#### THE POPULISTS' PREDICAMENT.

All is not serene in the camp of the Populists. The nomination of Bryan meets with great favor among the rank and file of the party, since Bryan is to all intents and purposes a Populist. His indorsement, then, by the St. Louis convention would be acceptable to many in the party. Some of the leaders, however, are objecting. To Pepper of Kansas such a course is especially offensive, and there are others of like prominence who entertain similar views.

The Populists are in an embarrassing position. Their stock in trade is free silver, and they are pledged to secure this realization by any means—supposedly honorable. In no other way can they do so much for silver as by advocating the election of Bryan, who is silver clear through. To refuse to indorse Bryan would be laying the party open to the charge of insincerity in their advocacy of silver.

On the other hand, an indorsement of Bryan would be a compromise of the position which the Populists have assumed towards the old parties.

The corruption of other organizations is a favorite theme for Populist orators to grow eloquent over. They have declared that neither of the great parties are fit to trust with the government of the nation, and that the only safe course to pursue is to give the Populists an unlimited lease of power. For them to indorse the nomination of Bryan would be to turn back upon all previous declarations and abandon one of the chief tenants of their belief.

The Populist party is between the devil and the sea. It would be better for the country if it should be consumed by the one or swallowed by the other.

The mistake of an engineer caused the disaster near Logan, Nebraska, where twenty-eight people were killed and over fifty wounded. Few callings in life carry with them the responsibility like that of the railroad engineer, and the wonder is that there are not more accidents upon our great railways. There seems no excuse for the error of the engineer in this instance, and whether his days be many or few, he can be nothing else than a self-accused destroyer of human life. The engineer in the cab and the train dispatcher in the office hold in their hands the lives entrusted to them. A traveler who in safety reaches his journey's end little thinks of the care and vigilance it has taken to accomplish such an end.

The free silver man admits that the commercial ratio of silver to gold is 32 to 1, and yet he wants the metals coined at 16 to 1. Why not carry the process farther and make it 10 to 1, or 1 to 1. Legislation can do as much towards establishing one permanent ratio as another, and if it is debased currency we want, let us not stop half way.

One thing has been determined beyond further questioning, and that is Chicago's superiority over every

other place as a convention city. There will be no name but Chicago mentioned four years from now.

#### MISCELLANEOUS ITEMS.

—It is estimated that the average life insurance in Cape Colony is about \$125 per head, a very remarkable showing, and indicative of activity among insurance men.

—A city ordinance in New York limits the number of hand organs to 1,500. The result has been to crowd Brooklyn full of perambulating music boxes, to the great annoyance of the people.

—It is understood that the government of New Zealand will introduce a measure for the exclusion of consumptive persons on the same lines as that dealing with smallpox, making masters of ships liable.

—The four burglars who recently robbed the savings bank at Whitinsville, Mass., had such a high regard for the rules of fashion that they committed the crime after they had just arrayed themselves in dress suits.

—Some of the bronze tablets put up in Albany, N. Y., at the time of the city's bi-centennial celebration ten years ago have disappeared. The tablets had been placed on many of the historic spots throughout the city.

—One of the greatest hunting feats of the season was that of George E. Farnham, of Canaan, Me., who, a few days ago, entirely alone and while standing in the wagon holding his frantic horse with one hand, shot two very handsome deer.

—Eighteen gold watches were found quilted in the clothing worn by a baby, a passenger on the steamer Saale, from Bremen, on her arrival at Hoboken. The baby's parents were arrested, and on the father 12 other watches were found. The 30 watches are worth \$7,000.

—St. Louis has suffered from three very serious fires. The first came in 1849, when the loss exceeded \$3,000,000; the second was in 1851, when 2,500 buildings were destroyed, the loss exceeding \$11,000,000; the third occurred in the same year, when over 500 buildings were destroyed, the value being estimated to exceed \$3,000,000.

—The paper for printing Bank of England notes is dampened with water in the exhausted receiver of an air pump. The ink used in the plate printing is made of Frankfort black, which is composed of the charcoal of the tendrils and husks of the German grape ground with linseed oil. The ink has a peculiar and deep shade of black, common black inks being tinted either with blue or brown.

#### MOTHERS

and those about to become mothers, should know that Dr. Pierce's Favorite Prescription robs childbirth of its torture, terrors and dangers to both mother and child, by aiding Nature in preparing the system for parturition. Thereby "labor" and also the period of confinement are greatly shortened. It also promotes an abundant secretion of nourishment for the child. During pregnancy, it prevents "morning sickness" and those distressing nervous symptoms from which so many suffer.

Tanks, Cottle Co., Texas.  
Dr. R. V. PIERCE, Buffalo, N. Y.:  
Dear Sir—I took your "Favorite Prescription" previous to confinement and never did so well in my life. It is only two weeks since my confinement and I am able to do my work. I feel stronger than I ever did in six weeks before.  
Yours truly,  
Cordelia Cullapp

#### A MOTHER'S EXPERIENCE.

South Bend, Pacific Co., Wash.  
Dr. R. V. PIERCE, Buffalo, N. Y.:  
Dear Sir—I began taking your "Favorite Prescription" the first month of pregnancy, and have continued taking it since confinement. I did not experience the nausea or any of the ailments due to pregnancy, after I began taking your "Prescription." I was only in labor a short time, and the physician said I got along unusually well.

We think it saved me a great deal of suffering. I was troubled a great deal with leucorrhoea also, and it has done a world of good for me.  
Yours truly,  
Mrs. W. C. BAKER.

### H. GLENN.

Nose But Ayer's at the World's Fair. Ayer's Sarsaparilla enjoys the extraordinary distinction of having been the only blood purifier allowed on exhibit at the world's fair, Chicago. Manufacturers of other sarsaparillas sought by every means to obtain a showing of their goods, but they were all turned away under the application of the rule forbidding the entry of patent medicines and nostrums. The decision of the world's fair authorities in favor of Ayer's Sarsaparilla was in effect as follows: "Ayer's Sarsaparilla is not a patent medicine. It does not belong to the list of nostrums. It is here on its merits."
