The University of Oregon is nothing if not progressive. Henceforth the Spanish language will be taught in that institution.

It has been decided by the young ladies of the Congregational church to give their Halloween party in the Masonic building, first floor. The date will be Monday evening, Oct. 31st.

The postmaster has requested that the attention of the public be called to the fact that box rent has been due for some time, and that notices to that effect have remained in their boxes unheeded.

The Osage City Free Press, a Kansas payer, editorially remarks: "A helpless little baby boy was born in our family yesterday." No other kind are ever born. They should not be expected to be able to shovel coal at birth. Some editors expect too much.—East Oregonian.

This morning J. H. Cradabaugh came down from his mines in the Greenhorn district, near Sumpter. He called at THE CHRONICLE office, and informs us there are six or seven inches of snow in that section. When it grows cold in the mining districts our genial friend can always find a warm reception in The Dalles.

Those who looked around for their Oregonians today realized that the local train was more to them than they had thought, as that necessary adjunct to all well regulated households—the Oregonian—now reaches us five hours later. Kick at it as we may, we're all proud of Oregon's leading newspaper, and can't get along without it.

The Southern Pacific railroad men who run through to California predict it is going to be a hard winter. You can't make them believe otherwise. They say the snow on Mt. Shasta has remained deep throughout the whole year, and this is one of the sure forebodings. There are many other signs, but they contend that this one never fails.

At 12:30 p. m., Sunday, while a west-bound train on the Washington & Columbia River railroad was coming round a curve at a point about five miles east of Pendleton, it ran over a 2-year-old boy, the son of D. B. Watson, a farmer living at Mission. The child had wandered away from home, and in attempting to cross the railroad track, got caught in a cattle guard. The engineer did not see the boy until too close to stop the

train in time to prevent an accident. A part of the train passed over the leg of the boy, severing it from the body. The train was quickly stopped and the child picked up. The little fellow lived only fifteen minutes after being run over.

Is your eyesight failing you? Does it bother you to read by artificial light? Do you ever have pains in or about the eyes? Does your eyelids sometimes get inflamed? Is there anything the matter with your eyes, or do you imagine there is? Don't fail to call on the celebrated eye specialist, room 33, Umatilla House, and have your eyes examined free of charge.

Sunday afternoon at 3 o'clock at the residence of the bride's parents, near this city, Mr. W. G. Keys, of Mayville, Oregon, and Miss Belle Floyd were united in marriage, Rev. Poling officiating. Both of the young people are very well known in The Dalles, Miss Floyd having been brought up at the Floyd farm about five miles from the city, and Mr. Keys formerly living here and attending school at the academy. Monday morning Mr. and Mrs. Keys left for a trip to California and Sound cities. Upon their return they will make their home at Mayville, where the groom is engaged in the mercantile business. Their friends in The Dalles and throughout the country wish for them a successful and happy future.

The latest fad in church socials seems to be the "Match" social, which we notice are being held in many of our neighboring towns. Now, the public has never objected to the numerous kinds of socials given as a means of procuring funds for carrying on the work of our churches, and the young, as well as old, seem to enjoy these pastimes; but when the church goes to match-making its time to call a halt and for a chariot or two to convey its members to the region where matches are supposed to be made. Somehow it seems evident the ministers are the prime movers in this novel entertainment, as they receive the most substantial remuneration from knot-tying transactions.

#### Lively Sessions in Salem.

Yesterday afternoon in the house the principal business to come up was the bill providing for the protection of sturgeon. It was opposed by Roberts of Wasco and Sherman counties, upon the ground that it will destroy the sturgeon industry in the Upper Columbia, which gave rise to considerable discussion, and it is more than probable that it will be enacted for a period of only two years, to see how it works.

Today Mitchell's bill providing for the carriage of sheep by express was passed. The house passed a bill allowing Multnomah county to lease the upper deck of the steel bridge in Portland.

A bill also passed the house reducing the salaries of Marion county officials. An appropriation of \$25,000 will be allowed the state agricultural college to replace mechanical hall.

The house holds night sessions and is rushing all business to a finish.

#### WATER COMMISSIONERS MEET.

Contract for Improving Our Water System Awarded to the Pacific Bridge Company.

A special meeting of the board of water commissioners was held last night at their office for the purpose of examining bids for improving our water system. T. J. Seufert, M. Randall, J. B. Crossen, J. S. Fish, E. C. Phirman and S. Bolton were present.

After a short time was spent in the consideration of minor matter which had come before the board, the following bids were read and considered:

Sidney, Smith and Inquet bid for furnishing all material and labor complete.....	\$10618 34
Pacific Bridge Company bid for furnishing all material and labor complete.....	9433 45
Mays & Crowe, for material only, and not including pressure valve.....	6163 13
Maier & Benton, for material only, and not including pressure valve.....	6125 32
W. R. Brown, for labor only.....	3614 80

The board after due consideration, having examined the bids awarded the same to the Pacific Bridge Company.

It was decided instead of the 12-inch automatic pressure regulating valve to substitute an 8-inch automatic pressure regulating valve with by pass and a 12-inch hydraulic lifting valve, connected to the engine house on 3d street with a 3/4 galvanized pipe, said valve to open by the draining of such, the addition of said change to cost \$250.00.

#### Wool, Wheat and Sugar.

Dun's Weekly Review of Trade says: "The large Eastern advances on wool to be held for higher prices had helped to retard the natural decline in that product, of which 100 quotations by Coates Bros. of Philadelphia average 18.71 cents, against 20.83 cents February 1, while extraordinarily small sales, only 2,614,300 pounds, for the week, at the three chief markets against 14,337,000 pounds last year 7,663,800 in 1895, and 7,099,000 in 1892, indicate very little demand at this time for manufacture. The truth is that demand for goods is not helped by high prices for wool.

"Wheat has been declining a little with foreign reports somewhat more favorable as to European crops, and yet the actual shipments have been 3,586,947 bushels, flour included, for the week, against 4,468,954 bushels for the corresponding week last year. All reports still indicate that farmers are quite generally holding back their crop in the hope of higher prices, and collections at the West are almost everywhere retarded on that account, and yet the Western receipts amount to 10,539,359 bushels, against 8,310,720 for the same week last year. Nor is the corn crop any obstruction, for
