The shipping season promises to be a long one, and will extend pretty well on toward another year. Estimates made by operators are to the effect that not more than one-fourth of the crop has been sold, and of this amount not more than two-thirds has reached tidewater. English buyers are not so anxious for wheat as they were a short time ago, and are inclined to hold off as long as possible, in the hope that the brightening prospects in other portions of the world will have a tendency to weaken the American market. Australian and Argentine crop reports grow brighter with each advice received from there, and indications are favorable for India becoming quite a heavy exporter. In the face of these facts, growers are beginning to think that there is a quite a large element of chance in keeping 80c wheat in the granaries. Two cargoes finished loading yesterday, and two more will finish today,
