Beware of Ointments for Catarrh that Contain Mercury.

Mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them.

Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Price 75c. per bottle.

Beats the Klondike.

Mr. A. C. Thomas, of Marysville, Tex., has found a more valuable discovery than has yet been made in the Klondike. For years he suffered untold agony from consumption, accompanied by hemorrhages; and was absolutely cured by Dr. King's New Discovery for Consumption, Coughs and Colds. He declares that gold is of little value in comparison with this marvelous cure; would have it, even if it cost a hundred dollars a bottle. Asthma, Bronchitis and all throat and lung affections are positively cured by Dr. King's New Discovery for Consumption.

Tryal bottles free at Blakeley & Houghton's drug store. Regular size 50 cents and \$1.00. Guaranteed to cure or price refunded.

"A word to the wise is sufficient" and a word from the wise should be sufficient, but you ask, who are the wise? Those who know. The oft repeated experience of trustworthy persons may be taken for knowledge. Mr. W. M. Terry says Chamberlain's Cough Remedy gives better satisfaction than any other

in the market. He has been in the drug business at Elkton, Ky., for twelve years; has sold hundreds of bottles of this remedy and nearly all other cough medicine manufactured, which shows conclusively that Chamberlain's is the most satisfactory to the people, and is the best. For sale by Blakeley & Houghton.

INSECTS AS OWNERS.

They Love Property More Than Themselves.

That bees have a sense of property rights is shown through their actions in defending their stores from plundering swarms. Bee robbing usually takes place when there is little nectar to be taken from flowers, and probably hunger incites to ill-gotten gain. It is interesting to note that strong colonies are seldom attacked, the weaker ones being the victims. The fury with which the owners of the honey will fight for its retention is sufficient, when once seen, to convince any doubter that bees, at least, have a sense of property. When the robbed swarm is overcome and the queen killed, the bees will desert and join the robbers and help carry their own stores to the hive of the marauders. This shows that it is a matter of property and not individual animosity which inspires them, otherwise they would fight to the death. Bee hunters say that when taking up a bee tree, or a bee hive for that matter, the bees will fight furiously until their comb is actually broken; then they give up, and, defeated and despairing, cluster on the broken comb, making no further effort to save themselves. There is something touching in the story of these brave little defenders of stores and home and their utter discouragement when they see their treasure broken and ruined. "Taking up" bee trees and bee hives is a barbarous performance and does not redound to the honor of man; and the thought of it quite reconciles one to all of the bee stings inflicted upon the genus homo since time began.

Another sign of the sense of ownership of stored provisions is the care given by the harvester ants of Texas and of India. These wise harvesters store their seeds in underground granaries for winter use. After the rains come, the grain, if left alone, would naturally germinate or become moldy. The ants comprehend this, and when good weather comes again they bring the grain up to dry in the hot sun, and then return it to the granaries.—Chautauquan.

Cure for Clover Sickness.

Clover sickness, a common disease which often ruins clover crops, has caused German scientists to make experiments. They have succeeded in getting cultures of the bacteria that produce the disease. They expect that soon farmers will be able to inoculate their land just as a human being may be treated.
