

TIME CARD FOR TRAVELERS.

Below is published a correct time card of trains and boats which leave and arrive at The Dalles. Travelers may trust it, as THE CHRONICLE is kept fully informed of revisions:

P. P. & A. N. O. STEAMERS. Steamer Regulator leaves every Monday, Wednesday and Friday at 7:30 a. m. Arrives every Tuesday, Thursday and Saturday at 8:00 p. m.

Advertising Rates. Per inch. One inch or less in Daily \$1.50 Over two inches and under four inches 1.00 Over four inches and under twelve inches .75 Over twelve inches .50

Weather Forecast. PORTLAND, Feb. 2, 1897. FOR EASTERN OREGON—Tonight and tomorrow, fair and slightly cooler.

WAYSIDE GLEANINGS. Random Observations and Local Events of Lesser Magnitude.

City council meets Wednesday. Mrs. Hoffman will be in The Dalles next Saturday and Sunday. Annual meeting of the East End Hose Co., No. 3, tomorrow evening at 7:30 o'clock.

The funeral of Mrs. Krauss took place from the Methodist church at 1:30 this afternoon. The remains were interred in the Masonic cemetery, where her husband, son and son-in-law are also buried.

The mortality from smallpox at Havana is very great, many persons having died during the past two days. It is estimated that 30 per cent of the deaths in Havana now are due to smallpox, 61 per cent dying from the combined effects of other diseases.

The bill extending the time in which settlers on forfeited Northern Pacific railroad lands may pay for the same, passed the house yesterday, and now only requires the president's signature to become a law.

Do not fail to call on Dr. Lannerberg, the eye specialist, and have your eyes examined free of charge. If you suffer with headache or nervousness you undoubtedly have imperfect vision that, if corrected, will benefit you for life.

A few months ago, Mr. Byron Every, of Woodstock, Mich., was badly afflicted with rheumatism. His right leg was swollen the full length, causing him great suffering.

Mr. James Langille of Hood River, has filed two plans for a bridge across Hood river at the town of Hood River. One is of the Howe truss variety; the other consists of two parallel arches from which the bridge is suspended.

I have given Chamberlain's Cough Remedy a fair test and consider it one of the very best remedies for croup that I have ever found. One does have always been sufficient, although I use it freely.

A petition has been filed for bridging Hood river about two miles above the town, and establishing a county road from one side of the valley to the other. It is proposed, if the road is established and a new bridge is built at Hood River, to cut 40 feet off the present Hood River bridge and use the balance for the new bridge.

foot span, and is weak, with 40 feet cut off it would be strong enough, and would cost but little to move and set up.

A large and very intelligent audience heard Mrs. Hoffman's lecture. She evidently has a logical brain and a philanthropic heart, and gave her audience much to think about in connection with the dangers menacing us from the large interior and ignorant element in our cities that is practically the ruling power in our country.

President Penrose, of the Whitman man college, Walla Walla, Wash., will deliver a lecture tonight at the Congregational church on the subject, "A New chapter in American History."

Mr. M. L. Jones, deputy grand chief ranger, and organizer for Oregon for the society of Foresters, will deliver a free lecture under the auspices of Court The Dalles, No. 12, at K. of P. hall Friday night next.

This was ground hog day, the day upon which that weather-observing animal comes out of his winter quarters to take a look at things in general. It is claimed that he makes his appearance promptly at noon, and if he sees his shadow, returns forthwith to his dormitory and tucks himself in his little bed for a six-weeks nap, knowing that the weather will not be fit for a hog, ground or otherwise, to be out in.

The taxes in La Grande, including the special school tax, amount to 43 1/2 mills; in Hood River they are 36 mills; in The Dalles it is 32 mills; and so on throughout the state the tax rate is almost equal to the interest rate in eastern states. They are too high now; but increased indebtedness and accumulating interest puts them up steadily.

There is but one remedy—to utterly refuse to go further into debt; to practice the most rigid economy; to keep our tax rate up, and pay off our debts, Get out, and then keep out. The worst feature of the whole affair is that the high taxes prevent the establishment of factories and the starting of new industries.

