## Firemen's Excursion to Multnomah Falls. Sunday, July 11th. Str. Regulator. Tickets, \$1.00.

Lightning Fired a Church.

Quebec, July 5 .- A terrific thunder storm which passed over the Lake St. John district caused loss of life and considerable damage to property. Owing to the storm the wires are in a demoralized condition, but it is learned that at John Querie's lightning struck the parish church while high mass was being celebrated. A portion of the roof was ripped off, two altars upset and the officiating priest stunned.

Then it was discovered that the building was on fire, and the whole congregation at once became panic-stricken. A mad rush was made for the doors, during which one man was trampled under toot and killed and many persons were injured.

The church was burned to the ground, making the third church fired by lightning and destroyed in the Lake St. John district within two weeks.

#### Wined Out An Old Fend.

EMPIRE CITY, Kan., July 6 .- Sam Mitchell, husband of the postmistress of this city, wiped out an old fend here by shooting and killing Link Cole, ex-city marshal. The men met on the street and Mitchell shot without warning. Cole killed Mitchell's brother a year

# Baby's Second Summer

is the time that tries all the care of the mother and all the skill of maternal management. Baby comfort comes from fat; fat babies have nothing to do but to sleep and grow.

If your baby does not seem to prosper, if he does not gain in weight, you must get more fat there. A few drops of

each day will put on plumpness; fat outside, life inside, baby and mother both happy.

Your baby can take and relish Scott's Emulsion as much in summer as in any other

For sale by all druggists at 50c. and \$1.00.

#### A PROPER DIET.

tvoidable Errors Are Responsible for Many Diseases The nature and quantity of an appro-priate diet must depend largely upon

one's age, individual constitution, occupation, habits of life and, to some extent, upon the climate in which one lives. An active child 12 or 15 years old, who is growing fast and exercising freely, may require and assimilate as much food as a man past middle age.

In health, the appetite may be taken as a fair guide, and the child will seldom eat too much if he is taught to eat very slowly, and thoroughly to chew each mouthful.

Throughout the school years the growth of the body is continually going on, and, therefore, if a proper development is to be maintained, the food must be abundant and of a character to furnish new tissues and to yield energy in

the form of heat and muscular activity. The full adult weight is not usually attained before the 25th year, although in some instances it is reached earlier.

When the growth of the body and the development of the vital organs are completed, the use of food consists simply in maintaining the proper equilibrium of the tissues by replacing waste with new material, and in furnishing fuel for the development of force.

As men advance in life, become prosperous, and perhaps acquire more lux-For sale by M. Z. Donnell, urious habits of living, they are apt to take less exercise and at the same time. to be constantly tempted to indulge in food which is not needed and which is

On the other hand, quite as much ill suitable reward will be paid to anyone may result from eating too little as from overindulgence. In either case the difficulty is made serious by long

#### POINTS ON SNAILS.

Nothing Meteoric But Much That Is In-

something extraordinary in The creatures may be slow, but they hold the record over all other animals for prolonged vitality under adverse conditions, says the Providence Journal. Stories of toads dug out of rocks in which they had been imprisoned for ages are 'apocryphal; but recent discovery has established the credit of this humble mollusk as No. 1 in the tenacity of life.

Only the other day a specimen from an island off the coast of Lower Caliof the molluscan collection, was found to be alive. It had no food or water for more than six years. When placed in the box with moist earth it protruded its feet, began to move about. and seemed to be as well as ever. Some time ago a few snails of a different species, gathered in Mexico, reached the Smithsonian institution and were placed in a box. They re-mained undisturbed for two years and three months, at the end of which time they were put into a jar of glass with some chickweed and a smal quantity of tepid water. Pretty soon they waked up and appeared quite ac-

Pond snails, which are sometimes found alive in logs of mahogany from Honduras, possess equal endurance. Specimens carried from Egypt to Paris, packed in sawdust, have arrived uninjured. Other kinds have been experimented with by shutting them up in pill boxes and dry bags for years, but they have survived. The limit of

their vitality is yet to be ascertained. Land snails in cold climates bury themselves in the ground or under lead leaves in winter; in tropical regions they become torpid during the hot season. When about to start in on a period of sleep they seal up their shells with a close-fitting door, which sometimes is a shield of thin, transparent mucus, and in other cases an opaque membrance as thicl: as a visitng card. Behind this the animal constructs other walls, which serve like so many partitions to protect it against prolonged cold or dryness.

