WORK OF INSURGENTS

Attempt to Destroy the Palace at Havana.

DYNAMITE THE EXPLOSIVE USED

A Great Part of the Building Was Thrown Down--Great Excitement Prevails.

HAVANA, April 28.—An explosion of what is believed to be dynamite, or some other high explosive, occurred in the palace of the governor-general at 11:30 this morning while the correspondent of the Associated Press was waiting in the ante-room. There was a sharp noise and the sound of breaking glass and falling plaster on all sides. Part of the roof fell in. The explosion occurred in a closet in the basement which was converted into a heap of rubbish. The walls were torn and great stones fell. A printer belonging to the captain-general's office was wounded. The greatest excitement prevails. The explosion is attributed to the insurgents.

DIPHTHERIA IS DOOMED.

This Fact Proved at the University of Missouri.

CHICAGO, April 28.—An X ray will kill the bacteria of diphtheria. The electrical department of the university of Missouri, at Columbia, announces that, after extensive experiments, diphtheria germs had been killed by the Roentgen light.

To Professor Harry Preston Pratt and Professor Hugo Wightman, of Chicago, who were the first to give to the scientific world the positive assertion that disease germs in the human body could be killed by the use of the X ray, this confirmation of their own pioneer work was extremely gratifying. But a week ago they gave the result of their experiments, which were received with some doubt by Eastern scientists, and with much skepticism in Chicago. To the doctors and scientists who criticized the possibility of the Chicago discovery being true, the confirmatory report from the university of Missouri will come as a surprise.

Professor Roentgen himself, when told by cable of the Chicago investigation and result, replied that he had expected the experiment to result as they did. The X ray, he said, was a germicide. The university of Missouri joins Chicago in sustaining this declaration. The following gives the details of the university's work:

"The Roentgen ray will cure diphtheria by killing the bacillus which causes that disease. This is the discovery which the electrical department of the university of Missouri announces today. Experiments have been carried on for some time in the electrical laboratory, to test the effect of the famous ray upon the diphtheria bacillus. The germs were prepared by Professor Hickman, of the bacteriological department, and subjected to the influence of the rays for two hours. The microscopic examination showed that the diphtheria bacillus had almost entirely disappeared. The arrangement of the testing apparatus is different from the ordinary method.

"Further experiments will be made at once. If they continue successful the cure of diphtheria by the application of the Roentgen rays to the afflicted throat will become part of medical practice."

CIGARETTES OF GREEN TEA.

They Tell Us That They Are Now Smoked in "Society."

The green tea cigarette has arrived, and promises to cause greater ravages than its predecessor, the slender roll of alleged tobacco, which now poisons the air almost everywhere in Asia, Europe and America. The person who first discovered that green tea would smoke is responsible, says the New York Journal, for millions of disordered nerves, stomachs and heads, but is probably too far gone in adoration of the enervating habit to feel any remorse. Already the new fad has taken possession of England; it will soon storm the walls of Paris, and before we can fortify against it here we shall be besieged. It will penetrate the boudoir of the ladies, and even the strait-laced, orthodox public will see no harm in an innocent tea cigarette. But none the less a deadly peril lurks within it.

New areas for the growth of tea are constantly opened up in the east, and the product will be pushed with all the energy of merchants determined to make fortunes. We can even foresee the time when to every pound of tea purchased for legitimate consumption as a cheering and noninebriating beverage the subtle grocer will add the dainty package of tea cigarettes, enveloped in paper covered with pretty Chinese or Ceylonese designs, thus using the entrance of the demon into the household. There is but one compensating feature in the whole business, and that is that at its worst the tea cigarette can never furnish an effluvia so stifling as that of the American paper roll with which every office boy deliberately exposes his lungs to partial paralysis daily.

THE KAISER AND THE TRAMP.

William Gives a Vagabond Some Money and Good Advice.

An anecdote of the Kaiser and the tramp has just appeared in Berlin papers, says the Pall Mall Gazette. Kaiser William was, it seems, lately staying at the Jagdschloss Hubertstock, near the Angermunde, and was one day shooting in that neighborhood. A tramp descried him from afar, and, not knowing it was the emperor, accosted him with the usual German request for unterstutzung or financial propping up, and also wished to be directed as to the road to Angermunde. The Kaiser complied with both requests, conversed with him at length as to his personal and professional views of life, and dismissed him with a wish for a pleasant end to his day's journey. The pleasant end was in the police station, for one of the Kaiser's servants, who seemed to be of the Scotchman's opinion that it was "an awful like business for pair folk the lulk at a king," imagined that the emperor had been insulted and telegraphed far and wide for the arrest of the pilgrim, with accompaniment of bonds, fetters, handcuffs, and so on. The wanderer was run to earth at Angermunde, when he learned several things that he did not know before—inter-alia, that he had been speaking with the Kaiser and was guilty of high treason, anarchism and the like. Needless to say, he was speedily released by an impetuous telegram from the emperor, who ordered that he should be fed, comforted and have a free ticket to Cuxhaven, "where he told me he wanted to go."
