### THE FARMER'S REAL GRIEVANCE.

Not a Lack of Money in the Country, but of Banking Facilities in Country Districts—Mr. Shearman's Proposed Remedy.

Why has Canada no currency question, no cry for cheap money and no campaign against gold? These are questions which Mr. Thomas G. Shearman answers very effectively in the London Times of Sept. 11.

Briefly summarized, Mr. Shearman's explanation of the discontent among farmers, which has led to the ridiculous demand for free silver, is that most farmers in the west and south are deprived of the benefits of banking facilities. They seldom see or use a check and are unacquainted with the benefits of banks and bank credits. For this reason there is a great scarcity of currency in most rural districts. The "country store" supplies in part and in a crude and costly way the credits which tide many farmers over from one season to another. Because of the great risk involved, the storekeeper, by charging high prices for his goods and by paying low prices for farm products, really gets from 25 to 40 per cent interest on the credits given to the farmers. Of course such interest eats up all of the profits of a large class of farmers.

The country storekeeper really does a banking business in a clumsy and costly way. Local banks, such as exist in Canada, would furnish the farmers with credits at about one-fourth the cost of store credits. With such banks the farmers could sell their crops for checks, deposit them in banks and take up their discounted notes in this way. The farmer knows nothing of this method of conducting transactions and thinks that his needs can be supplied only by making more money—cheaper money if necessary.

The farmers, therefore, make no efforts to obtain better banking facilities. Instead they work and vote against banks and bankers at every opportunity. They tax money and other loanable capital at 2 or 2½ per cent while demanding that interest be reduced to 2 per cent. They thus drive away the very money they are so eager to get. In some sections of the south it is 50 or 75 miles to the nearest bank. They prohibit branch banks, such as exist in Canada and Scotland to the great advantage of remote country districts.

The farmers themselves are the greatest enemies to what is most needed in their communities—first class banks of deposit and discount. Mr. Shearman makes this point clear. He says that Canadian farmers "have suffered from the fall of prices and from every other alleged result of the single gold standard to the same extent as the farmers south of them. Yet there is no bimetallic league in Canada, and the cry for cheaper money is not heard. Canada has not only enough money to supply all of her own wants, but also lends such great amounts in the United States that jealous American bankers sometimes try to shut Canadian money out."

Mr. Shearman sees what too few seem to see—that the farmers have a real monetary or currency grievance. He has indicated what is probably the only way of giving relief. He offers something positive. That the farmers are not willing to take the only remedy for their ills and prefer the quick free silver and cheap money remedies only prolongs their sufferings and makes a rational solution of the money question more difficult and uncertain.

### Which? Which?

In communities where wageworkers predominate Mr. Bryan continues to deny any intention of cheapening the dollar. He knows and they know that this would mean diminishing by one-half the purchasing power of wages and reducing by one-half the value of all savings, insurances and loans. And so he pretends that free coinage will increase by nearly one-half the price of silver and make a silver dollar worth truly as much as a gold one.

But in the west and in farming communities Mr. Bryan waxes eloquent on the need of a cheaper dollar to increase the price of farm products and enable the farmer to pay \$100 of debt with \$51 in silver. Leading silver advocates at the west have repudiated Mr. Bryan's idea for eastern hearers only that free coinage will increase the price of silver to \$1.29. They say flatly that such dollars would be as bad as gold. What they want is a dollar worth only 51 cents.

Which dollar does Mr. Bryan really want? He cannot have both. Which is to be bunked—the workingman or the farmer, the mine owner or the debtor? Which?—New York World.

### Why Capital is Timid Today.

There is capital enough for every legitimate business enterprise, and by the processes of credit it can be multiplied indefinitely, but it cannot be set at its work so long as men fear that it will be suddenly cheapened in the using. Capital brings no return to the owner unless he somehow puts it at the service of the community, but the tempting lure the lenders follow is profit, and when the risks are great the profits must also be great. Remove the thought of risk, and hoarded capital will be set free, mills will start up, railroads undertake extensions and improvements and hopeful enterprises commend themselves to investors. As it is, pending the decision of the value of the dollar, no one is spending, everybody is hoarding. We live from hand to mouth, with the machinery of prosperity idle at our doors.—Boston Congregationalist.
