Mrs. B. Wilson returned last night from camp at Cascades.

Miss Mary McInerney returned last night from Clatsop beach.

T. H. Johnston, M. J. Anderson and W. Heisler are in from Dufur today.

Mrs. J. R. Warner returned to her home at White Salmon by boat this morning.

Mrs. C. W. Taylor and family are down from Walla Walla visiting her mother, Mrs. Wilson.

Mrs. Jos. Sherar and Miss Pearl Grimes have returned from a visit with friends in Huntington.

Miss Nettie Fredden went down to Cascades this morning to spend a few days with Grace Hobson.

Mrs. H. Glenn came up from her cottage at Seaview, Ilwaco beach, last evening, and will return Monday.

Mr. and Mrs. W. E. Brock arrived in the city last night on their way from Portland to their home at Heppner.

Mr. and Mrs. G. W. Miller and family returned last night from Naticotta, Long Beach, where they have been recuperating for the past few weeks.

Mrs. John Gavin, accompanied by Miss Taylor, left Thursday evening for a trip to the East. Mrs. Gavin will visit relatives in Missouri and Illinois.

Mrs. W. C. Allaway and family and Mrs. F. Clarke and family came up last night from Hamilton, on the Washington side of the river, where they have been camping.

Mrs. Thos. Condon, of Antelope, returned last evening from Portland where she had been with her little daughter, whom she has been having Dr. French treat for throat trouble.

Mr. and Mrs. J. S. Fish and family

Crippled by Rheumatism.

Those who have Rheumatism find themselves growing steadily worse all the while. One reason of this is that the remedies prescribed by the doctors contain mercury and potash, which ultimately intensify the disease by causing the joints to swell and stiffen, producing a severe aching of the bones. S. S. S. has been curing Rheumatism for twenty years—even the worst cases which seemed almost incurable.

Capt. O. E. Hughes, the popular railroad conductor, of Columbia, S. C., had an experience with Rheumatism which convinced him that there is only one cure for that painful disease. He says: "I was a great sufferer from muscular Rheumatism for two years. I could get no permanent relief from any medicine prescribed by my physician. I took about a dozen bottles of your S. S. S., and now I am as well as ever was in my life. I am sure that your medicine cured me, and I would recommend it to any one suffering from any blood disease."

Everybody knows that Rheumatism is a diseased state of the blood, and only a blood remedy is the only proper treatment, but a remedy containing potash and mercury only aggravates the trouble.

S.S.S. For The Blood

being Purely Vegetable, goes direct to the very cause of the disease and a permanent cure always results. It is the only blood remedy guaranteed to contain no potash, mercury or other dangerous minerals.

Books mailed free by Swift Specific Company, Atlanta, Georgia.

and N. J. Sinnott returned home last night from a camping trip at Trout Lake. They report fishing good, and little rain in that section.

Mrs. T. Baldwin and daughter, Miss Rosemary, returned last evening from Seaside, Clatsop beach.

Rev. L. C. Martin, formerly of The Dalles, but now of Watsburg, is in the city, and will occupy the pulpit of the Christian church tomorrow evening.

C. A. Rhea and son, Carl, arrived from Portland last night on their way to Heppner. Mr. Rhea was called to Portland on account of the illness of Mrs. Rhea, who is being treated there.

George Dysart, who was called to this city on account of the illness of his little daughter, Avis, returned to his home at Centralia yesterday. He was accompanied by his son, Lloyd, and Miss Carrie Butler, leaving his daughter much improved and in the care of her aunt, Miss Nellie Butler.

I. C. NICKELSEN,

NOTICE.

Notice is hereby given that the city council of Dalles City has determined to establish a sewer system for all territory of said city lying below the bluff and east of Lincoln street, and has further determined that the cost of such sewer system shall be assessed against the property benefited thereby.

