The Reply of Greece.

ATHENS, May 24.—The Greek government, as a reply to the notification by Eshem Pasha, commander of the Turkish army in Thessaly, that he is empowered to negotiate terms of peace with Greece direct, has informed the ministers of the powers here that, as Greece has already confided her interests to the powers, there is no reason why she should negotiate directly with Turkey.

President Extends Clemency.

WASHINGTON, May 24.—The president has remitted the sentence of dismissal imposed by the court-martial on Captain Romeyn, Fifth Infantry, who, after a sensational trial, was convicted recently of assault on Lieutenant O'Brien at Fort McPherson, Ga. As Captain Romeyn retires by operation of the law June 1, the president believes the ends of justice will be secured by a severe reprimand.

All or Nothing.

The driver of the stage, which was rolling down the mountains as fast as six miles on the gallop, could keep ahead of it, may have noticed that I was a little nervous, for after a bit he soothingly said:

"No use to grip that railing so mighty hard, stranger. We shan't come to the danger 'tint fur half an hour yet."

"Then it's ahead?" I queried.

"Yes, three miles ahead, and I may say fur your benefit that hangin' on won't do any partickler good."

"But I don't want to slide off."

"And you won't. If anythin' goes it'll be mevils and coach and the hull caboodle altogether, and as the drop is plump 800 feet you won't hev no use fur arnica or stickin' salve arterwards."

Mr. Levy Finds the Bullet Inside His Skull, But Loses His Hair.

William Levy, of Eau Claire, Wis., who recently had an X ray examination of his skull made by Prof. Fred S. Jones at the physical laboratory of the Minnesota State university had an experience in consequence not generally supposed to accompany that process.

Levy was shot in the head about ten years ago by an escaping bank defaulter. The bullet has been somewhere in his head ever since, and in July he made up his mind to have it located. Accordingly he came up and sat from eight o'clock in the morning till ten at night for a Roentgen ray picture of his head.

After taking a couple of negatives they finally found about where the bullet was located. The doctors wrapped his head up in wires which were definitely located. A picture was taken through the skull from the front toward the back of the head, the tube from which the rays radiated being for this purpose placed inside his mouth.

The picture thus secured showed the bullet very distinctly to be lying at the junction of two of the wires which crossed right under the occipital bone. It indicated also that the bullet had struck the back of the skull and turned forward again, for the point of the bullet, being further from the plate showed dimmer on the negative. These exposures had taken up nearly the whole day, but the patient felt no bad effects at the time.

He had been warned that the experiment might cause him the loss of his hair, but that did not deter him from taking the risk. A very strong current, about 100,000 volts, had been passed through the tube in making the exposures.

The next day Mr. Levy began to notice a peculiar effect on his skin wherever it had been exposed to the rays, and the hair on the right side of his head, which had been near the wire, began to fall out. In a few days the right side of his head was perfectly bald, his right ear had swollen to twice its natural size and presented the same appearance as if very badly frozen. Sores were visible on his head, his mouth and throat were blistered so that he could not eat solid food for three weeks, and his lips were swollen, cracked and bleeding. In fact, the long exposure to the X rays, while giving him no pain at the time, seemed to have produced very similar effects to a very severe burn.

Mr. Levy has recovered from the effects of his burns, but he still has half a bald head. He is a plucky man, about 30 years of age, and intends to have the investigation carried further and the bullet removed. He has already written to Prof. Jones asking for another sitting. It is necessary now to have a negative showing just how far below the surface the bullet is located before the doctors decide whether the operation can be safely performed.—St. Paul Dispatch.