It is believed that just as the seeds of plants are distributed by winds, so likewise the eggs of snalls are scattered abroad on the broczes, thus disseminating their species. They are very prolific animals. Some of the great on trees and weigh a pound apiece, lay eggs that look strikingly like those of pigeons, being quite as large. The eggs are deposited among decaying vegetation, the heat of decomposition hatching them.

The Westfield (Ind.) News prints the following in regard to an old resident of that place: "Frank McAvoy, for many years in the employ of the L., N. A. & C. Ry. here, says: 'I have used Chamberlain's Colic, Cholera and Diarrhoea Remedy for ten years or tonger—am never without it in my family. I take pleasure in recommending it." It is a specific for all bowel disorders. For sale by Blakeley & Houghton.

#### THE YANKEL BIRD.

The Smithsonian institution has hit Facts About the Origin of the Christmas Turkey.

> Our Barnyard Gobbler Is Not the Direct Descendant of American Stock, But a Relative Imported from Mexico.

Among the luxuries belonging to the high conditions of civilization exhibited by the Mexican nation at the time of the Spanish conquest was the possession by Montezuma of one of the most extensive zoological gardens on record, says the Washington Star. It embraced nearly all of the animals of that country, with others brought at great cost from distances. It is stated by historians that turkeys—called by the Spanish alteraturers "a kind of peacock"—were far alsed in fornia, inclosed in a drawer with part, on record, says the Washington Star. kind of peacock"-were familihed in large numbers as food to the leasts of prey in the emperor's manager

At that time the bird had been domesticated and reared in Mexico for hundreds of years. It was carried by the Spaniards to the West Indies, whence it was taken to Europe early in the sixteenth century. Before long it became in Europe highly appreciated for its flavor. Being known to be of foreign origin, a report gained ground that the fowl had been obtained from Turkey, that being a region little known in western Europe. In this way it obtained the name by which it

has since been designated. People coming to the United States from Europe brought this Mexican lots fowl to the United States, and the 41, progeny of the stock thus imported and fetched back to the continent whence it was originally derived furnishes Yankee tables to-day. In fact, the contemporary turkey of the barnvard did not belong here originally It is not derived from the wild turkey of the United States, which is quite another species, with dark meat on the breast and other differences plainly distinguishable. On the other hand, the wild Mexican turkey has white meat on the breast and resembles our tame turkey in all other points.

There are two species of wild turkey in North America. One is confined to the eastern and southern parts of the United States, while the other is native to the Rocky mountains, parts of Texas, New Mexico, Colorado, Arizona, and extends along eastern Mexico southward. Zoologists were a long land smalls of the tropies, which live time finding this out, being puzzled meanwhile to account for the marked difference in color and habits between the wild and domestic birds of the country. That a dark-meated fowl should acquire white meat through domestication would seem indeed surpris-

In its wild state the Mexican turkey derives nourishment from plants and insects, scratching with its feet for food. It is very shy. The birds live in families like wild geese, keeping sentinels on the watch when the flock is feeding. They are so heavy that they are not fond of taking flight, but the swiftest dog cannot overtake them in running. The female lays from three to twelve roundish, red-spotted eggs, and hatches them out in thirty days. In Yucatan and northern Guatemala this bird is replaced by a third species, to Jan. 1, 1893, will be paid at my less in size, but more striking in appearance, the tail having spots somewhat like the "eyes" in the tail of a

THE DALLES, OR.

#### NOTICE-- SALE OF CITY LOTS.

Notice is hereby given that by authority of ordinance No. 292, which passed the Common Council of Dalles City April 10th, 1897, entitled, "An or-dinance to provide for the sale of certain lots belonging to Dalles City," I will, on Saturday, the 15th day of May, 1897, sell at public auction, to the highest bidder, all the following lots and parts of lots in Gates addition to Dalles City,

1, 2, 3, 4, 5, 6, in block 4b.

