WAYSIDE GLEANINGS.

A small clip of wool was sold yesterday afternoon at twelve cents a pound. The regular monthly meeting of the water commissioners will be held this evening at 8 o'clock.

John E. Jacobsen, of White Salmon, was in town yesterday trying to dispose of 100 tons of green prunes, but without success.

Leagues are being formed in Portland to fight the cigarette. It should be made hot for it generally, the nasty little coffin nail, without a redeeming feature about it.

From Mr. Paul Mohr THE CHRONICLE learns that the damage to the steamer Billings is not material, and that the Central Navigation Company expects to have her floated off the rocks at Quinn's tomorrow.

Agent W. C. Allaway writes to the Astoria Regatta committee that his company has arranged to send a boat to Astoria with a distinguished party and to make rates to Portland in connection with the trains and boats.

An exchange says the run of salmon takes the capacity of the facilities for handling the fish on the lower Columbia. And the run of salmon on the middle river taxes the capacity of the wheelmen to know where they are going to get the money to pay their employees.

William Sturgis, a lad of 16 years, was arrested here this morning by Marshal Hughes in response to a telephone message from the Boys' and Girls' Aid Society. The lad had been placed with a Multnomah family, but, to use his own expression, struck for higher wages. He will be returned to the Boys' and Girls' Aid Society.

The temporary chairman of the Nebraska middle-of-the-road populist convention, held in Col. Bryan's own capital says that "the bogey man of imperialism will not frighten the populists." The bogey man of imperialism will not frighten anybody else in particular, though that is the mission of the said bogey man.

An Englishman has recently been lunched out of \$125,000 on a mining deal in Dawson City. The man who sold the mine went to the commissioner and told him he wanted to pay the royalty of \$80,000 that he had taken out of his claim, and paid the necessary \$40,000. For this he received a receipt, with the

aid of which he induced the Britisher to buy. Then he skipped, and when the Britisher found out that he had been "done," the miner was not to be found.

C. W. Haight yesterday bet a twenty dollar gold piece against 200 pounds of pork with John Roth, of Kingsley, that McKinley would succeed himself. Charley is so confident that he is going to win that he has contracted to furnish all the pork sausage THE CHRONICLE man may need for the coming winter.

Charles Brune, son of the late Charles Brune, of North Dalles, died yesterday afternoon of a fever contracted while herding sheep in the mountains northwest of Klickitat county. The deceased had been ill for nearly a month and his death was not unexpected. His age was about 20 years. He was buried this afternoon on the Brune ranch, beside the grave of his father.

Civil Engineer Oscar Huber, Judge Bennett and J. P. McNerny returned at noon today from a reconnaissance of the Deschutes river between the free bridge and Trout creek, Crook county. The object of the trip was to determine the feasibility of a railroad between this city and Klamath county by way of the Deschutes, at least as far as Crook county.

An Astorian dispatch of the 30th says: "The run of fish still continues excellent and the gillnetters and seigners are reaping a great harvest." Which prompts THE CHRONICLE to suggest that the gillnetters and seigners should be stopped, once and for ever, from destroying the salmon industry at Astoria and only the wheels and traps on the Upper river, that catch nothing, because there is nothing to catch, be allowed to operate.

There were ten or twelve of us, and we were gathered in front of the Salt-marsh office from Germany, Ireland, England, Scotland, the Isle of Man, Dutchland, and possibly somewhere else. Said a Manxman, "Let us see the politics of this crowd. I'll bet they're all republicans but one, that Irishman." Said the lone newspaper man in the crowd, "I'll bet that Irishman is all right." Then the lone Irishman answered: "Gentlemen, I voted for Bryan four years ago, but you bet your life I won't do it again. McKinley is good enough for me. I am going to vote this time to let well enough alone."

Sunstroke Unknown Up Here.

Mrs. J. Stewart, wife of Editor Stewart, of the Fossil Journal, was prostrated by a heat on the 24th. Cases of sunstroke are very infrequent in that country.—Oregonian.

