

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinal laxative and presenting them in the form most refreshing to the taste and acceptable to the system.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only.

CALIFORNIA FIG SYRUP CO. SAN FRANCISCO, CAL. LOUISVILLE, KY. NEW YORK, N. Y. For sale by all Druggists.—Price 50c. per bottle.

Statement by Alger.

WASHINGTON, April 14.—Secretary Alger tonight put an effective quietus on the persistent reports that he contemplated retiring from the cabinet by a positive and unequivocal statement that the reports were absolutely without foundation and that unless some unforeseen and unlooked-for contingency arises, he proposes to remain secretary of war throughout this administration.

In almost every neighborhood there is some one whose life has been saved by Chamberlain's Colic, Cholera and Diarrhoea Remedy, or who has been cured of chronic diarrhoea by the use of that medicine. Such persons make a point of telling of it whenever opportunity offers, hoping that it may be the means of saving other lives.

DESTRUCTIVE PESTS.

Two Insects That Have Troubled American Farmers.

A Systematic Study Has Been Made of the Chinch Bug and the Hessian Fly—Bulletins by the Government.

The two greatest insect pests known to the American farmer have been receiving the careful attention of the division of entomology of the United States department of agriculture for a long time. These are the chinch bug and the Hessian fly. The department has prepared and is about to publish two bulletins treating respectively of the two insects and suggesting possible remedies for checking them.

The bulletin on the chinch bug is entitled "The Chinch Bug; its probable origin and diffusion, its habits and development, natural modes and remedial and preventive measures, with mention of the habits of an allied European species." The bulletin was prepared under the direction of the entomologist of the department, F. M. Webster.

The bulletin on the Hessian fly is entitled "The Hessian Fly in the United States." It was prepared under the direction of the department's entomologist by Herbert Osborn, professor of zoology and entomology at the Agricultural College of Ames, Ia., and contains many facts concerning the life, history, food habits and parasitic enemies of this farm pest.

The other bulletin is entitled simply, "The Hessian Fly in the United States." It was prepared under the direction of the department's entomologist by Herbert Osborn, professor of zoology and entomology at the Agricultural College of Ames, Ia., and contains many facts concerning the life, history, food habits and parasitic enemies of this farm pest.

The bulletin says that it would appear that this pest first made its presence known in this country in North Carolina in 1783, and mentions several serious outbreaks of the bug in the west. The estimated losses from its ravages from 1850 to 1887 reach \$267,000,000.

An account of its original habitat, its very wide distribution throughout the wheat-growing districts of Europe and America, and its means of distribution are given in the bulletin, with descriptions of the male and female insects, the eggs, the larval form and development, food plants, natural enemies and remedies. The bulletin also contains a list of all the important papers on the Hessian fly that have appeared in America, and such of the foreign works as are of value to the American student.
