This starch is prepared on scientific principles by men who have had years of practical experience in fancy ironing. It restores old linen and converts cheap to high quality whiteness and imparts a beautiful and lasting luster. It is the only starch manufactured that is perfectly harmless, containing neither arsenic, alum or any other substance injurious to linen and can be used even for a baby's powder. For sale by all wholesale and retail grocers.

LOOK OUT FOR A STRAY MOON.

Round Black Body 600,000 Miles Away Wanted by an Astronomer. American astronomers are requested to keep their eyes open for a stray moon, which Dr. Waltemath, of Hamburg, is anxious to find again. His subject, says the New York Sun, is to account for and control certain irregularities in coming to time on the part of the old moon that we are accustomed to see. He knows exactly what sort of a moon he wants and where it ought to be. Its apparent diameter is 147 seconds, but its real diameter is 420 miles, its surface about one-twenty-fifth and its bulk one-eighth that of the visible moon, and it is 615,000 miles distant from the earth, and two and two-thirds times as far as our moon.

This little moon has been seen a number of times in the last 200 years. During the seventeenth century it appeared as a fiery red ball with a white streak across it. Later observers describe it as of the dark gray color of the spots on the moon, and as a round, black body, so that it had probably cooled off in the interval. Cassini, the father, saw it at Montpellier November 7, 1704, and seven other appearances are noted in that century. Dr. Ritter, a Hapsburg school-teacher, saw it with the naked eye in broad daylight in the neighborhood of Naples June 11, 1855. It crossed the sun from right to left. Mr. Govey saw it at North Lewisburg, O., September 4, 1870. None of the observers had any idea of its true nature, however, till Dr. Waltemath made his discovery.

February 3 of this year the little moon passed over the sun, and it will do it again July 30. Its mean synodic course is 177 days, and its daily motion a little over three degrees. Anyone noticing its wanderings will please inform Dr. George Waltemath at Hamburg-on-the-Elbe.

Smoke Cigars.

Why do we retail more Cigars than others? Why do smokers go out of their way and pass cigars of the same grade?

Not because we have better cigars or better brands, or any greater variety; no, not that.

Why, because we have the finest cigar case in the state and keep our cigars in better condition. Snipes-Kinersly Drug Co.
