PRICES OF CATTLE.

Regarding the effect on next year's prices wrought by the very heavy sales of cattle in Oregon this season, a well known livestock buyer gives the East Oregonian this opinion:

"An enormous quantity of beef and stock cattle has been shipped from Oregon this year. From Huntington went 15,000 head; from Arlington, 7,000 head; from Pendleton went 4,000; from Heppner were shipped 1,000 head; from Elgin, Echo and The Dalles and other Eastern Oregon points were shipped several thousand more, bringing up the total to no less than 30,000 to 35,000. On an average valuation of \$20 per head these cattle brought the growers between \$600,000 and \$700,000, a handsome sum, and representing a 10 per cent. return on \$6,000,000 or \$7,000,000, as business men are accustomed to put it.

"I have heard of late frequent comments as to what effect this heavy selling will have on next year's prices. It is assumed that the selling down so closely and draining the country of stock cattle will insure higher prices for next year in this section. This view I am compelled to combat. People have not thought carefully when they have given any such opinion. Let me give you my analysis of the situation.

"The greater part of these Oregon cattle which were shipped East, and most of the cattle shipped west East, were stock cattle for the ranges of Nebraska, Montana, Wyoming, the Dakotas and Colorado. They are simply taken to the big ranch ranges and fattened for the Eastern market. They are yet in the United States. The supply of beef prospective is not affected in the least. The cattle were merely moved from one locality to another, and are not yet thrown on the final market. So that, while Oregon has sold short, we are by no means to profit by the surety of a rise in price next year. Even though cattle are scarcer throughout all of Oregon, next year may see even lower prices than were paid this year, when so many cattle were sent out.

The situation among the coal miners is growing desperate, and it is only a question of time until there is blood shed. Already shots have been exchanged, but fortunately no one was hurt. It is plain to be seen that the operators are playing for delay, knowing that hunger will cause the strikers to commit acts of lawlessness and that then the government will have to interfere. The law must be upheld, and yet one who realizes the cruel oppressiveness of the mine-owners can hardly refrain from the wish that if blood is shed it will not all come from the veins of the miners. The latter are entitled to live, as well as the former; and death that comes suddenly from the rifle is preferable to starvation.

A specimen of England's dealing with weaker people is furnished from the Solomon Islands, where the English warship Rapid has been cruising among the small islands, destroying six villages and taking a number of hostages. This was done to punish the natives for the murder of Captain Gibbons. That is the way England arbitrates when she is strong enough.

If the Canadian government succeeds in collecting that 20 per cent royalty from the Clondyke miners,

this country should send a few of its officials up there to see how it is done. What Canada gets out of an American miner in the wilds of the Yukon in the shape of royalty she can deposit in the corner of her royal highness' eye. The Canadian police would make more money for their government if set at work mining.

Captains W. P. and James Gray are contemplating taking the old Oregon and California ferry-boat to the Yukon. Her hull is of steel, and once in the Yukon she would be a dandy. The Grays think she could make the trip all right, and there are plenty of people anxious enough to go to take their chances on her. It is not probable that this will be done, but it shows what chances a man will take when he gets the "yellow" fever.

The only business Congress has before it now is that of the Senate in confirming nominations made by the president. If the appointments were made and confirmed, it would serve two good purposes. Let the disappointed go and hunt a job, take the whole lot off the anxious seat, and let the country take a fresh breath with the knowledge that Congress had adjourned.

Parties going to the Yukon a week or ten days from now can buy a first-class outfit at Dyea cheaper than anywhere else in the world. There will be plenty of them for sale this side of the Chilcat summit soon.

What use is there in eating when food does you no good—in fact, when it does you more harm than good, for such is the case if it is not digested?

If you have a loathing for food there is no use of forcing it down, for it will not be digested. You must restore the digestive organs to their natural strength and cause the food to be digested, when an appetite will come, and with it a relish for food.

The tired, languid feeling will give place to vigor and energy; then you will put flesh on your bones and become strong. The Shaker Digestive Cordial as made by the Mount Lebanon Shakers contains food already digested and is a digester of foods as well. Its action is prompt and its effects permanent.

Doctors prescribe Laxol because it has all the virtues of Castor Oil and is palatable.

The True Remedy.
W. M. Repine, editor Tiskilwa, Ill., "Cheif," says: "We won't keep house without Dr. King's New Discovery for Consumption, Coughs and Colds. Experimented with many others, but never got the true remedy until we used Dr. King's New Discovery. No other remedy can take its place in our home, as in it we have certain and sure cure for Coughs, Colds, Whooping Cough, etc." It is idle to experiment with other remedies, even if they are urged on you as just as good as Dr. King's New Discovery. They are not as good, because this remedy has a record of cures and besides is guaranteed. It never fails to satisfy. Trial bottles free at Blakeley & Houghton's Drug Store. (4)
