the barn with a rope and tied the end of it to a tree to keep the barn from floating away.

There is liable to be a hitch in negotiating a treaty with Japan on account of an amendment to the proposed treaty made in the senate. By the treaty as proposed Japan is allowed to fix her own tariffs, but by the senate amendment the United States could cancel the treaty on one year's notice, and insist on fixing the tariff on all imports from this country at 5 per cent ad valorem.

MOTHERS and those about to become mothers, should know that Dr. Pierce's Favorite Prescription robs childbirth of its tortures, terrors and dangers to both mother and child, by aiding Nature in preparing the system for parturition. Thereby "labor" and also the period of confinement are greatly shortened. It also promotes an abundant secretion of nourishment for the child. During pregnancy, it prevents "morning sickness" and those distressing nervous symptoms from which so many suffer.
