Sole Distributing Agents.

RIVERA AGAIN FREE

A Report to This Effect Has Reached Key West.

NO CONFIRMATION YET RECEIVED

Recapture Said to Have Been Effected While the General Was Being Conveyed to Havana.

KEY WEST, April 8.—News was received last night that the Cuban insurgents had made an attack on the train upon which General Rivera was being taken from San Cristobal to Havana. Reports say the insurgents were successful in their attack, and that Rivera was freed. It is impossible to get a confirmation or denial of the report as yet, but the Cuban sympathizers here believe it to be true and are accordingly jubilant.

OPERATIONS BY INSURGENTS.
Fort No. 11 Captured, and Seven Spaniards Killed.

NEW YORK, April 8.—A Journal special from Havana says:
A large insurgent force recently appeared in front of fort No. 11, protecting the railway line between Calbarcoen and Remedios, and opened fire with cannon. One shell fell in the middle of the fort, killing seven men and wounding ten, the rest escaping. The insurgents then dynamited the railroad bridge, interrupting communication between the cities. They also attacked fort No. 12, forcing its surrender and securing arms and ammunition.
The rebel forces under Alexander Rodriguez and Castillo continue active in Havana province. They again attacked Guines, Monday, sacked stores and set the Spanish barracks on fire.

ICE GORGES BREAKING UP.

North Dakota Towns Threatened With Damage by Flood.
St. Paul, Minn., April 8.—A Grand Forks, N. D., special to the Dispatch, says:
The Red river rose 16 inches last night and passed the high water mark of '93 at 8 o'clock this morning. The government gauge indicated 41 feet above the

low water mark. It is now rising 1 1/2 inches an hour. The bridges are now being closely watched. When the big gorge above the city comes down it is feared they will be carried away.

Later—The gorge above the city has broken and immense quantities of heavy ice are passing through the bridges this afternoon. No teams are allowed to pass over the bridges.

Situation at Bismarck.
BISMARCK, N. D., April 8.—The water in the Missouri river has risen four feet since last night. A boat landing erected by the Northern Pacific railroad for the transfer of passengers has been swept out, and telegraph poles lifted and swept away by the torrent. The water has broken through the dyke at Mandan and Bismarck, and at 8 o'clock this morning was running into the railroad roundhouse. The ice has gone out at Fort Yates, but is still solid at Glencoe, twenty miles down the streams. No trains have arrived here since the day before yesterday.

Danger Passed at Fargo.
FARGO, N. D., April 8.—The waters are now receding, and the danger is passed. Hundreds of people are destitute. The secretary of war has just wired Mayor Johnson, of this city, asking what amount is needed for immediate relief. Johnson wired back that \$10,000 is required.

Revolt in the Transvaal.
LONDON, April 8.—A dispatch to the Times from Cape Town says advices received here from Delagoa bay announce the country bordering on and across the Limpopo river for many miles northwest and the northern limit of the Transvaal, is in open revolt. It is added the situation is serious. Troops are leaving for Delagoa bay by the steamer Caranavon. A further rising is expected in Maputaland.

Rebel Stronghold Captured.
CAPE TOWN, April 8.—A dispatch from Vreyburg says volunteers have captured and turned the insurgents' stronghold at Ganssepe. Lieutenant Harris is among the killed.

Do not fail to call on Dr. Lannerberg, the eye specialist, and have your eyes examined free of charge. If you suffer with headache or nervousness you undoubtedly have imperfect vision that, if corrected, will benefit you for life. Office in the Vogt block.

TESLA INVENTS AN OSCILLATOR.

Discovery Which Will Revolutionize Electric Lighting.

NEW YORK, April 8.—Nicola Tesla has made a discovery which will revolutionize, it is believed, the ordinary means of illumination, and will be of infinite use in hundreds of directions. Tesla exhibited tonight newly perfected appliances called electrical oscillators, which are a novel kind of transformers, based on one his discoveries made six years ago. By their means Tesla is now able to produce electrical vibrations to a frequency of many millions a second from ordinary currents, whether alternating or direct.

