FRIDAY - AUGUST 12, 1898

#### WAYSIDE GLEANINGS.

Fruit jars and cans at Mays & Crowe's. Today—Salt water fish, salmon, crab, lobsters, at Bonn Bros.' Market.

Now is the time to spray with Paris Green. Clarke & Falk have the strongest you can get.

Crushed violets, the latest flavor for ice cream soda at the Columbia Candy Factory. Give it a trial.

Round trip rate from The Dalles to Bonneville or Multnomah Falls for the excursion is only 50 cents.

Furnished rooms to rent, also suites of rooms suitable for housekeeping. Apply to 19 and 20, Chapman block.

One of the main features at Bonneville Sunday, August 14th, will be a genuine, old fashioned, Rhode Island clam-bake. Round trip fare only 50 cents.

The Salem police do not spare sex or age in the enforcement of the bicycle ordinance. Monday night a young woman was arrested for not having a light on her bicycle.

Ice Cream wholesale and retail at the Columbia Candy Factory. Orders to furnish lodge socials and ice cream festivals solicited. Don't forget that our ice cream sodas are the best in the city.

The O. R. & N. Company will run a special coach between this point and Bonneville Sunday, August 14th, for the accommodation of excursionists, going on the 6:55 a. m. train and returning from Bonneville at 3:30 p. m.

Sunday, August 14th, will undoubtedly be the banner day of the season for Bonneville excursionists. There will be several new features in the entertainment on that date. Round trip fare from The Dalles only 50 cents.

The heavy clouds of smoke which seem to be enveloping the country in the vicinity of Mt. Hood, it is reported are caused by immense forest fires which are raging about fifteen miles from the mountain to the southwest.

A party of tourists came up on the Dalles City last evening. Among them were Mrs. A. D. Sharon and Miss Sharon of San Francisco, and H. H. Tetault of New York. They spent last evening in viewing the city, and we trust were favorably impressed.

Anyone having relatives among the fifty-seven volunteers from this place, may have an opportunity to address the rosters which are to be kept for them until their return, by calling at Mrs. Phillips' millinery store between the hours of 9 a. m. and 5 p. m. today and tomorrow.

The preliminary hearing of Curley Keith was held before Recorder Gates last evening at 7:30 o'clock. Keith, who was accused of stealing \$23 from the steward of the Dalles City, waived examination and was bound over to await the action of the grand jury at the next term of court.

Reports from Dufur yesterday afternoon state that the atmosphere is full of smoke, caused by forest fires in that vicinity. We, too, are beginning to notice the effect of these dreaded fires, which not only destroy our forests, but obscure

the view of tourists and mountain-climbers and make the air oppressive as well as unbearable.

Every day the warehouses are being cleared of the wool clips consigned to them, the prevailing price seeming to be from 13 1/2 to 14c.

In the fire which occurred Sunday at Goldendale when the house of C. W. Hess was destroyed, B. W. Gilmore, an aged man and a member of the Gilmore family so well known in Oregon and Washington, was seriously burned. Tuesday evening the old gentleman died from the effect of the injuries received.

It may have been extremely hot in this city and neighborhood; we will not dispute the fact. However, while in every exchange we peruse is mentioned the fact that people in cities, and harvest hands as well, are overcome by the heat and prostrated, we have yet to chronicle the first instance of such an occurrence having taken place here.

Next Saturday evening the fruit-growers and shippers of this vicinity will have an opportunity to hear something which will be to their advantage. On that occasion a meeting will be held at the council chambers, which will be addressed by Wm. Weathered, who is an expert in handling fruit. Parties who are interested will no doubt be pleased with the opportunity to hear him speak.

And now Baker City is becoming alarmed over the scarcity of the water supply, and the water committee has prohibited lawn and street sprinkling. Dalles people have much to be thankful for. While many cities in Eastern Oregon have the same catastrophe confronting them, we are blessed with a good supply of water and the broad Columbia flows by our doors, so that we are sure of a never-failing supply.

One of the features which makes The Dalles such a beautiful little city is its trees. However, there is a great enemy of the poplar tree, especially, abroad in our city, and its effects are very noticeable in the withered branches. It is a species of the caterpillar which attaches to the branches and weaves a web about itself, gradually enlarging it until the entire tree is enveloped. This might be prevented were the owners careful to keep a sharp lookout for the slightest appearance of the destructive insect, when the branch could be cut off and thus prevent them spreading.

The Antelope Herald, which for several months has been edited by M. E. Miller, son of G. W. Miller, of this city, has changed hands and will now be owned and edited by Mr. Fred N. Wallace, who for some time has been a resident of Mitchell, but who was brought up in Antelope. Fred is a bright, energetic young man, and his friends in The Dalles wish him success in his new undertaking, while the members of the newspaper fraternity welcome him to that field of labor, and have nothing but the best wishes for his future prosperity.

Wednesday was the hottest in the history of Pendleton. At 11 o'clock the thermometer stood at 111 degrees. In the afternoon it reached 119 degrees at the voluntary observer's office. Other thermometers about town read from 114 to 122 degrees. Some attribute 2 or 3 degrees of the heat to the fires in the wheat fields four miles east of the city.

