#### GUIDES FOR THE CAMPAIGN.

For the next three months the air will be thick with arguments for and against free silver. The following definitions and explanation of current terms in the controversy are given for the benefit of those looking for information:

Kinds of money in use—Gold coins of \$20, \$10, \$5 and \$2½; silver coins of \$1, 50 cents, 25 cents and 10 cents; nickel 5 cent coins; cents; United States notes (greenbacks), treasury notes; United States gold certificates, issued upon deposits of gold coin; United States silver certificates, issued upon deposits of silver dollars; United States currency certificates, issued on deposits of United States notes, to national banks only (issue now suspended); national bank notes issued by national banks.

Subsidiary coin—Silver coins of 50 cents, 25 cents and 10 cents.

Minor coin—Nickel 5 cent pieces and cents.

Money of the constitution—The constitution gives congress power "to coin money and regulate the value thereof," and of foreign coins and forbids the states to coin money or "make anything but gold and silver a tender in payment of debts."

Ratio of 16 to 1.—In the proportion of 16 grains of silver to 1 of gold, or more precisely of 15.988 to 1; that is, a silver dollar contains 371.25 grains of pure silver, and a gold dollar 23.22 grains of pure gold, there being 16 grains in the former to 1 in the latter.

Origin of the ratio—Fixed by law in 1792 at 15 to 1, representing the relative commercial values of the metals; changed to 16,002 to 1 in 1834, and to present ratio in 1837.

Free coinage of silver—Coinage by the United States mints of all silver offered, free of charge to the owners of the bullion, into legal-tender money.

Unlimited coinage of silver—Coinage of all silver bullion offered.

Gold reserve—Gold held by the treasury for redemption of paper money. The aim is to keep this fund up to \$100,000,000.

Gold standard countries—Austria,

Brazil, Chile, Canada, Denmark, Egypt, Finland, Germany, Great Britain, Liberia, Newfoundland, Norway, Portugal, Sweden, Turkey, United States.

Silver standard countries—Bolivia, Central America, China, Colombia, Ecuador, Japan, Mexico, Peru, Russia, Tripoli.

Value of gold in various countries—The Hon. M. L. Muhleman, of the United States sub-treasury, New York, says the grain of gold is of the same value in the civilized world; it is "the international standard; even silver is now measured by it alone in international transactions."

Value of silver in various countries—It is not uniform as gold. The most prevalent standard is the Mexican dollar, which contains 377.17 grains of pure silver, nearly 6 grains more than our dollar. As silver changes constantly in value so does the Mexican dollar. Its purchasing value in this country, though containing more silver than our own silver dollar, is but little more than fifty cents, because our own silver is maintained at a parity with gold.

Demonetization act of 1873—Often called the "crime" of '73. The act by which congress stopped the coinage of silver dollars, chiefly because the bullion value of the silver was then worth 3¼ cents more than the gold dollar, and silver dollars were not in circulation.