This achievement has an important bearing on many scientific and industrial problems. Tesla pointed out two important discoveries. First of all, he announced that he had found a new and powerful source of the rays. This source, he said, was an electric arc formed under certain conditions, and the quality of the rays is such as to give a far finer definition and greater power of the impressions. Tesla said that while difficulties at the present are such as to restrict the use of the principle, he hoped to overcome and soon report substantial progress.

The second important discovery, Tesla announced, was the deflection of Roentgen rays by a magnet. This has an important bearing on the nature of the Roentgen rays and establishes the complete identity of these with the rays discovered by Leonard in 1891, five years before Roentgen made his announcement.

In the introduction of his subject, Tesla said that in 1894 he engaged in an investigation of the actinic power of phosphorescent bodies. The Roentgen rays effect were observed, but not recognized. He exhibited a great number of diagrams and designs for a demonstration of his theory of rays, which he said were due to minute particles of matter projected with enormous velocities from the bulb, a view which is at variance with the generally accepted one regarding transverse waves.

Tesla's newest discovery, besides producing a more brilliant and much cheaper means of purifying the atmosphere, water and other substances. Ammonia, nitric acid and other products may be evolved from common air if from nothing else. It would be impossible to enumerate the possibilities of the discovery.

Celebrated for its great leavening strength and healthfulness. Assures the food against alum and all forms of adulteration common to the cheap brands.
ROYAL BAKING POWDER CO. NEW YORK.

REVOLT IS SPREADING.

Uruguayan Troops Unable to Cope With the Insurgents.

NEW YORK, April 8.—A Herald dispatch from Montevideo says:

The government is alarmed at the failure of the troops to suppress the rebellion. Officials admit that the news from the front is unfavorable. The government column under Munoz has been dispersed by Saravia. Lamas is now said to be marching on Monos.

Saravia, the Brazilian rebel chief, is at San Luis, near the Brazilian frontier, while Lamas is marching toward the center of the republic. The government troops were defeated at Trecenta y Tres. The government has called for the mobilization of 6000 troops of the national guard.

The revenue from customs for the last six months is \$1,240,000 less than for the preceding six months. Several deputies have made a demand on the chamber that the president shall change his present policy.

Notice to Taxpayers.

Notice is hereby given that by order of the county court, the sheriff will return the tax roll for 1896 to the county clerk on the first Monday in April, 1897, and all taxes then remaining unpaid on the roll will be declared delinquent, and thereafter the sheriff will not receive taxes until the delinquent roll is given him. By order of court.
A. M. KELSA, Clerk.

New York Weekly Tribune

—FOR—
Farmers and Villagers,
—FOR—
Fathers and Mothers,
—FOR—
Sons and Daughters,
—FOR—
All the Family.

With the close of the Presidential Campaign THE TRIBUNE recognizes the fact that the American people are now anxious to give their attention to home and business interests. To meet this condition, politics will have far less space and prominence, until another State or National occasion demands a renewal of the fight for the principles for which THE TRIBUNE has labored from its inception to the present day, and won its greatest victories.

Every possible effort will be put forth, and money freely spent, to make THE WEEKLY TRIBUNE pre-eminently a National Family Newspaper, interesting, instructive, entertaining and indispensable to each member of the family.

We furnish "The Chronicle" and N. Y. Weekly Tribune one year for only \$1.75.

Write your name and address on a postal card, send it to Geo. W. Best, Tribune Office, New York City, and a sample copy of The New York Weekly Tribune will be mailed to you.

HON. W. J. BRYAN'S BOOK.

THE FIRST BATTLE

THE FIRST BATTLE is an interesting story of the great political struggle of 1896, its most important events and the many issues involved; a logical treatise on Bi-metalism as uttered by eminent exponents, including the part taken by Hon. W. J. Bryan in the silver agitation prior to the Democratic National Convention, and during the campaign; the best examples of his wonderful oratory; the most noteworthy incidents of his famous tour; a careful review of the political situation; a discussion of the election returns and the significance thereof; and the future possibilities of Bi-metalism as a political issue.