H. A. York was up from Hood River last night. Mr. S. L. Brooks went to Portland this afternoon. Mr. Rorick has arrived home from Michigan, where he was a witness in the cases against O. D. Taylor.

Do you know the meaning of Schilling's Best? It means of as high grade as can be maintained without extravagance.

MITCHELL GOT 29 IN THE HOUSE

Senate, by a Vote of 16 to 14, Refuse to Vote for Senator.

A special to THE CHRONICLE, received at 2:40, says: House took a ballot for senator at noon. Thirty members were present. Twenty-nine votes were cast for Mitchell, and one for George H. Williams.

The opposition to Senator Mitchell, so far as it pretends to be based on his financial record, is, in my judgment, singularly unfair. It ignores completely the fact that the senator was elected six years ago on a platform that declared unequivocally for the free coinage of silver, so that in voting for free coinage the senator was simply obeying the behests of his constituents.

On this financial plank was John H. Mitchell elected to the United States senate six years ago and no state convention of his constituents has ever, from that hour to this, amended the instruction it contained for his guidance, except in so far as the adoption of a miserable straddle, which meant and was intended to mean, anything or nothing at the will of the interpreter, may be said to be an amendment.

Wanted: Men Take Notice. F. J. McHenry, organizer for this district, will be present and meet with the members of Mount Hood Camp this evening, for the purpose of instructing them in the secret work of the order. All members are requested to be present.

THE BEAN AUTOMATIC SPRAY PUMP.

Is, unquestionably, the most successful and perfect working Spraying Device yet invented. It is a universal testimony that more, as well as better, work can be accomplished with the Bean Spray Pump than with any other pump on the market.

With this pump one man can charge the receptable and leave it to direct the spray just where it is wanted, and thus with sufficient hose pass from tree to tree. The solution is delivered in a fine mist or spray, penetrating every nook and corner, thus doing better and more effective work than is possible by any other method, and with no waste whatever of solution.

MAIER & BENTON AGENT FOR THE DALLES. A Washington scientist will build a laboratory at Niagara Falls and use the current for crystallizing pure carbon into diamonds of great size.

the precious stone can be made of any size wished, says the Washington Herald.

The diamonds heretofore made were made by using impure carbon, that of commerce, such as willow charcoal. But Dr. B. H. Johnstone, of Washington, discards such old-fashioned methods, and will use only the element provided by nature—that is, the pure carbon found in mines all over the country.

Dr. Johnstone, adopting nature's method, proposes to turn out stones which will vie in purity and beauty with those of the fields of South Africa, and which will compare with the famous gems which glow in the crown of emperors. He will require at least 6000 volts of electricity to crystallize the carbon, and that is a power not easily obtained anywhere except at Niagara.

The diamonds which will come from this laboratory will be of great size, for the doctor expects to make them from the size of a pea to that of the great Kohinoor, the most famous gem of the world.

Some very industrious person has been making a canvass of the senate for the purpose of ascertaining the occupations and religious convictions of the members. Here is the result:

Bates, no church, business man; Brownell, no church, lawyer; Calbreath, no church, physician; Carter, missionary Baptist, farmer; Daly, no church, physician; Dawson, no church, farmer; Driver, Methodist, preacher; Dutor, no church, attorney; Gesner, no church, engineer; Gowan, no church, attorney; Harmon, no church, county clerk, teacher; Haseltine, Methodist, merchant; Hobson, no church, merchant; Holt, no church, farmer; Hughes, no church, farmer; Johnson, Cumberland Presbyterian, business man; King, no church, lawyer; Mackay, Presbyterian, lumberman; McClung, Methodist, merchant; Mitchell, no church, lawyer, newspaper man; Mulkey, Christian, lawyer; Patterson, of Marion, no church, merchant; Patterson, of Washington, no church, merchant; Price, Christian, farmer; Reed, no church, merchant; Selling, Jewish, merchant; Smith, Baptist, lawyer; Taylor, no church, merchant; Wade, no church, merchant; Simon, no church, lawyer.
