THURSDAY, - - OCTOBER 24, 1895

A Big Job It would be a big job to tell one hundred people every day anything that would interest them in your goods. It's Dead Easy If done the right way. This paper will tell several thousand at once.

THE GREAT CEREAL YIELD.

Some recent estimates of the extent of the corn crop for 1895 make it 200,000,000 or 300,000,000 bushels lower than the majority of the earlier predictions, bringing it down to 2,000,000,000 bushels.

Iowa heads the list in corn production in 1895, with Illinois second, Missouri third, Nebraska fourth, Kansas fifth, and Indiana sixth. The yield of these states is put at 258,890,000 bushels for Iowa, 238,410,000 for Illinois, 229,849,000 for Missouri, 168,920,000 for Nebraska, 167,909,000 for Kansas, and 125,761,000 for Indiana.

But corn is not the only cereal which has broken all records. Oats have done this also. The yield of the latter in 1895 is placed at 825,494,000 bushels. Wheat, too, though far below the highest record, has turned out better than was expected a month or two ago, the Chronicle's computation, based on the department's figures of acreage and condition, being 423,475,000 bushels, against 460,000,000 in 1894, 398,000,000 in 1893, 516,000,000 in 1892, and 612,000,000, the largest record, in 1891.

The newspapers of San Francisco must be among the most paying institutions of the city. The leading journals have just subscribed \$18,500 to a fund for attracting the National Republican Convention to the city by the Golden Gate. The Examiner headed with \$1000 a subscription list for circulation among business men.

EDITORIAL COMMENTS FROM THE NORTHWEST PRESS.

Walla Walla Statesman: Fitzsimmons says that "if necessary he is willing to meet Corbett with lawn mowers." It will not be necessary; typewriters are good enough for all modern pugilistic purposes.

Salem Statesman: There is enough money invested in Marion county and Salem city warrants by our people to build twenty creameries. Get out of debt and stay out, and force this money into places where it will employ labor.

Albany Herald: As fleet-footed time winds up the thread of life, it becomes more apparent that the choice of the next republican presidential convention will not be made without a struggle through several ballots.

Evening Telegram: What has Consuelo Vanderbilt done that the American public should be confronted by her name every time they look at the telegraphic page of a daily newspaper? She is engaged to wed a British title, of course, but is that any reason that the good people of this country should be compelled to study her character so minutely and watch her every movement with such intense interest?

The fire department at the company's shops has just added 250 feet of new hose to its appliances for fighting fire. From Far Away Ceylon.

I have received direct from the Island of Ceylon a large consignment of its justly celebrated teas. The extraordinary success which has attended the growing of the tea plant in Ceylon is phenomenal. Ten or twelve years ago a few planters experimented growing tea, (the coffee crop, for which the island was formerly famous, being entirely destroyed by a blight) with the result that Great Britain alone consumes annually 190,000,000 pounds of these teas which would be a small matter to what would be consumed in our country, when Americans realize the splendid qualities of Ceylon. These teas are prepared by modern machinery and picked by the natives with gloved hands and are incomparable in their strength, purity and flavor.

Economy is also a most important factor in the use of these teas; one pound being equal in strength to two pounds of China, it is only necessary to use half the quantity you would of any other. To make good tea is a very simple matter. Use an earthenware teapot and pour on the water as soon as it boils, allowing five minutes to draw. Water which has been previously boiled should never be used. W. A. JOHNSTON, Up-to-Date Grocerman.

If? If you want to preserve apples, don't cause a break in the skin. The germs of decay thrive rapidly there. So the germs of consumption find good soil for work when the lining of the throat and lungs is bruised, made raw, or injured by colds and coughs. Scott's Emulsion, with hypophosphites, will heal inflamed mucus membranes. The time to take it is before serious damage has been done. A 50-cent bottle is enough for an ordinary cold.
