

NOT A SICK DAY For Over Thirty Years! RESULT OF USING AYER'S PILLS

"Ayer's Cathartic Pills for over thirty years have kept me in good health, never having had a sick day in all that time. Before I was twenty I suffered almost continually—as a result of constipation—from dyspepsia, headaches, neuralgia, or boils and other eruptive diseases. When I became convinced

that nine-tenths of my troubles were caused by constipation, I began the use of Ayer's Pills, with the most satisfactory results, never having a single attack that did not readily yield to this remedy. My wife, who had been an invalid for years, also began to use Ayer's Pills, and her health was quickly restored. With my children I had noticed that nearly all their ailments were preceded by constipation, and I soon had the pleasure of knowing that with children as with parents, Ayer's Pills, if taken in season, avert all danger of sickness."—H. WETSTEIN, BYRON, Ill.

Mr. H. J. Goetzman will show his views, which he is taking East, tonight at the county courthouse. Quite a number of citizens have expressed a desire to see them and Mr. Goetzman has consented to stay over and give the people of The Dalles an opportunity of knowing how the state is to be advertised, as well as a chance to add any views of this city and surrounding country which may help to attract immigration. This opportunity which is presented to advertise our resources, is a good one and it would be wise to take advantage of it. We hope to see a large crowd at the courthouse this evening so that when the people hear how Oregon is being advertised in the East they will know exactly how it is done. As two tanks of gas are required to feed the stereopticon and this kind of gas is not obtained for nothing, a nominal fee of 10 cents will be charged adults. The entertainment will be both interesting and instructive.

Say, why don't you try De Witt's Little Early Risers? These little pills cure headache, indigestion and constipation. They're small, but do the work. It is a truth in medicine that the smallest dose that performs a cure is the best. De Witt's Little Early Risers are the smallest pills, will perform a cure, and are the best.

Telephone Decision.

San Francisco Call, Oct. 23. Two suits were filed in the United States circuit court on the 23d inst. by the Western Electric Company of Chicago, against the Capital Telephone Company of Sacramento, with which corporation Frederick Cox, president of the California Bank of Sacramento, and W. E. Gerber, also of the California bank, are associated as defendants.

One of the suits filed is for the infringements of patents on switchboard apparatus and office machinery, which are held by the Chicago corporation, and the other on the telephones and manner of wiring. The patents held by the regular telephone company and the Western Electric Company cover every conceivable part of the sound transmitter, thereby making it almost impossible for a new concern to successfully operate a telephone circuit.

Now that the Chicago firm has determined that an injunction shall be placed upon the home company, it will probably put a stop to the subscription for stock in the latter organization and may eventually lead to a number of suits against parties who have been using these telephones, as the revised statute under which these suits are being brought strictly states that not only the manufacturer but the seller and user are each personally liable for infringement by using a patented article without the consent of the patentee.

It is alleged that Messrs. Cox and Gerber, not being content with being the instigators of the Capital Company, have organized another telephone company throughout the state, and as several other minor companies are organizing the Western Electric Company feels that it is being imposed upon, and says that it is going to show beyond a doubt that these companies cannot legally exist. Attorney George F. Barton, who represents the Chicago corporation, was in the city a few days ago and some advanced the opinion that if the petition of his client was sustained it would be almost an impossibility for the Sacramento firm to successfully operate a telephone line before the year 1900, as none of the patents held by them will expire before that time.

At least \$60,000 was subscribed by business men of Sacramento to the stock of the new company before it was suspected that the question of patent rights would be raised, and it will be quite a hardship to many if they are forced to discontinue the service. o29d2t.