The reasonable value of sa.d lots, for Minneapolis less than which they will no, re sold, has been fixed and determined by the Common Council of Dalles City as follows, to-wit:

Lots 9 and 10, in block 14, \$150; lots 7, 8, 9 and 10, jointly in block 15, \$200; lots 7, 8, 9 and 10, jointly in block 21, \$200; lot 10, in block 27, \$225; lot 11, in block 27, \$225; lot 12, in block 27, \$300; lot 9, in block 34, \$100; lots 2, 3, 4, 5, 8, 9, 10 and 11, in block 35, each respectively \$100; lots 6 and 7, in block 35, each respectively \$125; lots 2, 3, 4, 8, 9, 10 and 11 in block 36, each respectively \$125; lots 2, 3, 4, 8, 9, each respectively 10 and 11, in block 36, each respectively \$100; lot 12, in block 36, \$125; lote 3, 4, 5, 8, 9, 10 and 11, in block 37, each respectively \$100; lots 6, 7 and 12, in block 37, each respectively \$125; lots 2, 3, 10 and 11, in block 41, each respectively \$100; lots 1, 7 and 12, in block 41, each respectively \$100; lots 1, 7 and 12, in block 41, each respectively \$125; lots 3, 4, 5, 8, 9, 10 and 11, in block 42, each respectively \$100; lot s, 6 and 12; in block 42, each respectively \$100; lot s, 6 and 12; in block 42, each respectively \$100; lot s, 6 and 12; in block 42, each respectively \$100; lot s, 6 and 12; in block 42, each respectively \$100; lot s, 6 and 12; in block 42, each respectively \$100; lot s, 6 and 12; in block 42, each respectively \$100; lot s, 6 and 12; in block 42, each respectively \$100; lot s, 6 and 12; in block 42, each respectively \$100; lot s, 100; lot s, 10 6 and 12, in block 42, each respectively \$125; lots 2, 3, 4, 5, 9, 10 and 11, in block 43, each respectively \$100; lot 1, in block 43, \$125; lots 2, 3, 4 and 5, in block 46, each respectively \$100; lots 1 and 6, in block 46, each respectively \$125.

Each of these lots will be sold upon the lot respectively, and none of them will be sold for a less sum than the value thereof, as above stated.

One-fourth of the price bid on any of said lots shall be paid in cash at the time of sale, and the remainder in three equal payments on or before, one, two and three years from the date of said sale, with interest on such deferred payments at the rate of 10 per cent per annum, payable annually; provided that the payment may be made in full at any time at the option of the pur-

The said sale will begin on the 15th day of May, 1897, at the hour of 2 o'clock p. m. of said day, and will continue from time to time until all of said lots shall be sold. Dated this 13th day of April, 1897.
GILBERT W. PHELPS,
Recorder of Dalles City.

#### Notice.

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF CUBRENCY,
WASHINGTON, D. C., June 5, 1897.

Notice is hereby given to all persons who may have claims, against "The Dalles National Bank" of the city of The Dalles, Oregon, that the same must be presented to H. S. Wilson, receiver, with the legal proof thereof, within three months from this date, or they may be disallowed. THE FIRST BATTLE is an interesting story of the great political struggle of 1896, its most important events and the many issues involved; a logical treatise on Bi-metallism as uttered by eminent exponencs, including the part taken by Hon. W. J. Bryan in the silver agitation prior to the Democratic National Convention, and during the campaign; the best examples of his wonderful oratory, the most noteworthy incidents of his famous tour, a careful review of the political situation, a discussion of the election returns and the siguificance thereof, and the future possibilities of Bi-metallism as a political issue.

JAMES H. ECKELS, Comptroffer.

#### Assignee's Notice.

Notice is hereby given that the undersigned has filed his final account as assignee of the estate of Young Quong Lee Juke Tow and Da-Ong Tong Tang, partners doing business under the firm name of Wai Tat, Young Quong Company and Young Quong insolvent debtors, with the Clerk of the Circuit Court of the State of Oregon for Wasco County. That said final account will come on for hearing in said Court on the first day of the next regular term of said Court Court, to wit: The second Monday in November, 1897, at the hour of 10 o'clock a. m., or as soon thereafter as the matter can be heard.
