BLAMING IT ON COLUMBUS.

One of the Madrid papers has located the source of Spain's troubles. The name of the culprit is Christopher Columbus. Under the royal auspices of Spain he discovered a new continent and hoisted over it the Spanish flag. That is believed by the Madrid analyst to have been the germ of Spain's future decline. To be sure, the nation seemed to reach its period of greater glory at a later date, but it is assumed to have been but a deceitful and dangerous expansion. If Columbus, who was an Italian carpet-bagger, and one of those eloquent visionaries to whom it is perilous to listen, had but kept away from the court of Ferdinand and Isabella all would have been well. Some other nation would have discovered America and been compelled to stand it. Spain's development would then, it is argued, have been along the northern borders of Africa, a region with which it had close relations, and with which it fought as well as intermingled for centuries. Therefore, it is contended that the dust of the great but baleful navigator should not be removed from Havana to Spain. If sovereignty must be relinquished, all the emblems of bad luck ought to go with it.

If Columbus were alive he might have something to say in extenuation of his voyage of 1492 and of some of its sequels personally unpleasant to himself while he still remained in the flesh. Fate was not particularly kind in making him an explorer. It was from no malicious premeditation that he went into the new continent business. If he had never met and married a pretty Portuguese girl whose father was an old sea dog with chests full of charts Columbus might have lived and died the skipper of a fishing boat, equally obscure and happy. But those ancient manuscripts, which were the chief part of his wife's inheritance, fired the imagination of Columbus. He took the superficial view that discovering a new world would not necessarily ruin himself nor the country he represented. There was no way by which he could foresee that an early Spanish-American revolutionist in a colony founded by himself would some day clap him in chains and send him back to Spain. Ferdinand lived long enough to feel uneasy when Columbus was around. The prophetic soul of the monarch may have warned him that there are two sides to running a continent as a royal diversion.

Some balm for the Spanish mind is found in the thought that the present embarrassments of Spain are due to a geographical and quite accidental cause over 400 years ago. The Norsemen discovered America long before that, and were smart enough to keep quiet about it. So were the sailors now known to have visited the coast of Brazil before Columbus. The Asiatics who previously entered America by crossing Behring Strait also maintained a prudent reserve. But the Genoese enthusiast treated the matter effusively, and poor Spain, overcome by a false sense of grandeur, weakly consented to take the continent. Worse than that, Magellan, deluded by the specious fame of Columbus, went roaming about the Pacific, and in 1521 saddled Spain with the Philippines. If there had been no bright-eyed Lisbon girl with a truckful of old maps there would have been historically no Columbus, no Cuban question, and presumably, no Dewey. The Madrid editor does not go back far enough. There is a woman in the case, as usual.

In several very important respects

Dewey resembles Grant. He is original and audacious. Nobody ever hears him grumbling about any inadequacy of means at his command or the character of the task to which he is assigned. He does his work promptly and cheerfully with the forces at his disposal. He does it so thoroughly that it will never have to be done over again by him or anybody else. Dewey will, in history, have the primacy among the fighters of the Spanish war which Grant had among those of the war of secession. The contest for second and third place among the great personalities of the war of 1898 may be keen, but the first place belongs to Dewey.

Persons troubled with diarrhoea will be interested in the experience of W. M. Bush, clerk of the hotel Dorrance, Providence, R. I. He says: "For several years I have been almost a constant sufferer from diarrhoea, the frequent attacks completely prostrating me and rendering me unfit for my duty at this hotel. About two years ago a traveling salesman kindly gave me a small bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. Much to my surprise and delight its effects were immediate. Whenever I felt symptoms of the disease I would fortify myself against the attack with a few doses of this valuable remedy. The result has been very satisfactory and almost complete relief from the affliction." For sale by Blakeley & Houghton.

NOTICE.

Came to my place on 5-Mile over a year ago, a bright bay mare; weight about 1000 pounds; two white hind feet; no visible brand; scar on right hip. Owner can have the same by paying for this notice. Wm. Floyd. aug9-w4

About one month ago my child, which is fifteen months old, had an attack of diarrhoea accompanied by vomiting. I gave it such remedies as are usually given in such cases, but as nothing gave relief, we sent for a physician and it was under his care for a week. At this time the child had been sick for about ten days and was having about twenty-five operations of the bowels every twelve hours, and we were convinced that unless it soon obtained relief it would not live. Chamberlain's Colic, Cholera and Diarrhoea Remedy was recommended, and I decided to try it. I soon noticed a change for the better; by its continued use a complete cure was brought about and it is now perfectly healthy.—C. L. Boggs, Stumptown, Gilmer Co., W. Va. For sale by Blakeley & Houghton.

FOR SALE.

320 acres of land, estate of W. J. Meins, 10 miles south of The Dalles, 200 acres of which is good level tillable land, balance pasture with living water; Small house, good stables and barns. Make a Note of It.

It's a good thing to remember that there are many kinds of drugs: good, bad and indifferent. Drugs are important. Inferior drugs may not only fail to cure, but may prove worse than the original trouble. Purity of drugs is our hobby. They're the only kind fit to use.
