

### A SPECIFIC FOR La Grippe, for Colds, Coughs, AND LUNG TROUBLES, AYER'S CHERRY PECTORAL

"Two years ago, I had the grippe, and it left me with a cough which gave me no rest night or day. My family physician prescribed for me, changing the medicine as often as he found the things I had taken were not helping

me, but, in spite of his attendance, I got no better. Finally, my husband,—reading one day of a gentleman who had had the grippe and was cured by taking Ayer's Cherry Pectoral,—procured, for me, a bottle of this medicine, and before I had taken half of it, I was cured. I have used the Pectoral for my children and in my family, whenever we have needed it, and have found it a specific for colds, coughs, and lung troubles."—EATLY WOOD, North St., Elkton, Md.

#### Funeral of J. A Gilliam.

The funeral of the late J. A. Gilliam was held in the Congregational church at Lyle April 1st, and was conducted by Rev. J. H. Wood of The Dalles, an old friend of his boyhood days, and the services were attended by a large congregation of mourning relatives and friends.

Mr. Gilliam had been for years a member of the Methodist church at Lyle, and was one of its most honored members, a devoted Christian and earnest worker in the church and Sunday school, and his loss will be keenly felt in his family and home where he lived. He leaves to mourn his untimely death his mother, Mrs S O Gilliam of 3-Mile, and four sisters and three brothers, as follows: William Gilliam of Berkeley, Calif., Mrs. J. C. Bly of San Francisco, Wassner Gilliam of Baker City, Mrs Anna Hewett of Falda, Wash., S. R. Gilliam, Miss Mattie Gilliam and Mrs O W Cook of 3-Mile.

#### ELECTRICITY KILLS THE TREES.

Wires Attached to the Branches Destroy the Foliage.

In France great care is taken in locating the wires that carry high-tension electric currents, whether used for light or for power, but in America the thing is done more simply. No one bothers himself about what is to be found at the side of the wire, and it passes among the branches of the trees and across thickets, unconscious of the damage that it may do. Now in many towns, says the Cosmos, it has been observed that the trees in the current dwindle and die. It has also been observed that the death of the trees invariably follows the rainy season; the leaves being then soaked with moisture, become good conductors, and lead the current down into the tree from the wire. The wires, to be sure, have been insulated, but the protective layer has been quickly destroyed by the friction of the branches and the line becomes bare, producing thus results that it would have been well to avoid. And the electricity is the only thing that can be accused of this. It suffices, to convince oneself, to compare the condition of the trees traversed by wires with that of neighboring trees. It has often been noticed that in a storm all the trees through which wires pass die in a few hours, while the surrounding ones are not touched. This is a very serious source of complaint, and causes some lawsuits.
