AS IN CHRIST'S TIME.

Mr. C. B. L. Totten, the eminent scientist of New Haven, Conn., commenting on the statement that the planets would be in the same relative position they were at the time of the crucifixion of Christ, on Good Friday (yesterday), presents the following: The current lunar year is one of the most important ones upon the circle, from both scientific and popular standpoints.

On the succeeding November 10th occurred the last transit of Mercury that this century shall see. By reversing this transit according to its own cycles, we can establish the astronomical accuracy of the literal week referred to in the first chapter of Genesis. We mean this, whether it be regarded as a week of cycles, or as a literal fact of seven normal days.

Concentrated thought, continued in, robs the stomach of necessary blood, and this is also true of hard physical labor. When a five horse-power engine is made to do ten horse-power work something is going to break.

The grander fact, so entirely lost sight of, so eclipsed by the minor one, which has usurped its place, is that the crucifixion of Jesus Christ really took place upon the Thursday, March 17th, 29 A. D., which was the 14th of Nisan in that particular year.

How strange a commentary is this upon the accuracy of human necrology, that the death of a minor saint, and one whose date is by no means certain, should be assigned to March 17th, while he who actually died thereon, and to whom we owe all of real Christianity, has, by virtue of the arbitrarily shifting Nisan rule of Good Friday, no actual date at all upon his epitaph.

So today is the solar anniversary of the crucifixion, which occurred exactly 1806 Julian years ago. This is a demonstrated fact, which has been fully established by Wm. M. Page in his New Light From the Old Eclipses; by H. Gratton Guinness, in his "Approaching End of the Age," and by perhaps a score of other able scholars, whose reputations are fully established and whose labors as a co-disciple I have merely studied and verified.

As to the actual chronology and necrology of the Savior's life, I am satisfied with the evidence that he was conceived at the spring equinox of 749 A. U. C., was born at the winter solstice of 756 A. U. C., was found asking questions of the doctors at the age of 12 in the spring of 10 A. D., was baptized on January 8, 28 A. D., a fortnight after he was 30 years old (in literal fulfillment of Daniel ix:24, 25): that he had but a short avocation of just sixty-two weeks (434 days) thereafter, or, allowing forty days for the wilderness and a lunar month of rest thereafter, that he had in all but a brief 305-day (solar year) ministry, dating from the first miracle at Cana of Galilee, but only a 354-day (lunar year) ministry,

dating from the immediately succeeding Passover (this in particular fulfillment of the first clause of Daniel ix:26), and that he was crucified dead and buried on Thursday, March 17, 29 A. D., in the 68th year of Tiberius Caesar, in the consulate of the two Longini (as testified Epiphanius). This was in the first year of the CIII Olympiad, or the 781st year of Rome, according to Varro. That he arose on the third day thereafter—on Sunday, March 20, 29 A. D.—and into the vernal equinox, just thirty-two years after his annunciation by Gabriel to Mary. C. B. L. TOTTEN.

THE BUSINESS MAN'S LUNCH.

Hard Work and Indigestion go Hand in Hand.

Concentrated thought, continued in, robs the stomach of necessary blood, and this is also true of hard physical labor. When a five horse-power engine is made to do ten horse-power work something is going to break. Very often the hard-worked man coming from the field or the office will "bolt" his food in a few minutes which will take hours to digest.
