THE REPLY OF GOVERNOR GEER

His Views on a Third Term For President McKinley—Informs Eastern Paper That Conditions Have Not So Far Changed as to Make This Advisable.

SALEM, Or., June 6.—Governor Geer today received the following telegram from the Chicago American:

"Will McKinley be the first president to have a third term?"

"Have conditions so changed that the third term is advisable?"

"What do declarations by such men as Senators Depew, Kearns and Hanna seem to indicate?"

Governor Geer sent the following reply tonight:

"I do not believe McKinley will be the first president to have a third term, nor that the man is born who will. For many reasons McKinley will rank in history as one of our greatest presidents, but no combination of circumstances will make it necessary for him to be seriously considered by any one as a third-term candidate. I have no idea that he has ever thought so himself. No matter how conditions might change in this country, the proposition that no man should serve a third term would still be the best public policy. The declarations of the prominent men you name indicate nothing more than a desire to be sensational along the line of learning public sentiment on the question. There can be no doubt as to what the public mind will say upon this subject. I have the highest possible opinion of President McKinley, but necessity does not and will not exist for the departure from the established custom of the country upon the question of a third term."

"I. T. GEER, Governor."

Poltaioch Afloat.

SOUTH BEND, Wash., June 6.—The British vessel Poltaioch, which was stranded eight months ago on the ocean beach near the North Cove lighthouse, is safely afloat and reached South Bend this morning at 10:30 amid a din of mill whistles and the ringing of bells. She first floated at high tide at 3 p. m., yesterday, but the tug was at South Bend and Captain Young, of the Poltaioch, had to let her go partly to the beach again until the tug Astoria could be summoned.

For over two weeks the vessel had been within thirty feet of deep water. When the final pull was made she moved ten feet, and then slowly slid into deep water. The tug got a line to her at 6 a. m. She is uninjured, not even being strained to any perceptible extent, and looks none the worse for her stay on the beach.

To Captain Young belongs the chief credit for floating her, his original plans having at last been adopted, after experiments by experts of the London Salvage Association had failed. Ballast will be taken aboard here and she will then go to Victoria to go on the drydock.

BOERS ROUTED BY THE BRITISH

Lose Thirty-seven Killed and One Hundred Prisoners of Total of Four Hundred Men.

PRETORIA, Wednesday, June 5.—Col. Wilson, with 240 of Kitchener's scouts, has surprised and routed 400 Boers belonging to Beyer's commando, 34 miles west of Warm Baths. The Boers resisted stubbornly, but finally broke and fled, leaving 37 killed, 100 prisoners, and all their wagons and supplies, including 8000 cattle, in the hands of the British. The loss of the latter was three men killed and 15 wounded. Beyer's main command arrived on the scene soon after the engagement, but failed in an attempt to recapture the supplies. Beyer was left practically without transportation or supplies.

Labor and Church.

LEADVILLE, Colo., June 6.—At the meeting of the Colorado State Federation of Labor, the following resolution was adopted in response to the action of the convention of the Reformed Presbyterian church, in session at Pittsburg, in denouncing labor organizations as dangerous:

"Resolved, That the convention desires herewith to state for the enlightenment of these over-zealous, bigoted, misrepresentatives of a large membership of that church, that organized labor, as operated and controlled by the different unions of America, is today working for the good of humanity, not only of its members but also of those who are not organized. That said organization is doing more good, morally, bettering the condition of more people, causing the enactment and enforcement of better laws, making possible the better education of the masses, aiding in the building of more everlasting monuments of true Christianity—the brotherhood of man—making it possible for more people to have three meals a day and to wear better clothes than all the religious denominations of America. And the labor unions do it without any great amount of adventuring."

New Steel Process is Found. REDDING, Cal., June 6.—George C.

Carson, an experienced mining man of Northern California, and recently superintendent of a mine in this district, has applied for a patent on a new process for the manufacture of steel, which he claims to have perfected. Carson states that he has been approached by a representative of a large Eastern steel organization with an offer of \$600,000 for the secret, provided the patent is issued and tests are satisfactory. In order to fully test the claims made for the process, the agent making the offer to Carson agreed to establish a plant for the purpose near Chicago, where experiments may be carried out and the value of Carson's invention determined. Carson has accepted the conditional offer of \$600,000, and will leave in a few days for Chicago to complete his part of the agreement. By the use of the Carson process, the inventor claims that steel of a quality much superior to Bessmer steel can be produced.

Broke a \$3000 Mirror.

PITTSBURG, June 6.—A great 36 six inch mirror belonging to a Newtonian reflecting telescope at Lick Observatory was shattered into many fragments yesterday in the workshop of Professor John A. Brashear, of this city, while it was being drilled to convert in into a cassegrain glass. As a result it is probable that the long projected expedition of the Lick Observatory into the Southern Hemisphere will have to be postponed. Professor Brashear will make a new glass for the Lick scientists, but the glass for this cannot be obtained from France in less than six months. The great mirror was five inches thick and weighed 400 pounds. It was valued at \$3000, but the greatest loss is in the delay it will cause in the starting of the South American expedition.

Sensational London Suicide.

LONDON, June 6.—Dr. Thomas Bond, a well-known surgeon and analyst, committed suicide today by throwing himself from a third-story window of his residence. He had been suffering from melancholia for some time. Dr. Bond, besides being the late Mr. Gladstone's surgeon, was noted in connection with investigations and discoveries in the cases of several sensational crimes, notably the Lefroy, Lamson and Camp murders.
