The Empire's Splendid Showing at Her Grand Exposition.

Signs of Rapid Growth in Manufactures and Trade Industries—Some Features of the Great Enterprise.

The pan-Russian exposition at Nijni Novgorod, nominally opened by the minister of finance on June 9, is now in full progress, and the multitude visiting it is swollen by the crowds of merchants and traders that annually attend the famous fair at the same place. The exposition is a government undertaking, upon which a great deal of money has been lavished, with the object of promoting trade within the empire. It is the 16th industrial exposition of all the Russians since 1829, three having been held in Warsaw, and the others in Moscow and St. Petersburg. The last was in Moscow in 1882. Since that date there has been a remarkable development of Russia's manufactures. It is evidenced by the present exposition in a most convincing way that Russia has ceased to be an exclusively agricultural country, and must be ranked with manufacturing countries of the first class. There are samples and specimens of everything, showing the wide range of Russian industry. There is not much, perhaps, that is new and original in the purely European exhibits, but in respect to things which the west does not produce there is extraordinary diversity and abundance. The peculiarities of Russia's various races and the products of her provinces from the Arctic circle to central Asia are admirably displayed.

The exposition covers an area of 200 acres, near the confluence of the rivers Oka and Volga, beyond the fair. The place is 200 miles east of Moscow, from which city it was expected there would be many visitors at the conclusion of the coronation festivities. With a view to this, numerous immense hotels were erected along the new avenue extending from the railway terminus to the main entrance of the exposition. These palaces, with the floating hotels on the Oka, have failed till very recently to obtain many guests, though the government has made great effort to render the place attractive to foreigners. The exposition buildings consist of a large number of separate pavilions, interspersed with restaurants, refreshment kiosks and flower gardens grouped around a circular gallery, which forms the center. One of the most interesting sections is that of central Asia. The people, their industries, their residences and mode of life are fully reproduced. The varied productions of Siberia are well displayed. Among the rest, the 1973 tons of gold, worth \$140,000,000, obtained in the last 64 years from the mines of the czar, are represented by two large globes. The exhibit of minerals, furs, etc., is very rich. Photographs of Siberian convicts disclose the queer circumstance that most of them are punished for "concealing their avocation and family origin."

Agriculture makes a poor showing, reflecting, it is supposed, the condition of this industry, which is depressed in Russia as in other parts of the world. The rural and domestic industries, apart from farming, make, however, a large display. Whole villages, it seems, are turning to the manufacture of useful articles to the neglect of agricultural pursuits. Spinning and basket work occupy great numbers. The largest progress in the past 20 years has been in mining and metallurgy, but much has been done in textile fabrics, cotton goods, silks, etc. Electrical contrivances obtain, of course, a marked prominence. The machinery hall has 147,000 square feet of space and is a fine affair. The art display is poor.

The exposition was brought to Nijni this year, it is said, to revive the prosperity of this trade center, which has been declining. It is hoped that the great Siberian railway, when completed will produce the same result. Expert opinion is, however, adverse to this view. The increased railway communication must, it is held, tend to develop other distributing centers.—Baltimore Sun.

MARBLEHEAD BOYS.

Marvelous Depravity with Which They Have Been Charged.

Speaking of boys reminds me, says a writer in the Boston Gazette, of a story which Polly told the other day, when she came up from Marblehead Neck to cheer my morbid gloom. It seems Marblehead boys have the reputation of being the worst in the state, and a worthy minister who went there to fill a vacant pulpit one Sunday had occasion to verify the truth of this, for on his way to church he was unmercifully hooted and stoned. Filled with righteous indignation, the worthy divine remarked from the pulpit in mournful tones upon the depravity manifested by the old town's boys. Some time later he again visited the place, and this time he met with no insults and did not even see a single hoodlum on his churchward walk. Being a just man he desired to praise as well as blame, and so he said that he was truly rejoiced to see that the youth had seen the error of their ways and had turned aside from the path of the evil-doers. Thereupon arose a small boy in the gallery, who shrieked forth in gleeful malignity: "Don't you believe it. They've just gone down to Barnegat to stone a funeral, and when they come back won't you catch it!"

On the occasion of the meeting of the grand lodge of Elks at Minneapolis, the O. R. & N. will sell round trip tickets July 21, good to return until July 31st, for \$60.50. These tickets are good for stop-over privileges returning. The meeting of the National Educational Association is held at Milwaukee at the same time, and same rates to Minneapolis will be given. At that point, tickets will have to be purchased to Milwaukee, costing for the round trip \$12.30.

CURIOUS MENTAL FEAR.

Wheelman Afraid His Steed Would Shy at Steam Roller.

"A man who has ridden horseback for many years," said a physician, "doesn't quickly lose his feeling of uncertainty as to what his steed is going to do in an emergency after he has taken to riding a bicycle. I had a curious illustration of this. I was riding my wheel up the boulevard when I met a big steam roller at Ninety-second street. Horses that will rub noses against a moving train will shy at a steam roller for some unknown reason. Horsemen recognize steam rollers as things to be avoided at any cost. Now I have been riding a wheel for a year, but as soon as I saw that roller coming down the boulevard I instinctively turned my wheel into a side street to avoid it. For the moment I felt that I was in danger of being thrown. Then I realized the advantage that a wheelman has over a horseback rider when it comes to steam rollers, and I turned around and rode past this particular roller with great satisfaction."

She Disliked Steamboats.

The wife of a physician who lives in Washington tells a story of a distant kinswoman who was her guest during the Christian Endeavor convention. The kinswoman lives in an inland New England town, and when she came to Washington she spent one night of the journey on board a steamboat. It was the first time she had ever traveled by water. She reached Washington extremely fatigued. The doctor's wife remarked it. "Yes, I'm tired to death," said the kinswoman. "I don't know as I care to travel by water again. I read the card in my state room about how to put the life preserver on and I thought I understood it, but I guess I didn't, though. Some way, I couldn't seem to go to sleep with the thing on."
