The blood contains all the elements necessary to sustain life. A deficiency of any one of these elements, or a surplus of another, is a primary cause of disease. The blood is the life-giving element of the body, and its condition is a reflection of the condition of the whole system. Blood troubles are the result of a defective blood-making process, and are characterized by a general debility, a loss of energy, and a tendency to catch colds and other ailments. The blood is the life-giving element of the body, and its condition is a reflection of the condition of the whole system. Blood troubles are the result of a defective blood-making process, and are characterized by a general debility, a loss of energy, and a tendency to catch colds and other ailments.

SSS

BLOOD TROUBLES REQUIRE BLOOD REMEDIES. The patient must be completely and permanently cured. The blood must be purified and renewed. The blood is the life-giving element of the body, and its condition is a reflection of the condition of the whole system. Blood troubles are the result of a defective blood-making process, and are characterized by a general debility, a loss of energy, and a tendency to catch colds and other ailments.