Business was quiet and people haunted cool places. The woolen mills shut down in the middle of the afternoon on account of the heat. There were no prostrations in the city, but a number of horses and men were overcome in the wheat fields.

The yield of grain at Olex, in Gilliam county, is remarkably large. There is hardly an acre that does not produce from 22 to 27 bushels, and in places the latter figure is exceeded. The farmers will make a big profit if they can get enough men and machines to harvest and thresh the crop. At present threshing machines are scarce, and farmers who failed to engage them beforehand will have to take their turns in the waiting lines. The farmers say a few years ago machines could be had at any time, but this year they are comparatively few in proportion to the acreage, and they command a good figure.

From the amount of fruit boxes which are daily piled up in front of the Pacific Express Co.'s for shipment one would suppose that little would be left for the needs of the local trade. But the supply is inexhaustible and there is plenty and to spare. However, is it not the case that in many instances the best is shipped and that which is second best kept at home? We have heard many complaints to that effect; but have concluded that as "the proof of the pudding is in eating it" the CHRONICLE force will have no opportunity to refute the charge unless some of our friends who have fruit farms afford us a chance to test the matter—and the fruit as well.

Residents of this city had begun to think that the promise of cooler weather, given by Observer Pague, was never to be fulfilled, when yesterday the thermometer dropped several degrees and stood at about the 90 mark. While this would not be considered anything but very warm at another time, to people who have been sweltering for about three weeks it was a decided relief. Mr. Pague's latest report says: The area of high barometric pressure continues off the Northern California coast, slowly moving northward. From this, "high" cooler weather is expected to prevail Friday and Saturday over the Pacific Northwest. Accompanying the fall in temperature will be clouds and probably rain along the coast. The current warm period east of the Cascades is phenomenal.

Fire started at 2 o'clock Wednesday afternoon in Edward Linsler's field, four miles east of Pendleton, between the Umatilla river and Wildhorse creek. It destroyed three settings of wheat from 140 acres, being about 2700 bushels. Desperate fighting by Mr. Linsler, assisted by his men, saved two other settings, which had been given up for lost. The flames spread and destroyed 80 acres of barley, or 3200 bushels, and 80 acres of wheat, or 2000 bushels, belonging to Earhart Bros. Peter Tecalo lost 3000 bushels of wheat, which had been threshed and covered, ready for hauling to Pendleton. Linsler's and Earhart's grain was headed, but not threshed. Linsler's wheat was not insured. Fire destroyed wheat fields between Adams and Athena. Names and amounts are not obtainable.

FOR SALE BY

## ...Maier & Benton

..THE HARDWARE DEALERS..

167 Second St. THE DALLES, OR.

#### New Snake River Steamer.

The O. R. & N. Co. has commenced work at Riparia on what is intended to be the finest and fastest steamer that ever ran on the upper Snake river. The new boat will be named the Spokane, and will have a third more power than the Lewiston, which was a big improvement on the boats which preceded her. The Spokane will be 160 feet long, with 35 foot beam and 4 1/2 foot hold. Her engines will be 18-inch cylinders, 7-foot stroke, and the boiler will carry 180 pounds of steam. On account of burning coal, there will be more room for freight, and she will easily carry 5000 sacks of wheat. She will be lighted by electricity, and have all the modern improvements. The cost will be about \$25,000. On account of not being able to get her boiler before December 10th, it will be the middle of December before she will be completed. The new boat will have the speed and power, with light draught, to more easily navigate the upper Clearwater than the company has been heretofore able to do with the Lewiston.

#### Better Than the Filter.

Dr. Martin of the New York board of health says that a sure safeguard against ill effects from contaminated water, and especially useful in the country, or at summer resorts, is the addition of five drops of peroxide of hydrogen to a glass of water a few minutes before drinking it. The liquid is obtainable at any drug store, it costs but a few cents, is absolutely harmless, tasteless and colorless. Its addition to the water only breaks it up into active oxygen and water, the former killing whatever germs or disease may be present in the water.

In purifying water in quantity, add 15 drops to the quart. This matter is equally efficacious and much more convenient than the ordinary way of boiling water to destroy possible germs. If a few drops of solution of sugar are placed in a glass of suspected water, and the glass is covered, if it is contaminated, will become cloudy and deposit a sediment after a few hours.

#### The Library.

Have you taken a membership in the circulating library? If not, you cannot realize how much you are missing. Twenty-five cents a month is such a small sum for the privilege of access to so many good books. While a person can keep a book no longer than two weeks without paying a cent a day extra for it, even the busiest people can finish reading a story in that time, while many take three or four in that interval. Since obtaining extra funds for the purchase of books, many late publications have been added to an already choice selection; and every day the best of additions are made. Everyone should take advantage of this opportunity to secure good reading matter.

#### Look Out.

All persons using the city water for irrigating purposes are warned that any infringement of the rules will be strictly enforced. J. B. CROSSAN, Supt.

Truth wears well. People have learned that DeWitt's Little Early Risers are reliable little pills for regulating the bowels, curing constipation and sick headache. They don't gripe. Snipes-Kinersly Drug Co.
