Stands at the Head.

Aug. J. Bogel, the leading druggist of Shreveport, La., says: "Dr. King's New Discovery is the only thing that cures my cough, and it is the best seller I have." J. F. Campbell, merchant of Safford, Ariz., writes: "Dr. King's New Discovery is all that is claimed for it; it never fails, and is a sure cure for Consumption, Coughs, and Colds. I cannot say enough for its merits." Dr. King's New Discovery for Consumption, Coughs and Colds is not an experiment. It has been tried for a quarter of a century, and today stands at the head. It never disappoints. Free trial bottles at Blakeley & Houghton's drug store. 1

THE NEW YORK WORLD

THRICE-A-WEEK EDITION.
 18 Pages a Week. 156 Papers a Year

It stands first among "weekly" papers in size, frequency of publication, freshness, variety and reliability of contents. It is practically a daily at the low price of a weekly; and its vast list of subscribers, extending to every state and territory of the Union and foreign countries, will vouch for the accuracy and fairness of its news columns.
 It is splendidly illustrated, and among its special features are a fine humor page, exhaustive market reports, all the latest fashions for women and a long series of stories by the greatest living American and English authors,
 Conan Doyle, Jerome K. Jerome, Stanley Weyman, Mary E. Wilkins, Anthony Hope, Bret Harte, Bradford Matthews, Etc.
 We offer this unequalled newspaper and The Dalles Twice-a-Week Chronicle together one year for \$2.00. The regular price of the two papers is \$3.00.

General Debility and Loss of Flesh

Scott's Emulsion has been the standard remedy for nearly a quarter of a century. Physicians readily admit that they obtain results from it that they cannot get from any other flesh-forming food. There are many other preparations on the market that pretend to do what

SCOTT'S EMULSION

does, but they fail to perform it. The pure Norwegian Cod-liver Oil made into a delightful cream, skillfully blended with the Hypophosphites of Lime and Soda, which are such valuable tonics, makes this preparation an ideal one and checks the wasting tendency, and the patient almost immediately commences to put on flesh and gain a strength which surprises them.

Be sure you get SCOTT'S Emulsion. See that the man and fish are on the wrapper. 50c. and \$1.00, all druggists. SCOTT & BOWNE, Chemists, New York.

GREAT UMBRELLA AT OMAHA.

Novel Mechanical Device at the Trans-Mississippi Exposition. The last Paris exposition had its Eiffel tower, Chicago had its Ferris wheel, Nashville has its gigantic seesaw. The department of concessions of the Omaha trans-Mississippi exposition of 1898 has also received application for space for the erection of a novel mechanical device. It resembles the framework of a gigantic umbrella more than anything else which might be mentioned. The part corresponding to the stick of the umbrella is an immense cylinder, 30 feet in diameter, constructed of steel plates firmly riveted, making a stand-pipe which rears its head 250 feet above the level of the ground. At the extreme top of this cylinder are fastened 12 long arms, resembling the ribs of an umbrella. These are steel trusses, reaching almost to the ground. At the lower end of each of these ribs is suspended a car for carrying passengers, each car having a capacity for 20 persons.

These monster ribs are raised by hydraulic power, acting by means of steel cables operating through the cylinder, aided by a mechanism greatly resembling that portion of an umbrella which comes into action when the umbrella is opened. By means of this mechanism the gigantic arms are raised until they are horizontal, the cars in the meanwhile being carried outward and upward until they reach a point 250 feet above the ground. The diameter of the huge circle formed by the suspended cars is also 250 feet. When the highest point has been reached another mechanism comes into play and the suspended cars are swung slowly around in a circle, after which they are lowered to the ground. The sides of the cars are of glass, so that the passengers may secure an extensive view of the surrounding country.—Manufacturer.

SNAKES PLAN A ROBBERY.

An Ingenious Arrangement by Which Bank Swallows Were to Be Caught. A number of Baltimore naturalists had an unique experience the other day while on an ornithological excursion. They were searching for bank swallows in the neighborhood of Tolchester beach, about a mile from the pier where the excursion boats land. The nests of bank swallows are built in holes in perpendicular banks, generally in colonies, dozens of holes being only a few inches apart. The bank the young men were exploring was about 30 feet in height, with the nests averaging seven feet from the top. The bank was almost perpendicular and the nests were reached by means of ladders constructed of trees. One of the naturalists, after working for some time at one of the nests, felt his hand come in contact with something unusual. Drawing out his hand and looking into the hole he was surprised to find, coiled down at the bottom a huge blacksnake, which, after being gotten out and killed, proved to be nearly seven feet in length. Afterward two other snakes, equally as long, were found in different holes. The surface of the bank was perfectly smooth, so the only possible way for the snakes to have reached the nests was to have let themselves down from some short overhanging roots at the top of the bank. The snakes seemed to have worked along the bank from nest to nest, as several nests were found in which were eggs that had been emptied of their contents. In a nest with one of the snakes was a bird which had been lately killed, and which the snake evidently was about to devour when its own end came. The naturalists said they had been collecting eggs for many years; but had never before seen anything so like a well-planned attack of snakes upon birds' eggs.—Baltimore Sun.

NOTICE—SALE OF CITY LOTS.