Said sewer system is to be of terra cotta pipe and the extent and location thereof to be as follows:

The main line of said sewer system shall extend from the line west of the street to the Mill creek at said low water strikes said river; thence along the east bank of said Mill creek to a point on the east line of Union street, thence at a right deflection of 10 degrees and 10 minutes from the course last described, to a point 125 feet north of the northwest corner of the stone wall bounding the E. M. Wilson property; thence at a left deflection from the course last described, to a point 125 feet north of the west line of Union street, 125 feet north of Second street; thence crossing Union street to the center of the alley between second and Main streets, thence along the center of said alley from Union to Laughlin street; thence continuing in a straight line on the same course across Laughlin street, to a point on the east line of said street, 125 feet north of Second street; thence continuing in a straight line on the same course across block 8, Laughlin's addition to Dalles City, 200 feet, to Jefferson street, on a line 125 feet from, and parallel to, Second street; thence continuing on said straight line, in the same course, 10 feet into the east line of Jefferson street and 125 feet north of Second street. Thence at a left deflection from the line last described, to a stake, thence at a right deflection from the line last described 27 degrees and 20 minutes 100-100 feet to a stake 75-100 feet from the southeast corner of the last described stake, thence at a left deflection from said line 14 degrees and 40 minutes, 450-10 feet to a point on the west line of Monroe street, 125 feet north of the west line of Union street, 125 feet north of the west corner of Moody's brick warehouse; thence continuing in a straight line on the course last described, to a point on the east line of Union street, 125 feet east of the east line of Union street, 125 feet north of Second street and 70 feet east of Monroe street; thence at a right deflection from the last line 70-200-30-10 feet, to a stake, thence at a right deflection from the last line 89-100 feet north of Second street and 45-75-100 feet west of the west end of the Wasco warehouse.

A branch of said sewer system shall connect with the main line at a point 25 feet north of the west line of said street, at a point 125 feet north of Second street, and shall run along said Union street 25 feet east of the west line thereof, to a point 75 feet south of the north line of Union street.

Another branch line of said sewer system shall commence in the center of the alley between Second and Third streets, at a point 45 feet east of the center of said alley, and run thence along the center of said alley to a point 20 feet east of the east line of Court street, connecting with the branch of said sewer system running up Union street, as hereinafter described, from the east and west, by convenient curves of about a twenty-foot radius.

Also a branch of said sewer system commencing in the center of the alley between second and Third streets, on the east line of Washington street, and running thence easterly along the center of said alley, to a point where the sewer intersects the east line of Washington street, thence easterly along the line of said sewer as it is now located, to the point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 101 feet east of Federal street, and running thence along the center of said alley to the west line of Laughlin street, and thence continuing with the main line of said sewer by a left curve of about a 20-foot radius, in said Laughlin street.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

Also a branch line of said sewer system, commencing at a point in the center of the alley between second and Third streets, 200 feet east of the west line of said street, and 25 feet south of the center line of the alley between second and Third streets; thence deflected to the left by a curve of about a 20-foot radius, to a point where said sewer intersects the east line of Madison street, thence easterly along the line of said sewer as it is now located, to a point where the main line of said sewer crosses Federal street, between second and Third.

mening in the center of the alley (or Sixth St.) south of block 11, at a point where the west line of Washington street crosses said alley; thence westerly about the center of said alley to a point 25 feet west of the east line of Court street; thence by a convenient curve to the right of said sewer system to a point 20 feet east of the west line of Court street; thence in a northerly direction parallel with the west line of Court street to the south line of Fourth street; thence by a curve to the left of about a 20-foot radius to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point opposite the center of the alley between Fourth and Fifth streets, 20 feet east of the west line of Washington street, and 20 feet west of the east line of Court street; thence in a westerly direction along the line of the center of said alley to a point 20 feet west of the east line of Court street; thence by a convenient curve to the right of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.

Also a branch line of said sewer system, commencing at a point 20 feet north of the south line of Court street, running thence in an easterly direction to the west line of Court street; thence by a curve to the left of about a 20-foot radius, to a point on the west line of Court street, 20 feet north of the south line of Fourth street; thence westerly along Fourth street, parallel with the west line of said Fourth street, to a point 20 feet west of the east line of Union street; thence connecting by a convenient curve to the right, of about a 20-foot radius, with the branch line of said sewer system running along Union street.
