### THE FUNNEL TRICK.

As Interesting Problem Devised by Sport Ive Californian Jerry Lynch has finally learned the

4 00

2 00

8 00 funnel trick. He took it in two doses-\$ 00 23 60 one on one evening and the other the next. The senator sauntered up to the 8 00 Bohemian club the other day and saw 2 00 2 00 two or three of the younger members al-2 00 tempting a new feat, and he watched 6 00 them with interest. One of them, says 4 00 the San Francisco News Letter, stuck a funnel in the ten of his trousers, threw 2 00 his head back, placed a 50-cent piece on 12 00 his forehead an I tried to drop it in the 8 00 funnel by slowly lowering his head. s 00 After all had feiled Jerry insisted on 8 00 trying it, though all had tried to 6 60 dissuade him from attempting a feat too 2 00 difficult for them. The funnel was 2 00 placed in the waisthand of his 4 60 trousers and he hrew lack his head to 2 00 receive the coir in his expansive brow. 2 00 At that juncture a pitcher of ice water

was emptied into the funnel, and by the 8.00 time Jerry not through dancing the 25 20 jokers had vanished. The senator's 8 00 temper improved with dry raiment and 6 00 the next night at the club he started in 2 00 to show a couple of friends the funnel 4 00 trick.

"It's this way," he explained, "you 6 0 4 00 put the funnel in the top of your pantaloons, so, then throw your head back. 8 00 4 00 so, and-wow!"

Again Jerry was forced to change his 4 00. 6 00 raiment, and he is not showing people 41 00 what he knows about the funnel trick. 4 00

#### HARD ON CATS.

34 20 2 00 A French Government Commissioner Censures the Conduct of Official Cats. 6 00 The French government has just had 4 00 occasion to appoint a commission to 8 50 inquire into the grievances of the cuts in its employ. Their report is an amus-46 00 45 40 ing exhibition of official stupidity, and 48 (0 will rouse a righteous indignation in 4 00 the bosom of all friends of the use'ul 2 00 2 00 mouser.

40 00 It appears that cats are kept in some 2 00 of the French military, magazines to 2 00 keep down the surplus population of 45 60 rats and mice. Their food is regulated by ministerial decree according to cir-44 80 43 60 cumstances, and at present there is a 45 60 regulation in force authorizing an ex-49 00 40 40 penditure of 212 centimes per cat per diem. But this does not seem enough. 40 00 40 30 as the unfortunate governmental cats 2 00 have grown extremely thin, so at had 2 00 the ministry appointed specialists to 43 20 inquire into the matter. These have 8 20 gravely reported that "the cats of the 5 00 16 40 selver to the diet prescribed by the ros-26 00 ernment circular. Thus they seldom 12 00 4 00 ent brend, and never lap up gronsy wa-4 00 ter unless actually driven thereto by 4 00 pangs of hunger, so that they are dving 12 00 off or else abandoning the military mag-16 40 azines." 17 00

#### A Chinese Pliedriver.

Piles were being driven in one of the 4 00 new buildings for a foundation for a 12 25 punch. They were eight linches in 3 30 diameter and fourteeen feet long. The 75 00 staging was bamboo, and so was the 4 35 frame for the hammer, which was a IT round piece of cast iron, with a hole in 17 75 the center for a guide rod. Attached to the hammer block were 27 ropes, car-6 50 ried up to the top of the frame and down \$ 60 on the outside, looking very much like 00 the old-fashioned Maypole. Twenty-00 seven women had hold of the ends, a 4 00 with a sing-song, all together, pulled down; up the rod, four feet, trus-2 65 eled the hummer; then, at a scream, all 4 35 let go, and down it came on top of the pile, which was protected by a band or ring. The women were paid 20 cents in 43 00 gold per day. This Maypole driver is 8 00 in general use throughout Japan and China. 8 00

and we furnish it with the Semi-Weekly Chronicle one year for \$1.75, cash in advance.

#### REVERSING NATURE'S PROCESS. 8 00

Some Things That Would Happen If Experimentalists Had Their Way. The reversibility of the physical processes of nature has latterly been the subject of interesting comment, save Cassier's Magazine. Lord Kelvin, for example, has been credited with saying that all of them, no matter how complex they might appear to the human senses, consist in reality of the motions of invisible molecules, and if, therefore. by some means, all these molecules could, at the same time, be made to move in exactly the opposite direction, and each with the same velocity that it possessed at the moment, all the world would begin and continue to move backward: waterfalls would flow up the sides of cliffs; rivers would run upward from the sea; rain would rise; fullblown flowers would shrink into buds and plants dwindle into seedlings, man himself would become young again, passing from old age to infancy. Just what kind of pictures such a topsyturvy world would present may be seen Family work at reduced rates. Wash collect and delivered free. Telephone No. 301. with a kinetoscope running backward. Prof. Queroult, according to report, has made observations in this line, and some time ago communicated them to the French academy of science.
