INCUDENT WITH ANDOMINA

A Drummer Tells of a Bad Case-Why He Quit the Farm. "Was I ever troubled with insomnia?" exclaimed the Chleago drummer, in reply to the question of an acquaintance,

relates the Detroit Free Press. "Only one season, when I was about 18 yearold, but that was enough. Don't care for any more of it in mine, thank you." "Do you mean to assert that you had the insomnia at the early age of 18?" demanded the other.

"Didn't assert anything of the kind, I said I was troubled with insomnia, not that I had it. The parky who had it was an old farmer for whom I was working at that time, and he had the queerest and also the most persistent and malignant case of it I ever heard of. Couldn't sleep mornings after fou: o'clock, and he used to get out under my window and begin splitting wood and singing like a whole camp meeting. "No use trying to sleep after that, so I used to take the hint and get up and

go to work. "Then evenings his insomnia would come on again so he couldn't get to sleep, and to kill time he would take : lantern and go out to the barn and thrash grain of husk corn until about midnight, and if course I was expected to go along and keep my end up.

"Well, things kept on in this way until that insomnia of his came plaguey near wrecking my constitution, and then I collected my back pay and quit. That was my last experience on a farm Keeping awake 19 hours a day, not to mention the hard work, was a trifle more than I could stand, so I decided to get out and go into some business where I wouldn't have to hang around the premises and help sit up night: with my employer's insomnia, in case be happened to have it. That's why I like traveling-my boss can have insomnin, or fits, or anything he likes, and I won't know a thing about it until I come to draw my month's salary."

DO IT NOW. Everyday Advice for Everyday

People-Procrastinatio A successful business man says that he owes much of his prosperity to a lesson taught him by his employer. This man's principle was: "Do it now." Instead of putting things off, says the Natural Stockman, with the idea of attending to them "some time," he made it a rule to "do it now." Thus he was often in advance of his competitors, both in taking hold of a good thing or letting go of an unprofitable one. This principle may be applied to the smaller affairs of life as well as to the more important. The little things we ought to lo and don't do worry us most. "Som: time" they must be attended to, and the oftener they are brought to mind and dismissed again to that indefinite time the more trouble they give us. Then after all we are often surprised to find how little trouble it is to attend to these things, and want somebody to kick us for not realizing it sooner. Happy is the man whose rule s promptness in all element
