Coal on the John Day.

Mr. James Small, of the Davville country, was seen at the Elkhorn, and month. in speaking of the coal interests of this section of country, said that there was a great quantity of coal on the John Day river. It had not yet been developed to any extent, but it outcropped all over the country. On the farm was an outcropping had been prospected by drill to a depth of 140 feet, the drill penetrating 120 feet of coal. The coal in the last few feet showed a marked improvement in quality. It is a lignite, and the surface coal seems to lack pressure. Experts who have examined the coal speak very favorably of it, both as to extent and quality. It is Mr. Small's intention to prosecute the drilling to a greater depth this fall .- John Day Sentinel.
