As the time approaches for settling the question of how many bishops are to be elected by the Methodist general conference now in session in Chicago, the sentiment is growing among the delegates that none of the present occupants of the high office should be retired and placed on the superannuated list.

Between fifty and sixty thousand pounds of merchandise were shipped from the Wasco warehouse during the present week to points in Grant and Crook counties, and other points south. The statement going the rounds of the papers that C. H. Walker is not the eldest native son in Oregon, that honor being accorded to Joseph La Bonte, of St. Paul, Marion county, is misleading, says the Albany Democrat. Mr. Walker invariably claims to be the oldest white native son, knowing that there were men on the Indian reservations much older than he. We are informed Mr. La Bonte is at least a half-blood, his father being a French Canadian, his mother an aboriginal native daughter.

The Mormon preachers that have been working The Dalles for sometime are reported to have said that they had a revelation ordering them to come here, that they would meet with persecution, and all that sort of thing, but they were to hang on and stay, notwithstanding, presumably till the town should be converted to Mormonism. It would not surprise the writer of these lines one bit if, in the event of these brethren continuing to quote Isaiah 4:1 to The Dalles sisterhood when they call on them, which generally happens when the men folks are not at home, if some big footed son of a gun of a Dalles Gentile would not have a revelation exhorting him to elevate these beloved brethren into the next township.

Obituary.

Mary E. Walker, who was buried in The Dalles city cemetery last Monday, was born in Illinois 80 years ago, lacking a few days. She was married in 1842 to Joel B. Cook and crossed the plains with her husband in 1851, settling in Lane county. Mr. Cook died in 1863 and about two years after the widow came to The Dalles where she was married to the late A. M. Walker, who died a little over a year ago, in 1877. Mrs. Walker was an earnest, kindly Christian woman. She had been a member of the church for about 60 years. She leaves to mourn her departure a brother, Horace Rice of this city, and a sister, Mrs. Ruth Colver, who lives in the Willamette valley.

CARS CROSS AN AVALANCHE.

Railroad Laid on a Bluff That is Sliding Into the Missouri River.

A mile south of Atchison, Kan., the entire side of a bluff is sliding into the Missouri river. The avalanche, says the Chicago Record, is a quarter of a mile long, and at its base is the most expensive piece of railroad track on the Missouri Pacific system. There is probably not another quarter of a mile of track in the United States which it costs more to maintain. The odd thing about this monster landslide is that it has been slipping down for 20 years, and unless it takes an unexpected plunge will probably be slipping for the next 20 years, and possibly fifty or a hundred. The avalanche is moving more or less at all times, but not enough to require watching by the Missouri Pacific except about two months in the spring.

During the winter the moisture is held in the ground, and when the frost thaws and the spring rains come the great mass of earth begins slipping. Sometimes it comes down a foot in 24 hours, and once in awhile it slides six feet. The Missouri Pacific then puts a force of from 20 to 50 men to work pulling the track back to its proper place and keeping it level. A man is employed to watch the track at night and see that it does not get so far out of line as to topple a train over into the river. Orders are issued to engineers to go slow over the bad track, for the jar of a train might cause an unprecedented move.

The bluff is one of the highest of the very high bluffs along the Kansas side of the Missouri river from Kansas City to the Nebraska line. Lying under about 15 feet of earth there are one or more strata of rock aggregating from 20 to 40 feet in thickness. There seems to have been a perpendicular split down through this rock dividing the bluff almost half in two, and extending a quarter of a mile north and south. The side which lay on the river, or east side, slid because there was nothing to hold it, while the opposite, or west side, was up against another bluff. Thus the east side began gradually to sink into the river and has laid bare a wall 20 or more feet high in places. Here and there enormous boulders, which hung for a long time undecided with which side to identify themselves, finally lost their balance and crashed down, dashing themselves to pieces below. It costs the Missouri Pacific several thousand dollars and causes a great deal of anxiety every spring, but there is no way of avoiding it.

The maker makes them by the thousands that's why you buy them as low as 49 cents.

Have the work done at home and they'll cost again as much. Made of pink or blue striped percale; box plait in front, trimmed with lace edging and lace insertion front and back; sizes 2, 3 and 4 years.
