Marvelous Results. From a letter written by Rev. J Gunderman, of Dimondale, Mich., we are permitted to make this extract: "I have no hesitation in recommending Dr. King's New Discovery, as the results were almost marvelous in the case of my wife. While I was pastor of the Baptist Church at River Junction she was brought down with Pneumonia succeeding La Grippe. Terrible paroxysms of coughing would last hours with little interruption and it seemed as if she could not survive them. A friend recom-mended Dr. King's New Discovery; it was quick in its work and highly satis-factory in results." Trial bottles free at Blakeley & Houghton, Druggists.

THE SILVER QUESTION IN A NUTSHELL

Free Coinage of Bricks Would Not Raise Their Price.

Did you ever stop to think what would be the result if the government should by legislation determine that ordinary building bricks 2 by 4 by 8 inches in size should be legal tender in 1 00 any amount for \$1 each and should arrange to have them so stamped in any quantity free of cost to the persons presenting them?

Under such circumstances the price of building bricks would at once advance to \$1,000 a thousand, for if they could be "coined" without cost the bricks . 1 00 'uncoined' would be worth just as much as the "coined" bricks-\$1 each. But did it ever occur to you that it would not be an advance in the value of the bricks, but a decrease in the value Mrs. G. C. Blakeley left for Portland of the dollars, which would thus establish a new "parity between money and property;" that under such a system would be worth only 1,000 bricks; that that 1,000 bricks would exchange for no more commodities or labor than it does today, and consequently that \$1,000 would mean no more to us than 1,000 bricks do now?

In other words, our government can determine by legislation what commodity and what amount of that commodity \$1 shall be, but it must leave it to the laws of comparative supply and demand, cost of production, etc., to determine what the value of that commodity shall be. It may declare that a brick shall be a dollar, in which case \$1 will be worth whatever a brick will exchange for. It may declare that 25.8 grains of gold shall be a dollar, in which case \$1 will be worth whatever 25.8 grains of gold will exchange for, or it may declare that 4121/2 grains of silver shall be a dollar, in which case \$1 will be worth only what 4121/2 grains of silver will exchange for, the same today as 50.3 cents in gold, or, "giving the debtor the option" as to what dollar he shall use with which to pay his debts, it may declare that each of these three shall be a dollar, in which case \$1 will be worth just as much as the least valuable of the three, which under present conditions would be the brick. -L. Carroll Root.