So they are. Mrs. Stewart, if THE CHRONICLE remembers rightly, was stricken on the streets of Portland. Sunstroke is unknown up this way.

Notice.

At 7 p. m. this Tuesday evening all the fire alarm boxes in the city will be turned in as a test. Citizens and firemen will remember the hour and govern themselves accordingly.

PERTINENT PRESS COMMENT.

We don't find gold democrats going about in Lane county with a 16 to 1 pin can tied to the tail of their political principle.—Eugene Register.

The Oregon will be an ugly customer to handle even if she goes into a fight with a patch on her hull instead of permanent repairs.—Globe-Democrat.

The republican party places before the American people for their consideration a Scotch-Irishman and a Dutchman—two clean men.—Woodburn Independent.

Boss Bryan's silver plank demands "an American financial system." We have it by order of the 9,104,779 people who voted for McKinley in 1896.—Journal.

A hot campaign? No. The people are satisfied with the present condition of affairs and are seeking no change. For a hot campaign it needs a dissatisfied people. The American people are well pleased with the existing conditions. A hot campaign? Nit!—Criterion.

The New York World, the leading democratic newspaper in New York, says in relation to the 16 to 1 folly which Bryan peremptorily ordered into the democratic platform, that "no matter what any politicians from this state may say to the contrary, New York is not in favor of free coinage at 16 to 1, and cannot be carried on that issue thrust aggressively to the front as it still is by Mr. Bryan."

It is the esteemed Jacksonville Times whose editor helped twice to nominate Bryan, which makes this profound observation: "The price of tea was raised three cents a pound last week. Thus does the cost of every necessary of life increase in these piping times of republican prosperity, without an adequate enhancement in the wages of the majority of those who are in the least able to endure it." Well, if the partial failure of the tea crop in Japan and the war in China have nothing to do with the rise in the price of tea, but it is to be laid at the door of the republican administration, then in all fairness the Jacksonville editor should not criticize the republican organs for ascribing large crops and healthy babies to the same source. He is in even a worse boat than they.—Telegram.

GUNS PLACED ON SKATES.

Novel Contrivance of Warfare Suited to Wintry Climate Used by the Canadian Artillery.

It is proverbial that necessity is the mother of invention, and certain it is that our Canadian cousins are not wanting in the latter capacity. In no direction is this fact more strongly in evidence than in their method of mounting their field batteries for winter use, says the London Mail.

During the winter months, when the whole country is frequently covered to the depth of several feet with a bed of treacherous snow, it is, of course, impossible to move wheeled artillery and ammunition wagons. As, however, intending invaders are by no means given to confining their efforts to summer campaigns, it became necessary to devise some means of getting over the difficulty. Happily, Canada had in the person of Artillery Major R. W. Rutherford a soldier of no little resource.

By a most ingenious design he has made it possible to mount the guns gun-limbers, wagons and wagon-limbers upon a species of "hobbsleigh," the whole arrangement being joined up by traces in the ordinary way by an operation occupying at the outside under five minutes.

The change from summer to winter guise can thus be made immediately a fall of snow has rendered the roads impassable for wheeled traffic, while the advantage in superior mobility over an unprepared enemy would be enormous, as the practically noiseless motion of the sleighs would bring the guns well into range without betraying the slightest hint of their approach.

FIRST YOU HAD DANDRUFF

Was Careless About It. Now You Look Like This.

That spot will grow unless you attend to it. Dandruff is the disagreeable scurf that forms on the head as a natural excretion; it dries, and comes off in small scales. It causes irritation, which, by sometimes unconsciously, followed by constant scratching of the head in public and private. It is annoying to people who wear dark clothes, and it gradually affects the hair, causing it to fall out.

Keep the air inside the hat from getting foul by wearing Eldred's Antiseptic Hat Pad, and nature will do the rest. The heat of the head vitalizes the antiseptic and disinfectants in the pad, making the impure air pure.
