Thin Blood

Where the blood loses its intense red—grows thin and watery, as in anemia, there is a constant feeling of exhaustion, a lack of energy—vitality and the spirits depressed.

Scott's Emulsion

of Cod-liver Oil with Hypophosphites of Lime and Soda is peculiarly adapted to correct this condition. The cod-liver oil, emulsified to an exquisite fineness, enters the blood direct and feeds its every corpuscle, restoring the natural color and giving vitality to the whole system. The hypophosphites reach the brain and nerve centres and add their strengthening and beneficial effect. If the roses have left your cheeks, if you are growing thin and exhausted from overwork, or if age is beginning to tell, use SCOTT'S Emulsion.

Be sure you get SCOTT'S Emulsion. All druggists; soc. and \$1.00. SCOTT & BOWNE, Chemists, New York.

GOT RID OF THE CATS.

Clever Plan of a New York Landlord to Rid His Premises of Sereenators.

The inhabitants of a row of fine flat houses in the Harlem district of New York have for a long time past been greatly annoyed by nocturnal cat choruses, says the Pittsburgh Dispatch. In desperation plans of poisoning and shooting were discussed, but the owner of the flats, who resided in one of them, and was a law-abiding man, determined to adopt a better plan, and have some sport at the same time. Placing two traps on either side of the alleyways adjoining his flats, he attached wires to the traps, making a wire connection with an electric bell in his cellar. When a frisky feline took the bait, he came quickly on the scene and put the quarry into a bag. Captives were turned over to the S. P. C. A. and taken away in batches of from three to ten every night. When about 70 of the unwelcome serenaders had been transferred in this way, the strain on the society proved too severe, and the landlord was told to do his own execution in future.

His first idea was to electrocute the animals, but he found that the apparatus necessary was somewhat too elaborate. Finally he took the simpler way of inserting in a barrel a tube connected with a gas jet. The cat was dropped in, the lid was shut down, the gas was turned on and the driver of the dead wagon was told by telephone to call.

The neighborhood is now cleared of cats, and the slumbers of the sleepers in the flats are no longer disturbed.

THE MOST POPULAR WOMAN.

Dolly Madison's Frank, Cordial Manner, and Ingenious Demeanor.

No woman is more closely or fondly associated with the white house than Dolly Madison, writes Clifford Howard of "When Dolly Madison saved the Declaration of Independence," in Ladies' Home Journal. During the eight years that her husband occupied the position of secretary of state under Jefferson's administration she was almost as frequently called upon to do the honors at the receptions and levees at the president's house as in her own home, where she entertained in a delightful and sumptuous manner. She was, therefore, fully prepared for the duties that devolved upon her as mistress of the white house upon the election of Mr. Madison to the presidency. In the graceful and skillful performance of her delicate task she gained the admiration of everyone, and added to the popularity she had already won both for herself and her husband. Through the potent influence of her personal charms, to which were added a frank and cordial manner, a sweet, ingenious demeanor, and the happy faculty of adapting herself to the views of those about her, she readily became a general favorite. Before her reign at the white house was concluded she was the most popular woman in the United States.

Birds Strangely Concealed.

Mr. A. H. Thayer, an artist, believes he has discovered that the light color of the under parts of birds and small mammals serves to conceal them from their enemies. At a recent meeting of the American Ornithologists' union he proved by experiments that an object nearly of the color of the ground, like a potato, is very conspicuous when placed a few inches above the soil and viewed from a little distance. But when the under side is painted white and gradually shaded into the color of the upper part, the object disappears by blending with the ground; the whiteness beneath counteracts the effect of the shadow of the body.

The three-year-old boy of J. A. Johnson, of Lynn Center, Ill., is subject to attacks of croup. Mr. Johnson says he is sure that the timely use of Chamberlain's Cough Remedy, during a severe attack, saved his boy's life. He is in the drug business, a member of the firm of Johnson Bros., of that place, and they handle a great many patent medicines for throat and lung diseases. He had all these to select from, and skilled physicians to answer to his call, but selected this remedy for use in his own home at a time when his boy's life was in danger, because he knew it to be superior to any other, and famous the country over for its cures of the croup. Mr. Johnson says this is the best selling cough medicine they handle, and that it gives splendid satisfaction in all cases. Sold by Blakeley & Houghton.

Effect of Electricity on Seeds.

Experiments recently made at the Massachusetts agricultural college tend to prove that electricity exerts an appreciable influence on the germination of seeds. When a current of the proper strength is applied it hastens the germination and early growth of the sprouts, but its influence diminishes as the plant increases in size. Seeds subjected to a single application of electricity show the effect for only a few hours, but if the current is applied hourly it acts constantly, except that as the plants mature the beneficial effect is gradually lost.—N.
